Unaudited Interim Financial Statements for the Six Months Ended 30 June 2022

1. General information

Unilever Nigeria Plc. is incorporated in Nigeria as a public limited liability company under the Companies and Allied Matters Act (CAP C20) Laws of the Federation of Nigeria, 2004 and is domiciled in Nigeria. The company's shares are listed on the Nigerian Stock Exchange (NSE).

The company is principally involved in the manufacture and marketing of Foods and refreshments, Home care and Beauty and personal care products. It has manufacturing sites in Oregun, Lagos State and Agbara, Ogun State.

2. Dealings in Unilever Nigeria Plc. Shares

The Company has adopted a code of conduct regarding securities transactions by its directors on terms no less exacting than the required standard set out in the rules of the Nigerian Stock Exchange.

Having made specific enquiry of all directors, Unilever Nigeria Plc directors have complied with the required standard set out in the rules of the Nigerian Stock Exchange and in the Unilever Nigeria Plc code of conduct regarding securities transactions by directors.

3. Basis of preparation

These interim financial statements for the period ended 31 June 2022 have been prepared in accordance with IAS 34, 'Interim financial reporting'. The interim financial statements should be read in conjunction with the annual financial statements for the year ended 31 December 2021, which have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board.

4. Significant accounting policies

The accounting policies adopted are consistent with those of the previous audited financial year.

5. Estimates

The preparation of interim financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

In preparing these condensed interim financial statements, the significant judgements made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the financial statements for the year ended 31 December 2021.

Unaudited Interim Financial Statements for the Six Months Ended 30 June 2022

6. Financial risk management

Financial risk factors

Unilever's activities expose it to a variety of financial risks: market risk (foreign exchange risk), credit risk and liquidity risk. Unilever's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on Unilever's financial performance.

Risk management is carried out by a Treasury Department under policies approved by Board of Directors. Unilever's Treasury Department identifies, evaluates and manages financial risks in close co-operation with Unilever's operating units. The Board provides written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity. These policies are mostly Unilever Global Policies adopted for local use.

The condensed interim financial statements do not include all financial risk management information and disclosures required in the annual financial statements; they should be read in conjunction with the Company's annual financial statements as at 31 December 2021. There have been no changes in the risk management structure since year end or in any risk management policy.

6.1. Financial risk factors

- (a) Market risk
- (i) Currency risk Transactions in foreign currency

Unilever is exposed to foreign exchange risk arising from various currency exposures. The currencies in which these transactions are primarily denominated are US dollars, Pound sterling, Euro and Rand. The currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate due to changes in foreign exchange rates.

The Company manages this risk mainly by hedging foreign exchange currency contracts.

(ii) Cash flow and fair value interest rate risk

Unilever's interest rate risk arises from bank overdrafts and bank loans. Overdrafts issued at variable rates expose Unilever to cash flow interest rate risk. Borrowings issued at fixed rates expose Unilever to fair value interest rate risk.

Unilever analyses its interest rate exposure on a dynamic basis. Various scenarios are simulated taking into consideration refinancing, renewal of existing positions and alternative financing. Based on these scenarios, Unilever calculates the impact on profit and loss of a defined interest rate shift. For each simulation, the same interest rate shift is used for all currencies. The scenarios are run only for liabilities that represent the major interest-bearing positions.

(b) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or a counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers

Concentration of credit risk with respect to trade receivables is limited, due to the Company's customer base being diverse. Credit terms for customers are determined on individual basis. Credit risk relating to trade receivables is managed by reference to the customers' credit limit, inventory balance, cash position and secondary sales to final consumers.

The carrying amounts of financial assets and contract assets represent the maximum credit exposure

(c) Liquidity risk

Liquidity risk is the risk that Unilever will face difficulty in meeting its obligations associated with its financial liabilities. Unilever's approach to managing liquidity is to ensure that it will have sufficient funds to meet its liabilities when due without incurring unacceptable losses. In doing this management considers both normal and stressed conditions. A material and sustained shortfall in our cash flow could undermine Unilever's credibility, impair investor confidence and also restrict Unilever's ability to raise funds.

Cash flow from operating activities provides the funds to service the financing of financial liabilities on a day-to-day basis. Unilever seeks to manage its liquidity requirements by maintaining relationships with different financial institutions through short-term and long-term credit facilities. Cash flow forecasting is performed in Unilever. Unilever's finance team monitors rolling forecasts of Unilever's liquidity requirements to ensure it has sufficient cash to meet operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities at all times so that Unilever does not breach borrowing limits or covenants (where applicable) on any of its borrowing facilities. Such forecasting takes into consideration Unilever's debt financing plans, covenant compliance and compliance with gearing ratios.

Where current libilities exceed current assets, the Company seeks to manage its liquidity requirements by maintaining access to bank lending which are renewable annually.

At the reporting date, Unilever held cash in bank was N63.5 billion (31 December 2021: N55.7 billion).

7. Segment reporting

The chief operating decision-maker has been identified as the Leadership Team (LT) of Unilever Nigeria Plc. The Leadership Team reviews Unilever's monthly financial and operational information in order to assess performance and allocate resources. Management has determined the operating segments based on these reports. The Leadership Team consider the business from a product category perspective. Unilever is segmented into Food Products (FP), Home & Personal Care Products (HPC).

Foods – including sale of savoury.

Home & Personal Care – including sale of skin care and oral care products, fabric care and household cleaning

There are no intersegmental sales and Nigeria is the company's primary geographical segment as it comprises 99% of the company's sales.

The Leadership Team assesses the performance based on operating profits for each operating segment that is reviewed. Total financing (including interest income and expense), income taxes and retirement benefit obligations are managed on an entity-wide basis and are not allocated to operating segments.

(ii) The Company is involved in trade financing arrangements with some local banks where the banks agree to pay amounts to foreign vendors in respect of invoices owed by the Company and receives settlement from the Company at a later date. The principal purpose of the arrangement is to facilitate efficient payment processing in view of the challenges being experienced with sourcing foreign currency in the Nigerian market. The arrangement enables the Company settle its foreign obligations in a timely manner to facilitate receipt of key input materials required in the production of finished goods.

The balance due to the banks for payments made as at period end amounted to N10.3 billion (31 December 2021: N7.1 billion).

18. Retirement benefit obligations

The amounts recognised in the statement of financial position are determined as follows:

	30 June 2022 N'000	31 December 2021 N'000
Present value of funded retirement benefit obligations Fair value of plan assets	(1,872,606) 1,424,351	(1,867,087) 1,445,796
Retirement benefit deficit	(448,255)	(421,291)
Present value of unfunded retirement benefit obligations Long service award obligations	(471,683) (392,066)	(454,713) (369,770)
Net liability in the statement of financial position	(1,312,004)	(1,245,774)

Compliance with Free float Requirements

Unilever Nigeria Plc. as at 30 June, 2022 is compliant with the Free float requirement for the Main Board of the Nigerian Stock Exchange.

22. Assets held for sale

During the year, management committed to a plan to sell part of its manufacturing facility within the Home and Personal Care segment. Accordingly, part of that facility is presented as assets held for sale at the carrying amount of N262 million. Efforts to sell the disposal group have reached an advance stage and sale is expected by September 2022.

23. Discontinued Operations

On 1 October 2021, Unilever Nigeria Plc concluded the sale of its Global Tea Business. In line with the Unilever Group's directive, the Company committed to a plan to sell this business since its announcement on 23 July 2020.

The Tea business was not previously classified as Held for Sale or as a discontinued operation. The comparative statement of profit or loss and OCI has been re-presented to show the discontinued operation separately from continuing operations.

Results of discontinued operation	30 June 2021
Income Statement	N '000
Turnover	6,729,417
Cost of sales	(5,071,453)
Gross Profit	1,657,964
Selling and Distribution expenses	(206,922)
Marketing and administrative expenses	(1,054,761)
Profit Before tax	396,281
Taxation	(118,884)
Profit for the year from discontinued operations	277,397

The numbers reflect the results of the Tea business from the beginning of 2021 to 30 June 2021.

The profit from the discontinued operation is attributable entirely to the owners of the Company.
