

COURTEVILLE'S AutoReg™ DEBUTS IN KOGI STATE

Courteville Business Solutions PLC is pleased to announce the adoption of its process improvement AutoReg™ service by the Kogi State Government to handle its entire Motor Vehicle Administration Documentation from August 1st, 2013.

Courteville's AutoReg™ is a web-based business solution for motor vehicle registration and documentation currently deployed through its over 3500 processing points in over 18 States across Nigeria and in Sierra Leone.

The AutoReg™ franchise is a flagship service rendered by Courteville Business Solutions PLC in partnership with licensing offices, bank branches and registered independent processing outlets to provide first-class motor vehicle administration documentation system solutions nationwide.

In addition to the AutoReg™ services, Courteville as a foremost e-business solution company in Nigeria renders the same services in the Republic of Sierra Leone for all online real time registration of motor vehicle administration and documentation.

While it is at various levels of discussions with several other States in Nigeria to join the platform, it is gradually developing for the first time in Nigeria, a national databank of motor vehicle documentation comparable with any other country in Africa.

Courteville is in the forefront of e-registration in Nigeria as it also works with NAFDAC for e-registration of all food, drugs and other items requiring the Agency's approval.

In addition, Courteville recently deployed the Nigerian Insurance Industry Database (NIID) solution, which is an initiative of the Nigerian Insurers Association (NIA) to create a central insurance database wherein details of all vehicle insurance policies issued by insurance companies are updated. This is to create an authentic and verifiable database of motor vehicle insurance in Nigeria.
