

# Unaudited results for the three months ended 31 March 2024

29 April 2024

Reliable energy,  
limitless potential

A large, thin green line graphic that forms a stylized, continuous 'S' or 'e' shape, looping around the right side of the page.

**Lagos and London, 29 April 2024:** Seplat Energy PLC (“Seplat Energy” or “the Company”), a leading Nigerian independent energy company listed on both the Nigerian Exchange and the London Stock Exchange, announces its unaudited results for the three months ended 31 March 2024.

## Operational highlights

- Production averaged 49,258 boepd, down 4.8% on prior period (3M 2023: 51,720 boepd), but 5.7% above Q4 2023 production, and towards the upper end of 2024 guidance (44,000 boepd – 52,000 boepd).
- ANOH gas plant pre-commissioning works ongoing. Seplat maintains its first gas target in 3Q 2024.
- Sibiri-1 on stream a few weeks after FDP approval, work ongoing to commence production from Sibiri-2.
- Discovery of hydrocarbons in previously untested deep reservoirs at Sapele-37 and Okporhuru-9.
- Carbon emissions intensity: 29.4 kg CO<sub>2</sub>/boe (3M 2023: 26.4 kg CO<sub>2</sub>/boe). End of Routine Flaring (“EORF”) projects are on track, with EORF expected in H2 2025, these will deliver a material reduction in emissions intensity.
- Achieved more than 2.3 million hours without Lost Time Injury (“LTI”) at Seplat-operated assets in Q1 2024.

## Financial updates

- Revenue \$179.8 million, down from \$331.0 million in 3M 2023 (after adjusting for underlift and overlift oil volumes, 3M 2024 adjusted revenues of \$236.3 million, against \$255.6 million in 3M 2023).
- Average realised oil price \$86.17/bbl (3M 2023: \$82.32/bbl); average realised gas price \$3.11/Mscf (3M 2023: \$2.88/Mscf).
- Unit production opex of \$9.6/boe, (3M 2023: \$9.0/boe).
- Cash generated from operations of \$16.8 million, primarily due to timing of liftings, \$95 million received in April for volumes lifted in March, down from \$145.0m in Q1 2023. Capex invested of \$47.1 million (3M 2023: \$44.7 million)
- Balance sheet cash down to \$335.8 million (YE 2023: \$450.1 million), \$128 million MPNU cash deposit not included.
- Net debt at end March increased to \$385 million (Dec 2023: \$305 million), a further \$19.3 million of RBL borrowings were repaid in the quarter. Net Debt to EBITDA was 0.9x.
- Q1 2024 dividend declared of US3.0 cents per share.

## Corporate updates

- On 1<sup>st</sup> April 2024 Mr. Udoma Udo Udoma became Independent Non-Executive Chairman and Mr. Bello Rabi became Senior Independent Non-Executive Director of the Seplat Energy Board.
- On 1<sup>st</sup> May 2024 Mrs. Eleanor Adaralegbe will join the Board of Seplat as an Executive Director and will succeed Mr. Emeka Onwuka as Chief Financial Officer on 21<sup>st</sup> May 2024.
- Full year guidance unchanged. Production 44,000-52,000 boepd, capex \$170 million - \$200 million.
- Working with NNPC and government to conclude the acquisition of ExxonMobil's share capital in Mobil Producing Nigeria Unlimited (“MPNU”). We remain confident that President Tinubu's administration will approve the transaction.

## Post-reporting period events

- NMDPRA increased the domestic market gas price to \$2.42/Mscf from \$2.18/Mscf, effective 1 April 2024. New pricing will be applied to approximately 30% of gas volumes.
- On April 14<sup>th</sup>, 2024, after approximately 2 years of outage, Zone-6 of SPDC operated Trans Niger Pipeline (“TNP”) resumed operations, four months ahead of management's expectations.

## Roger Brown, Chief Executive Officer, said:

*“Seplat Energy continued its trend of strong operational performance in the first quarter. Oil production on OMLs 4, 38, 40 and 41 outperformed expectations, benefitting from low pipeline losses and deferments, which were ahead of plan. Cash flow was down in the first quarter, but this is largely due to timing difference of lifting oil from the terminals. The business remains strong, production is firmly on track this year and price realisations remain supportive of cash generation.*

*In our FY 2023 results we outlined several growth opportunities for 2024. The first of these to start generating revenue for Seplat is Sibiri, which came on stream just a few weeks after the FDP approval was received from NUPRC. At Abiala (a marginal field within OML 40), the drilling programme is on track to start during 2Q. We were delighted to see resumption of operations on the Trans Niger Pipeline in April, approximately four months ahead of plan. Access to the pipeline will enable us to increase production from OML53, as well as providing the primary export route for condensate from AGPC, which remains on track for first gas in 3Q 2024.*

Looking further forward, we are pleased to share that we discovered hydrocarbons in deeper reservoirs than had previously been tested at Sapele-37 and Okhorpuru-9. The initial results are promising, again highlighting the world class quality of the geology in Nigeria.

In Nigeria, we were pleased to see more progressive actions taken by President Tinubu and the industry regulators. In March, the President signed executive orders that will provide fiscal incentives in our gas and midstream businesses. In addition, an executive order was signed and gazetted into law, which has potential to materially improve our contracting process and bring the right level of efficiency that will support costs reductions. We applaud the change, which can drive much needed efficiency gains across our industry. More recently NMDPRA lifted the domestic gas price to \$2.42/Mscf supporting revenue generation and re-emphasising the government's commitment to develop Nigeria's gas resources, a factor aligned with Pillar 2 in our strategy.

Our message to investors on MPNU is unchanged. Dialogue between key parties is active and constructive, and we remain confident that we can reach a conclusion on this transformational acquisition."

## Summary of performance

	\$ million			₦ billion	
	Q1 2024	Q1 2023	% Change	Q1 2024	Q1 2023
Revenue *	179.8	331.0	(45.7%)	268.6	152.0
Gross profit	42.7	198.3	(78.5%)	63.8	91.1
EBITDA **	123.3	140.2	(12.0%)	184.2	64.4
Operating profit (loss)	81.9	103.7	(21.0%)	122.4	47.6
Profit (loss) before tax	69.3	86.1	(19.5%)	103.5	39.5
Cash generated from operations	16.8	145.0	(88.4%)	25.2	66.6
Working interest production (boepd)	49,258	51,720	(4.8%)		
Oil volumes produced (MMbbls)	2.77	2.73	1.5%		
Oil volumes lifted (MMbbls)	1.75	3.58	(51.1%)		
Average realised oil price (\$/bbl.)	\$86.17	\$82.32	4.7%		
Average realised gas price (\$/Mscf)	\$3.11	\$2.88	8.0%		
LTIF	0	0			
CO2 emissions intensity from operated assets, kg/boe	29.4	26.4	11.4%		

\* 3M 2023 revenue includes an overlift of \$75.4m

\*\* Adjusted for non-cash items

## Responsibility for publication

## About Seplat Energy

Seplat Energy PLC (Seplat) is Nigeria's leading indigenous energy company. Listed on the Nigerian Exchange Limited (NGX: SEPLAT) and the Main Market of the London Stock Exchange (LSE: SEPL), we are pursuing a Nigeria-focused growth strategy in oil and gas, as well as developing a Power & New Energy business to lead Nigeria's energy transition.

Seplat's energy portfolio consists of seven oil and gas blocks in the prolific Niger Delta region of Nigeria, which we operate with partners including the Nigerian Government and other oil producers. We also have a revenue interest in OML 55. We operate a 465MMscfd gas processing plant at Oben, in OML4, and are building the 300MMscfd ANOH Gas Processing Plant in OML53 and a new 90MMscfd gas processing plant at Sapele in OML41, to augment our position as a leading supplier of gas to the domestic power generation market. <https://www.seplatenergy.com/>

### Important notice

The information contained within this announcement is unaudited and deemed by the Company to constitute inside information as stipulated under Market Abuse Regulations. Upon the publication of this announcement via Regulatory Information Services, this inside information is now considered to be in the public domain.

Certain statements included in these results contain forward-looking information concerning Seplat Energy's strategy, operations, financial performance or condition, outlook, growth opportunities or circumstances in the countries, sectors, or markets in which Seplat Energy operates. By their nature, forward-looking statements involve uncertainty because they depend on future circumstances and relate to events of which not all are within Seplat Energy's control or can be predicted by Seplat Energy. Although Seplat Energy believes that the expectations and opinions reflected in such forward-looking statements are reasonable, no assurance can be given that such expectations and opinions will prove to have been correct. Actual results and market conditions could differ materially from those set out in the forward-looking statements. No part of these results constitutes, or shall be taken to constitute, an invitation or inducement to invest in Seplat Energy or any other entity and must not be relied upon in any way in connection with any investment decision. Seplat Energy undertakes no obligation to update any forward-looking statements, whether because of new information, future events or otherwise, except to the extent legally required.

# Operating review

## Group production performance

### Working interest production for the three months ended 31 March 2024

	Seplat %	Q1 2024			Q1 2023		
		Liquids	Gas	Total	Liquids	Gas	Total
		bopd	MMscfd	boepd	bopd	MMscfd	boepd
<b>OMLs 4, 38 &amp; 41</b>	45%	15,089	109.5	33,961	17,613	124.1	39,002
<b>OML 40</b>	45%	12,470	-	12,470	9,568	-	9,568
<b>OML 53</b>	40%	1,263	-	1,263	1,280	-	1,280
<b>OPL 283</b>	40%	1,564	-	1,564	1,870	-	1,870
<b>Total</b>		<b>30,387</b>	<b>109.5</b>	<b>49,258</b>	<b>30,331</b>	<b>124.1</b>	<b>51,720</b>

Liquid production volumes as measured at the LACT (Lease Automatic Custody Transfer) unit for OMLs 4, 38 and 41; OML 40 and OPL 283 flow station. Gas conversion factor of 5.8 boe per scf.

Volumes stated are subject to reconciliation and may differ from sales volumes within the period.

During the first three months of 2024, total working interest production was within 2024 guidance. Production of 49,258 boepd represents a 5.7% increase versus Q4 2023, but a 4.8% decrease versus the prior year period (3M 2023: 51,720 boepd); the oil and gas mix was 62% and 38% respectively. Within this, average daily working interest oil production was stable, growing by 0.2% while gas working interest production fell 11.8%. Total production deferment in the period was 22% (3M 2023: 29%), a significant improvement on prior year performance, due to better asset availability during the period.

## Upstream business performance

Total liquids production increased by 1.5% to 2.77 MMbbls in 3M 2024, compared to 2.73 MMbbls in 3M 2023. The modest growth in liquids production during the period was underpinned by improved liquids production on OML 40.

### Western Assets

In OMLs 4, 38, & 41, working interest liquids production declined 14.3% to 15,089 bopd (3M 2022: 17,613 bopd). The reduction in production was driven by the effects of natural decline and the delays to the 2023 drilling programme. Export route availability remained stable during the period. Minor repairs on the Trans Forcados Pipeline ("TFP") route while an operational challenge at the Escravos Oil Terminal (EOT) caused a one-day downtime on Amukpe to Escravos Pipeline ("AEP") in February, were the only outages of significance in the period. As a result, total deferments on OML 4, 38, 41 for the period were 13% (3M 2023: 19%).

### Elcrest

Our operations at OML 40 recorded the strongest growth in the period. Working interest production from the asset grew by 30.3% to 12,470 bopd in 3M 2024 (3M 2023: 9,568 bopd). OML 40 volumes benefitted from improved export route availability (both pipeline and terminal), and the ongoing benefit of the effective drilling campaign in 2023.

We received approval for the full field development plan at Sibiri on OML 40 in February 2024. The first phase of the development plan includes commencement of production from the previously drilled E&A wells; Sibiri-1 and Sibiri-2. We are pleased to announce that Sibiri-1 was brought online only a few weeks after receiving development approval, though contribution to group production in 1Q 2024 was limited. Work is ongoing to bring Sibiri-2 online later in the year.

Abiala is the second growth project planned to be brought online in 2024, it is a marginal field located in the OML 40 area. At the end of the first quarter the project remained on schedule. The rig move to the location for the first production well is on track for the second quarter.

### Eastern Assets

In OML 53, daily working interest production fell 1.3% to 1,263 bopd in 3M 2024, with the evacuation of these volumes principally to the nearby Waltersmith Refinery from our Ohaji operations. Production levels in Q1 2024 were broadly similar to 2023, with Ohaji supplying crude to the Waltersmith refinery and following recent conclusion of commercial terms, it is

also able to supply up to 1,000 bopd gross (400 bopd net) to the Edo refinery. The Jisike field is currently producing into the Antan-Ebocha line, for export at the Brass terminal. The export route has been available since August 2023.

Production on OPL 283 declined by 16.3% to 1,564 bopd in 3M 2024. The year over year fall was largely due to natural decline and lack of new well stock. No new wells are planned for the license in 2024.

### Trans Niger Pipeline (TNP) Update

On the 14th of April 2024, Zone-6 of the SPDC operated Trans Niger Pipeline resumed preliminary operations after successful hydrotesting. The pipeline has been out of operation since April 2022. Seplat operated Ohaji field in OML53 is evacuated to the export market via this section of the pipeline. Work is now ongoing on a gradual reopening of wells while observing the performance of the line for stability. The well stock includes three wells drilled across 2022 and 2023, which have yet to produce. We therefore anticipate that output from Ohaji will increase over the coming quarter.

TNP is also the primary export route for condensate production for ANOH Gas Processing Company ("AGPC") which will evacuate condensate into the TNP from the ANOH gas plant.

### Drilling

For 2024, the Company's drilling program is expected to deliver 13 new wells (11 oil wells and 2 gas wells) across both operated and non-operated assets. We intend to use the 2024 drilling program to address normal production decline and, along with the completion of maintenance activities, support long-term production levels from the assets.

In the first quarter of the year, our drilling program successfully delivered One well from the 2024 drilling program, Ovhor-21, and completed two wells; Okporhuru-9, Sapele-37, which were spudded towards the end of 2023.

Sapele-37 and Okporhuru-9 had multiple targets in their respective initial plans, and each recorded notable positive results. Each well had secondary exploration targets in previously untested deeper stratigraphy in OML 41. We are pleased to announce the discovery of hydrocarbons, predominantly gas, in both wells. Okporhuru -9 well discovered multiple hydrocarbon-bearing intervals in deeper formations. While the Sapele-37 well (previously Sapele-N) encountered hydrocarbons in deeper reservoirs, as well as proving up a northerly extension to the Sapele field. Early indications suggest that these deeper reservoirs may have commercial potential, and further technical analysis is now underway to assess the deep potential at Okporhuru, Sapele and the wider OML 41.

For the remainder of 2024, we plan to deliver the remaining 12 wells on the 2024 drilling plan. Three wells: Ovhor-22, Sapele-38, and OBEN KIKB-02, are expected to be completed during the second quarter. We expect these wells to support production volumes later in the year.

## Midstream Gas business performance

During the period, the average working interest gas production volume fell 11.8% to 109.5 MMscfd in 3M 2024, from 124.1 MMscfd in 3M 2023. The decline was due to delays bringing two new gas wells onstream. Total gas sales for the period were 10.0 Bcf (3M 2023: 11.2 Bcf), contributing 38% of the Company's volumes and 16% of total revenue.

The business continues to pursue growth opportunities by expanding 3rd party gas sources to maximize the utilization of the Oben and Sapele gas plants processing hubs. New customers are being brought onboard to high grade the GSA customer base and improve revenue generation.

During the period, the Nigerian Midstream and Downstream Petroleum Regulatory Authority ("NMDPRA") announced upward revisions to the Domestic Base Price ("DBP"). The DBP for gas is now set at \$2.42/Mscf, from \$2.18/Mscf previously. Seplat has contracts to deliver approximately 30% of its gas to Domestic Gas Delivery Obligation ("DGDO") customers. Effective 1<sup>st</sup> April 2024 gas will be sold to these customers at the new DBP.

### ANOH Gas Processing Plant

During the quarter, we delivered continued progress of pre-commissioning work on the ANOH gas plant. Construction of the flowlines for delivery of wet gas from the upstream wells have been completed. AGPC has further extended its safety record on the project to 12 million man-hours without Lost Time Injury.

The recent return to operations of the TNP (mentioned above) is an important development as it de-risks the primary route for export of the condensate produced by the plant.

Our government partner, NGIC, is responsible for delivering the pipelines required to transport the gas from ANOH to the demand centres, including the 23km spur line and the Obiafu-Obrikom-Oben (OB3) pipeline.

With respect to OB3 pipeline, tunnelling operations commenced during the first quarter and are currently ongoing after the tunnel walls were previously strengthened by a process of grouting. Good progress is also being made on the Spur Line, with completion currently standing at 88%. Our government partner anticipates completion of both pipelines before the end of Q2 2024.

Based on the progress to date, we believe that we are on target to achieve our planned first gas date of Q3 2024.

## New Energy Business

In line with our strategy to support the energy transition, we continue to assess various midstream gas, power, and renewable investment opportunities that are focused on increasing energy supply and reliability, lowering costs, and reducing carbon intensity of Nigeria's electricity consumption.

We continue to monitor reforms within the energy sector and their possible impact on improving the viability of investments in the sector. On that front, significant positive steps have been made in the past quarter with the Nigerian Electricity Regulatory Commission (NERC) announcing an increase in electricity tariff to N225/kwh (from an average of N68/kwh) for electricity consumers on band A feeders. Consumers on band A feeders receive 20 – 24 hours of electricity supply daily. While other bands have their existing pricing unchanged, this represents a positive step towards achieving a cost reflective tariff within the power sector.

In addition, the NERC issued a new directive to electricity distribution companies to source 10% of their power needs from renewable sources coupled with the announcement of the Federal government plans to grant subsidies to mini grid developers via the deployment of solar power mini grids to 150 underserved sites across seven states. These numerous initiatives continue to improve the viability of potential investments within this sector.

## HSE Performance

In 3M 2024, The Company has achieved a total of 2.3 million manhours without any Lost Time Injury (LTI) on its operated assets, which reflects the Company's strong focus on safety and the dedication of its workforce to maintaining a secure work environment. This brings aggregate LTI free manhours to 12.8 million with over 534 days (13<sup>th</sup> October 2022) since last LTI was recorded. In addition, TRIR was 0.0 with no major injuries were reported during this period. Lastly, no Tier 2 Process Safety Loss of Primary Containment (LOPC) incident was recorded during the period.

## Ending routine flaring

The carbon intensity recorded for the period was 29.4 kg CO<sub>2</sub>/boe, higher than the 26.4 kg CO<sub>2</sub>/boe recorded in 3M 2023. The Sapele and Ohaji Flow Stations remained the biggest contributors to higher carbon intensity recorded during the period. The Company continues to progress efforts to secure evacuation options for unprocessed associated gas from the Sapele Flow Station. Alongside this, works continue on construction of the Sapele Integrated Gas Plant (SIGP), which is scheduled to complete during H2 2024. Once operational, SIGP offtake has the potential to materially reduce Group Scope 1 emissions.

## Proposed acquisition of MPNU

On 24 May 2023, we announced that we have extended with Mobil Development Nigeria Inc. and Mobil Exploration Nigeria Inc. (ExxonMobil) the Share Sale and Purchase Agreement (SSPA) for the acquisition of ExxonMobil's share capital of Mobil Producing Nigeria Unlimited (MPNU) to preserve the transaction pending the resolution of certain legal proceedings and receipt of applicable regulatory approvals.

The Board remains confident that the transaction will be approved, and all associated legal issues will be resolved. We continue to work with all parties to achieve a successful outcome, including our financiers who remain supportive, and have been encouraged by the recent drive of President Tinubu's administration to promote investment in country. We will provide further updates as appropriate.

## Outlook

Our production guidance for 2024 is unchanged at 44,000-52,000 boepd. Our Q1 2024 production benefitted from deferral of planned turnaround maintenance (TAM) at Oben, which will now occur in August (previously February 2024), requiring a c.2 week shut down. Given earlier than expected resumption of the Trans Niger Pipeline (TNP) we may see improved production from our Eastern Asset than in our base forecast. Once Ohaji wells have been brought on-line and stabilised, we will be able to assess the impact on our production guidance.

Our capital expenditure guidance for 2024 is unchanged at a range of \$170 million - \$200 million.

We expect cash balances to normalise in the second quarter given the currently planned lifting schedule, coupled with the continuation of a supportive commodity price environment and the payments received in April for the March liftings.

# Financial review

## Revenue

The crude oil price was steady year over year (Brent averaged \$81.76/bbl a decrease of just 0.4% vs. 3M 2023's \$82.06/bbl), though the picture during the quarter was one of steadily increasing oil prices, as geopolitical tensions rose in the Middle East region.

Though Brent was stable YoY, the Company achieved a 4.7% growth in average realised crude oil price to \$86.17/bbl in 3M 2024, from \$82.32/bbl in 3M 2023. The greater than usual premium to Brent achieved in the quarter was due to timing, as our liftings were biased to the end of the quarter when prices were higher.

Despite a steady oil price, crude oil revenue declined 49.4% to \$150.8 million in 3M 2024, from \$297.9 million in 3M 2023. The YoY decline in reported crude oil revenue was attributed to the timing of liftings, exacerbated by the overlift reported in 3M 2023. Total crude lifted during the period declined 51.1% to 1.8 MMbbls (3M 2023: 3.6 MMbbls). Net underlift volumes in 3M 2024 totalled 849 kbbbls valued at \$73.8 million, this was then adjusted down by \$17.3m to reflect the impact on the value of overlift volumes brought forward from the prior reporting period. As such, net underlift volumes were revalued to \$56.4 million. Our lifting activities are expected to normalise in subsequent quarters.

Gas revenue fell by 12.4% to \$29.0 million in 3M 2024 (compared to \$33.1 million in 3M 2023). The decline in gas revenue was attributed to lower gas volumes produced during the period, due principally to delays in new gas wells coming on stream, these are now expected onstream in Q2 2024. Production fell 10.8% to 10.0 Bscf in 3M 2024, from 11.2 Bscf in 3M 2023, offset by the average realised gas price, which rose by 8.0% to \$3.11/Mscf in 3M-2024, from \$2.88/Mscf in 3M 2023. The average realised gas price improvement reflects the impact of higher gas price negotiated with off-takers taking effect in the period.

Overall, Oil and Gas sales for 3M 2024 fell 45.7% to \$179.8 million, from \$331.0 million in 3M 2023.

## Gross profit

Gross profit fell 78.5% to \$42.7m, from the \$198.3m recorded in 3M 2023. Non-production costs primarily included \$50.8 million in royalties and \$41.4 million in depreciation, depletion, and amortisation (DD&A), contrasting with \$47.4 million in royalties and \$36.2 million in DD&A in the previous period.

Direct operating costs, which encompass expenses related to crude-handling charges (CHC), barging/trucking, operations and maintenance, amounted to \$42.8 million in 3M 2024, marking a 5.4% decrease from the \$45.3 million incurred in 3M 2023. This fall in direct operating costs is attributed to the lower operational and maintenance expenses in the period despite higher produced liquid volumes in 3M 2024.

Considering the cost per barrel equivalent basis, production operating expenses (opex) were \$9.6/boe in 3M 2024, compared to \$9.0/boe in 3M 2023.

## Operating profit

Operating profit decreased by 21.0% to \$81.9 million, from \$103.7 million achieved in 3M 2023. This decline in operating profit was mostly attributed to a combination of lower revenues and higher DD&A (arising from changes in the basis of computation of DD&A versus the prior period) and General and Administrative (G&A) expenses.

G&A expenses amounted to \$24.1 million, 17.2% higher than the \$20.5 million incurred in 3M 2023. The increase in G&A costs was mainly due to share-based expenses towards employee benefits relating to the Long-Term Incentive Plan (LTIP). Seplat remains committed to minimising G&A expenses and continues to implement measures to manage all costs.

During the period, we reported a non-cash foreign exchange gain of \$6.0 million (from revaluation of Naira assets & liabilities).

After adjusting for non-cash items such as impairment, fair value losses, and exchange gains, the adjusted EBITDA for the period was \$123.3 million (3M 2023: \$140.2 million), resulting in an adjusted EBITDA margin of 68.6% (3M 2023: 42.4%).

## Taxation

The income tax expense of \$71.2 million includes a current tax charge of \$13.9 million and a deferred tax charge of \$57.3 million. The significant increase in deferred tax charge for the quarter was due to both the sizable underlift position and unrealised FX gains recorded during the period, resulting in an effective tax rate of 102.8% (3M 2023: 33.2%). Changes to underlift position and exchange rates in future will continue to impact the foreign exchange differences position, and this will in turn reflect in the tax result as movements between current and deferred tax positions.

Effective tax rate analysis	Income tax expense			Tax rate	
	Current	Deferred	Total	ETR (Effective Tax Rate)	Current Tax rate
Profit before tax (\$'million)					
69.3	13.9	57.3	71.2	103%	33%

## Net result

Profit before tax declined by 19.5%, amounting to \$69.3 million, compared to \$86.1 million in 3M 2023. However, primarily due to the significant deferred taxation charge in the period, a net loss of \$1.9 million was recorded as opposed to a net profit of \$57.5 million in 3M 2023. After adjusting for deferred taxes, profit after tax totals \$55.3 million, against \$58.0 million in 3M 2023.

The profit attributable to equity holders of the parent company, representing shareholders, was \$1.0 million in 3M 2024, which resulted in basic earnings per share of \$0.002/share for the period (3M 2023: \$0.10/share).

## Cash flows from operating activities

During the period, the Company generated \$16.8 million in cash from its operations, a decrease from the \$145.0 million generated in 3M 2023. Primarily due to working capital effects, comprised of the reduction in overlift position and revaluation of Naira payables due to devaluation of the currency in the period. 2Q 2024 operating cash flow is anticipated to benefit from the normalisation of these working capital dynamics.

Net cash flow from operating activities amounted to \$14.9 million in 3M 2024, compared to \$141.7 million in 3M 2023. This figure includes lower tax payments of \$0.5 million and a higher hedging premium of \$1.4 million during the current period, while in the previous year, tax payments were \$2.1 million, and the hedging premium paid was \$1.2 million.

During the quarter, we continued to receive cash call payments from our JV partners. For OMLs 4, 38, & 41, we received a net amount of \$97.0 million towards settlement of cash call receivables on our NEPL/Seplat JV, bringing receivable balance to \$58.0 million. On Elcrest, we received \$54.0 million from NEPL towards settlement of cash call receivables, bringing the outstanding balance to \$28.0 million. Receivables outstanding from our JV partner on OML 53 as of March 2024 are \$18 million, after we received c.\$1.0 million to settle part of outstanding receivables. In April, we reached an agreement with our joint venture (JV) partner, NUIMS, which will support a normalisation of lifting operations and provides a mechanism to reduce JV receivables.

## Cash flows from investing activities

The total net cash outflow from investing activities was \$32.5 million, which decreased from the \$41.6 million recorded in 3M 2023. We received \$2.0 million in respect to the divestment from Ubima and \$10.9 million from our financial interest in OML 55.

The capital expenditure on oil & gas assets during the period was \$46.4 million, including \$37.4 million invested in drilling activities and \$8.9 million invested in engineering projects. Total capex (including other fixed assets) was \$47.1 million.

## Cash flows from financing activities

Net cash outflows from financing activities were \$67.4 million, which increased from the \$45.3 million recorded in 3M 2023.

These outflows included \$32.2 million for interest on loans and borrowings, reflecting the cost of servicing the Company's debt obligations. Additionally, a commitment fee and associated transaction cost of \$2.1 million was incurred on our credit facilities. The loan repayments of \$19.3 million represents further principal repayments on the Eland Senior RBL Facility, bringing our total repayment on the facility to \$41.3 million.

## Liquidity

The balance sheet continues to remain healthy with a solid liquidity position.

Net debt reconciliation 31 March 2024	\$ million*	Interest Rate	Maturity
Senior notes*	642.7	7.75%	April 2026
Westport RBL*	68.9	SOFR +8%	March 2026
Off-take facility*	9.6	SOFR +10.5%	April 2027

Total borrowings	721.2
Cash and cash equivalents (exclusive of restricted cash)	335.8
<b>Net debt</b>	<b>385.4</b>

\* Calculation of outstanding balances reflects financial reporting approach of fee accruals and interest treatment. The principal outstanding from a legal perspective is Senior notes \$650m, Westport RBL \$68.75m and Westport offtake facility \$11m

Seplat Energy ended 3M 2024 with gross debt of \$721.2 million (with maturities in 2026 and 2027) and cash at bank of \$335.8 million, leaving net debt at \$385.4 million. The restricted cash balance of \$30.0 million includes \$8.0 million and \$21.0 million set aside in the stamping reserve and debt service reserve accounts for the revolving credit facility.

As the Company continuously reviews its funding and maturity profile, it continues to monitor the market in ensuring that it is well positioned for any refinancing and or buy back opportunities for the current debt facilities – including potentially the \$650 million 7.75% 144A/Reg S bond maturing in 2026.

## Dividend

In line with the Company's quarterly dividend policy, the board has approved a Q1 2024 dividend of US3.0 cents per share (subject to appropriate WHT) to be paid to shareholders whose names appear in the Register of Members as at the close of business on 31 May 2024.

## Hedging

Seplat's hedging policy aims to guarantee appropriate levels of cash flow assurance in times of oil price weakness and volatility. Total volumes hedged till date in 2024 amount to 4.5 MMbbls. For Q1 2024, Seplat hedged 1.5 MMbbls of dated Brent deferred premium put options at \$65/bbl (at a cost of \$1.08/bbl); for Q2 2024, Seplat hedged 1.5 MMbbls dated Brent deferred premium put options at \$55/bbl (at a cost of \$0.86/bbl); and for Q3 2024, Seplat hedged 1.5 MMbbls dated Brent deferred premium put options at \$60/bbl (at a cost of \$0.86/bbl).

Oil put options	Q1 2024	Q2 2024	Q3 2024
Volume hedged (MMbbls)	1.5	1.5	1.5
Price hedged (\$/bbl.)	65	55	60

Additional barrels are expected to be hedged for Q4 2024, in line with the approach to target hedging two quarters in advance. The Board and management team closely monitor prevailing oil market dynamics and will consider further measures to provide appropriate levels of cash flow assurance in times of oil price weakness and volatility.

## Petroleum Industry Act (PIA) Implementation Status

Since submitting the conditional application to convert all our assets to the PIA regime in February 2023, our multidisciplinary team has been diligently preparing the Company for full compliance with the various aspects of the PIA and anchor regulations as they impact Seplat. Meanwhile, the regulator is finalising the guidelines for the conversion and has shared concession contracts with converting companies to enable a thorough review and understanding of the contractual terms and obligations that will be applicable under the new PIA regime. Key technical issues that need to be resolved include modalities around establishing decommissioning & abandonment fund, guidelines alignment on acreage delineation and retention areas, and process flow for Minimum Work Program (MWP) commitment on retaining prospecting license areas, environmental remediation and management – these all form part of the conditions precedent to conversion. The long-stop date for the fulfilment of the condition's precedent, which was extended to September 30, 2023, has expired; we expect a new date to be communicated.

## Share dealing policy

The Company confirms that, to the best of its knowledge, there has been compliance with the Company's share dealing policy during the period.

## Free float

The Company's free float on 29 March 2024 was 29%.

\*Shares purchased for employees of \$8.5 million, ₦12.7 billion (2023: nil) represent shares purchased in the open market for employees of the Group.

\*\*Other financing charges of \$2.1 million, ₦3.2 billion relate to commitment fees and other transaction costs incurred on interest bearing loans and borrowings (\$350 million Revolving Credit Facility, \$110 million Reserved Based Lending Facility, and \$50 million Junior Facility).

The above interim condensed consolidated statement of cashflows should be read in conjunction with the accompanying notes.

# Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

## 1. Corporate Structure and business

Seplat Energy Plc (formerly called Seplat Petroleum Development Company Plc, hereinafter referred to as 'Seplat' or the 'Company'), the parent of the Group, was incorporated on 17 June 2009 as a private limited liability company and re-registered as a public company on 3 October 2014, under the Companies and Allied Matters Act, CAP C20, Laws of the Federation of Nigeria 2004. The Company commenced operations on 1 August 2010. The Company is principally engaged in oil and gas exploration and production and gas processing activities. The Company's registered and domiciled address is: 16a Temple Road (Olu Holloway), Ikoyi, Lagos, Nigeria.

The Company acquired, pursuant to an agreement for assignment dated 31 January 2010 between the Company, SPDC, TOTAL and AGIP, a 45% participating interest in OML 4, OML 38 and OML 41 located in Nigeria.

On 7 November 2010, Newton Energy Limited ('Newton Energy'), an entity previously beneficially owned by the same shareholders as Seplat, became a subsidiary of the Company. On 1 June 2013, Newton Energy acquired from Pillar Oil Limited ('Pillar Oil') a 40% Participant interest in producing assets: the Umuseti/Igbuku marginal field area located within OPL 283 (the 'Umuseti/Igbuku Fields').

On 27 March 2013, the Group incorporated a subsidiary, MSP Energy Limited. The Company was incorporated for oil and gas exploration and production.

On 11 December 2013, the Group incorporated a new subsidiary, Seplat East Swamp Company Limited with the principal activity of oil and gas exploration and production.

On 11 December 2013, Seplat Gas Company Limited ('Seplat Gas') was incorporated as a private limited liability company to engage in oil and gas exploration and production and gas processing.

On 21 August 2014, the Group incorporated a new subsidiary, Seplat Energy UK Limited (formerly called Seplat Petroleum Development UK Limited). The subsidiary provides technical, liaison and administrative support services relating to oil and gas exploration activities.

In 2015, the Group purchased a 40% participating interest in OML 53, onshore northeastern Niger Delta (Seplat East Onshore Limited), from Chevron Nigeria Ltd for \$259.4 million.

On the 20 January 2017, the Group incorporated a new subsidiary, ANOH Gas Processing Company Limited. The principal activity of the Company is the processing of gas from OML 53 using the ANOH gas processing plant.

On 16 January 2018, the Group incorporated a subsidiary, Seplat West Limited ('Seplat West'). Seplat West was incorporated to manage the producing assets of Seplat Plc.

To fund the development of the ANOH gas processing plant, on 13 August 2018, the Group entered into a shareholder's agreement with Nigerian Gas Processing and Transportation Company (NGPTC). Funding is to be provided by both parties in equal proportion representing their ownership share and will be used to subscribe for the ordinary shares in ANOH. The agreement was effective on 18 April 2019, which was the date the Corporate Affairs Commission (CAC) approval was received. Given the change in ownership structure as at 31 December 2019, the Group no longer exercises control and has deconsolidated ANOH in the consolidated financial statements. However, its retained interest qualifies as a joint arrangement and has been recognised accordingly as investment in joint venture.

On 31 December 2019, Seplat Energy Plc, acquired 100% of Eland Oil and Gas Plc's issued and yet to be issued ordinary shares. Eland is an independent oil and gas company that holds interest in subsidiaries and joint ventures that are into production, development and exploration in West Africa, particularly the Niger Delta region of Nigeria.

On acquisition of Eland Oil and Gas Plc (Eland), the Group acquired indirect interest in existing subsidiaries of Eland.

Eland Oil & Gas (Nigeria) Limited, is a subsidiary acquired through the purchase of Eland and is into exploration and production of oil and gas.

Westport Oil Limited, which was also acquired through purchase of Eland is a financing company.

Elcrest Exploration and Production Company Limited (Elcrest) who became an indirect subsidiary of the Group purchased a 45 percent interest in OML 40 in 2012. Elcrest is a Joint Venture between Eland Oil and Gas (Nigeria) Limited (45%) and Starcrest Nigeria Energy Limited (55%). It has been consolidated because Eland is deemed to have power over the

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

relevant activities of Elcrest to affect variable returns from Elcrest at the date of acquisition by the Group. (See details in Note 4.1.v) The principal activity of Elcrest is exploration and production of oil and gas.

Wester Ord Oil & Gas (Nigeria) Limited, who also became an indirect subsidiary of the Group acquired a 40% stake in a licence, Ubima, in 2014 via a joint operations agreement. The principal activity of Wester Ord Oil & Gas (Nigeria) Limited is exploration and production of oil and gas.

Other entities acquired through the purchase of Eland are Tarland Oil Holdings Limited (a holding company), Brineland Petroleum Limited (dormant company) and Destination Natural Resources Limited (dormant company).

On 1 January 2020, Seplat Energy Plc transferred its 45% participating interest in OML 4, OML 38 and OML 41 ("transferred assets") to Seplat West Limited. As a result, Seplat ceased to be a party to the Joint Operating Agreement in respect of the transferred assets and became a holding company. Seplat West Limited became a party to the Joint Operating Agreement in respect of the transferred assets and assumed its rights and obligations.

On 20 May 2021, following a special resolution by the Board in view of the Company's strategy of transitioning into an energy Company promoting renewable energy, sustainability, and new energy, the name of the Company was changed from Seplat Petroleum Development Company Plc to Seplat Energy Plc under the Companies and Allied Matters Act 2020.

On 7 February 2022, the Group incorporated a subsidiary, Seplat Energy Offshore Limited. The Company was incorporated for oil and gas exploration and production.

On 5 July 2022, the Group incorporated a subsidiary, Turnkey Drilling Services Limited. The Company was incorporated for the purpose of drilling chemicals, material supply, directional drilling, drilling support services and exploration services.

On 26 April 2023, Seplat Gas Company Limited was changed to Seplat Midstream Company Limited. This subsidiary was incorporated to engage in oil and gas exploration and production and gas processing. The company is yet commence operations.

On 14 June 2023, the Group entered into a joint venture agreement with Pol Gas Limited which birthed Pine Gas Processing Limited. Both parties subscribed to equal proportion of ordinary shares. The Company was incorporated for processing natural gas, storage, marketing, transportation, trading, supply and distribution of natural gas and petroleum products derived from natural gas. The company is yet to commence operations.

The Company together with its subsidiaries as shown below are collectively referred to as the Group.

Subsidiary	Date of incorporation	Country of incorporation and place of business	Percentage holding	Principal activities	Nature of holding
Newton Energy Limited	1 June 2013	Nigeria	99.9%	Oil & gas exploration and production	Direct

## 2. Significant changes in the current reporting period

The following significant changes occurred during the reporting period ended 31 March 2024:

There are no significant changes in the business during the current reporting period ending 31 March 2024.

## 3. Summary of significant accounting policies

### 3.1 Introduction to summary of significant accounting policies

This note provides a list of the significant accounting policies adopted in the preparation of these consolidated financial statements. These accounting policies have been applied to all the periods presented, unless otherwise stated. The Consolidated financial statements are for the Group consisting of Seplat Energy Plc and its subsidiaries.

### 3.2 Basis of preparation

The consolidated financial statements of the Group for the three months ended 31 March 2024 have been prepared in accordance with International Financial Reporting Standards ("IFRS") and interpretations issued by the IFRS Interpretations Committee (IFRS IC). The financial statements comply with IFRS as issued by the International Accounting Standards Board (IASB). Additional information required by National regulations is included where appropriate.

The financial statements comprise the statement of profit or loss and other comprehensive income, the statement of financial position, the statement of changes in equity, the statement of cash flows and the notes to the financial statements.

The financial statements have been prepared under the going concern and historical cost convention, except for financial instruments measured at fair value on initial recognition, derivative financial instruments, and defined benefit plans – plan assets measured at fair value. The financial statements are presented in Nigerian Naira and United States Dollars, and all values are rounded to the nearest million (₦million) and thousand (\$'000) respectively, except when otherwise indicated.

Nothing has come to the attention of the directors to indicate that the Group will not remain a going concern for at least twelve months from the date of these financial statements.

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

The accounting policies adopted are consistent with those of the previous financial year end, except for the adoption of new and amended standard which are set out below.

### 3.3 New and amended standards adopted by the Group

The Group applied for the first-time certain standards and amendments, which are effective for annual periods beginning on or after 1 January 2024. The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

#### Amendments to IAS 1: Classification of Liabilities as Current or Non-current

In January 2020 and October 2022, the IASB issued amendments to paragraphs 69 to 76 of IAS 1 to specify the requirements for classifying liabilities as current or non-current.

- What is meant by a right to defer settlement
- That a right to defer must exist at the end of the reporting period
- That classification is unaffected by the likelihood that an entity will exercise its deferral right
- That only if an embedded derivative in a convertible liability is itself an equity instrument would the terms of a liability not impact its classification

In addition, a requirement has been introduced to require disclosure when a liability arising from a loan agreement is classified as non-current and the entity's right to defer settlement is contingent on compliance with future covenants within twelve months.

The amendments are effective for annual reporting periods beginning on or after 1 January 2024 and must be applied retrospectively. The Group is currently assessing the impact the amendments will have on current practice and whether existing loan agreements may require renegotiation.

#### Amendments to IFRS 16: Lease Liability in a Sale and Leaseback

In September 2022, the IASB issued amendments to IFRS 16 to specify the requirements that a seller-lessee uses in measuring the lease liability arising in a sale and leaseback transaction, to ensure the seller-lessee does not recognise any amount of the gain or loss that relates to the right of use it retains.

The amendments are effective for annual reporting periods beginning on or after 1 January 2024 and must be applied retrospectively to sale and leaseback transactions entered into after the date of initial application of IFRS 16. Earlier application is permitted and that fact must be disclosed.

The amendments are not expected to have a material impact on the Group's financial statements.

#### Supplier Finance Arrangements - Amendments to IAS 7 and IFRS 7

In May 2023, the IASB issued amendments to IAS 7 Statement of Cash Flows and IFRS 7 Financial Instruments: Disclosures to clarify the characteristics of supplier finance arrangements and require additional disclosure of such arrangements. The disclosure requirements in the amendments are intended to assist users of financial statements in understanding the effects of supplier finance arrangements on an entity's liabilities, cash flows and exposure to liquidity risk.

The amendments will be effective for annual reporting periods beginning on or after 1 January 2024. Early adoption is permitted, but will need to be disclosed.

The amendments are not expected to have a material impact on the Group's financial statements.

### 3.4 Standards issued but not yet effective

The new and amended standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Group's financial statements are disclosed below. The Group intends to adopt these new and amended standards and interpretations, if applicable, when they become effective. Details of these new standards and interpretations are set out below:

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

### **Amendments to IFRS 10 and IAS 28: Selection or contribution of assets between an investor or joint venture**

The IASB has made limited scope amendments to IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures.

The amendments clarify the accounting treatment for sales or contribution of assets between an investor and their associates or joint ventures. They confirm that the accounting treatment depends on whether the non-monetary assets sold or contributed to an associate or joint venture constitute a "business" (as defined in IFRS 3 Business Combinations).

Where the non-monetary assets constitute a business, the investor will recognise the full gain or loss on the sale or contribution of assets. If the assets do not meet the definition of a business, the gain or loss is recognised by the investor only to the extent of the other investor's interests in the associate or joint venture. The amendments apply prospectively.

### **3.5 Basis of consolidation**

#### **Subsidiaries**

Subsidiaries are all entities (including structured entities) over which the Group has control.

The consolidated financial information comprises the financial statements of the Company and its subsidiaries as at 31 March 2024. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee);
- Exposure, or rights, to variable returns from its involvement with the investee; and
- The ability to use its power over the investee to affect its returns.

Subsidiaries are consolidated from the date on which control is obtained by the Group and are deconsolidated from the date control ceases.

Generally, there is a presumption that a majority of voting rights results in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement(s) with the other vote holders of the investee
- Rights arising from other contractual arrangements
- The Group's voting rights and potential voting rights

#### **Change in the ownership interest of subsidiary**

The acquisition method of accounting is used to account for business combinations by the Group.

Non-controlling interests in the results and equity of subsidiaries are shown separately in the consolidated statement of profit or loss and other comprehensive income, statement of changes in equity and statement of financial position respectively.

Intercompany transaction balances and unrealized gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

#### **Disposal of subsidiary**

Where the Group disposes a subsidiary, it:

- Derecognises the assets (including goodwill) and liabilities of the subsidiary;
- Derecognises the carrying amount of any non-controlling interests;
- Derecognises the cumulative translation differences recorded in equity;

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

- Recognises the fair value of the consideration received;
- Recognises the fair value of any investment retained;
- Recognises any surplus or deficit in profit or loss; and
- Reclassifies the parent's share of components previously recognised in OCI to profit or loss or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities.

### Joint arrangements

Under IFRS 11 Joint Arrangements, investments in joint arrangements are classified as either joint operations or joint ventures. The classification depends on the contractual rights and obligations of each investor, rather than the legal structure of the joint arrangement.

Interest in the joint venture is accounted for using the equity method, after initially being recognised at cost in the consolidated statement of financial position. All other joint arrangements of the Group are joint operations.

### Associates

Associates are all entities over which the Group has significant influence but not control or joint control. This is generally the case where the group holds between 20% and 50% of the voting rights. Investment in associates is accounted for using the equity method of accounting (see (vi) below) after initially being recognised at cost.

### Equity method

Under the equity method of accounting, the Group's investments are initially recognised at cost and adjusted thereafter to recognise the Group's share of the post-acquisition profits or losses of the investee in profit or loss, and the Group's share of movements in other comprehensive income of the investee in other comprehensive income. Dividends received or receivable from associates and joint ventures are recognised as a reduction in the carrying amount of the investment.

Where the Group's share of loss in an equity accounting investment equals or exceeds its interest in the entity, including any other unsecured long-term receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the other party.

Unrealised gains on transactions between the Group and its associate and joint venture are eliminated to the extent of the Group's interest in the entities. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of equity accounted investees are changed where necessary to ensure consistency with the policies adopted by the Group.

The carrying amount of equity accounted investments is tested for impairment in accordance with the policy described in Note 3.14.

### Changes in ownership interest

The Group treats transactions with non-controlling interests that do not result in a loss of control as transactions with equity owners of the Group. A change in ownership interest results in an adjustment between the carrying amounts of the controlling and non-controlling interests to reflect their relative interests in the subsidiary. Any difference between the amount of the adjustment to non-controlling interests and any consideration paid or received is recognised in a separate reserve within equity attributable to owners of the group.

When the Group ceases to consolidate or equity account for an investment because of a loss of control, joint control or significant influence, any retained interest in the entity is remeasured to its fair value, with the change in carrying amount recognised in profit or loss. This fair value becomes the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

### Accounting for loss of control

When the Group ceases to consolidate a subsidiary because of a joint control, it does the following:

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

- deconsolidates the assets (including goodwill), liabilities and non-controlling interest (including attributable other comprehensive income) of the former subsidiary from the consolidated financial position.
- any retained interest (including amounts owed by and to the former subsidiary) in the entity is remeasured to its fair value, with the change in carrying amount recognised in profit or loss. This fair value becomes the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate or a joint venture.
- any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss or transferred directly to retained earnings if required by other IFRSs.
- the resulting gain or loss, on loss of control, is recognised together with the profit or loss from the discontinued operation for the period before the loss of control.
- the gain or loss on disposal will comprise of the gain or loss attributable to the portion disposed of and the gain or loss on remeasurement of the portion retained. The latter is disclosed separately in the notes to the financial statements.

If the ownership interest in a joint venture is reduced but joint control or significant influence is retained, only a proportionate share of the amounts previously recognized in other comprehensive income is reclassified to profit or loss where appropriate.

### Non-controlling interests

The Group recognises non-controlling interests in an acquired entity either at fair value or at the noncontrolling interest's proportionate share of the acquired entity's net identifiable assets. This decision is made on an acquisition-by-acquisition basis.

### Goodwill

Goodwill on acquisitions of subsidiaries is included in intangible assets. Goodwill is not amortised, but it is tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired and is carried at cost less accumulated impairment losses. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold. Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose.

### 3.6 Functional and presentation currency

Items included in the financial statements of each of the Group's subsidiaries are measured using the currency of the primary economic environment in which the subsidiaries operate ('the functional currency'), which is the US dollar except the UK subsidiary which is the Great Britain Pound. The consolidated financial statements are presented in Nigerian Naira and the US Dollars.

The Group has chosen to show both presentation currencies and this is allowable by the regulator.

### Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end are generally recognised in profit or loss. They are deferred in equity if attributable to net investment in foreign operations.

Foreign exchange gains and losses that relate to borrowings are presented in the statement of profit or loss, within finance costs. All other foreign exchange gains and losses are presented in the statement of profit or loss on a net basis within other income or other expenses.

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss or other comprehensive income depending on where fair value gain or loss is reported.

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

### Group companies

The results and financial position of foreign operations that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- assets and liabilities for each statement of financial position presented are translated at the closing rate at the date of the reporting date.
- income and expenses for statement of profit or loss and other comprehensive income are translated at average exchange rates (unless this is not - a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions), and all resulting exchange differences are recognised in other comprehensive income.

On disposal of a foreign operation, the component of other comprehensive income relating to that particular foreign operation is recognised in profit or loss. Goodwill and fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the closing rate.

### 3.7 Oil and gas accounting

#### Pre-licensing costs

Pre-license costs are expensed in the period in which they are incurred.

#### Exploration license cost

Exploration license costs are capitalised within intangible assets. License costs paid in connection with a right to explore in an existing exploration area are capitalised and amortised on a straight-line basis over the life.

License costs are reviewed at each reporting date to confirm that there is no indication that the carrying amount exceeds the recoverable amount. This review includes confirming that exploration drilling is still under way or firmly planned, or that it has been determined, or work is under way to determine that the discovery is economically viable based on a range of technical and commercial considerations and sufficient progress is being made to establish development plans and timing. If no future activity is planned or the license has been relinquished or has expired, the carrying value of the license is written off through profit or loss. The exploration license costs are initially recognised at cost and subsequently amortised on a straight line based on the economic life. They are subsequently carried at cost less accumulated amortisation and impairment losses.

#### Acquisition of producing assets

Upon acquisition of producing assets which do not constitute a business combination, the Group identifies and recognises the individual identifiable assets acquired (including those assets that meet the definition of, and recognition criteria for, intangible assets in IAS 38 Intangible Assets) and liabilities assumed. The purchase price paid for the group of assets is allocated to the individual identifiable assets and liabilities on the basis of their relative fair values at the date of purchase.

#### Exploration and evaluation expenditures

Geological and geophysical exploration costs are charged to profit or loss as incurred.

Exploration and evaluation expenditures incurred by the entity are accumulated separately for each area of interest. Such expenditures comprise net direct costs and an appropriate portion of related overhead expenditure, but do not include general overheads or administrative expenditure that is not directly related to a particular area of interest. Each area of interest is limited to a size related to a known or probable hydrocarbon resource capable of supporting an oil operation.

Costs directly associated with an exploration well, exploratory stratigraphic test well and delineation wells are temporarily suspended (capitalised) until the drilling of the well is complete and the results have been evaluated. These costs include employee remuneration, materials and fuel used, rig costs, delay rentals and payments made to contractors. If hydrocarbons ('proved reserves') are not found, the exploration expenditure is written off as a dry hole and charged to profit or loss. If hydrocarbons are found, the costs continue to be capitalised.

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

Suspended exploration and evaluation expenditure in relation to each area of interest is carried forward as an asset provided that one of the following conditions is met:

- the costs are expected to be recouped through successful development and exploitation of the area of interest or alternatively, by its sale;
- exploration and/or evaluation activities in the area of interest have not, at the reporting date, reached a stage which permits a reasonable assessment of the existence or otherwise of economically recoverable reserves; and
- active and significant operations in, or in relation to, the area of interest.

Exploration and/or evaluation expenditures which fail to meet at least one of the conditions outlined above are written off. In the event that an area is subsequently abandoned or exploration activities do not lead to the discovery of proved or probable reserves, or if the Directors consider the expenditure to be of no value, any accumulated costs carried forward relating to the specified areas of interest are written off in the year in which the decision is made. While an area of interest is in the development phase, amortisation of development costs is not charged pending the commencement of production. Exploration and evaluation costs are transferred from the exploration and/or evaluation phase to the development phase upon commitment to a commercial development.

### Development expenditures

Development expenditure incurred by the Group is accumulated separately for each area of interest in which economically recoverable reserves have been identified to the satisfaction of the Directors. Such expenditure comprises net direct costs and, in the same manner as for exploration and evaluation expenditure, an appropriate portion of related overhead expenditure directly related to the development property. All expenditure incurred prior to the commencement of commercial levels of production from each development property is carried forward to the extent to which recoupment is expected to be derived from the sale of production from the relevant development property.

### 3.8 Revenue recognition (IFRS 15)

IFRS 15 uses a five-step model for recognising revenue to depict transfer of goods or services. The model distinguishes between promises to a customer that are satisfied at a point in time and those that are satisfied over time.

It is the Group's policy to recognise revenue from a contract when it has been approved by both parties, rights have been clearly identified, payment terms have been defined, the contract has commercial substance, and collectability has been ascertained as probable. Collectability of customer's payments is ascertained based on the customer's historical records, guarantees provided, the customer's industry and advance payments made if any.

Revenue is recognised when control of goods sold has been transferred. Control of an asset refers to the ability to direct the use of and obtain substantially all of the remaining benefits (potential cash inflows or savings in cash outflows) associated with the asset. For crude oil, this occurs when the crude products are lifted by the customer (buyer) Free on Board at the Group's loading facility. Revenue from the sale of oil is recognised at a point in time when performance obligation is satisfied. For gas sales, revenue is recognised when the product passes through the custody transfer point to the customer. Revenue from the sale of gas is recognised over time using the practical expedient of the right to invoice.

The surplus or deficit of the product sold during the period over the Group's share of production is termed as an overlift or underlift. With regard to underlifts, if the over-lifter does not meet the definition of a customer or the settlement of the transaction is non-monetary, a receivable and other income is recognised. Initially, when an overlift occurs, cost of sale is debited, and a corresponding liability is accrued. Overlifts and underlifts are initially measured at the market price of oil at the date of lifting, consistent with the measurement of the sale and purchase. Subsequently, they are remeasured at the current market value. The change arising from this remeasurement is included in the profit or loss as other income/expenses-net.

### Definition of a customer

A customer is a party that has contracted with the Group to obtain crude oil or gas products in exchange for a consideration, rather than to share in the risks and benefits that result from sale. The Group has entered into collaborative arrangements with its Joint arrangement partners to share in the production of oil. Collaborative arrangements with its Joint arrangement partners to share in the production of oil are accounted for differently from arrangements with customers as collaborators

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

share in the risks and benefits of the transaction, and therefore, do not meet the definition of customers. Revenue arising from these arrangements are recognised separately in other income.

### Contract enforceability and termination clauses

It is the Group's policy to assess that the defined criteria for establishing contracts that entail enforceable rights and obligations are met. The criteria provide that the contract has been approved by both parties, rights have been clearly identified, payment terms have been defined, the contract has commercial substance, and collectability has been ascertained as probable. Revenue is not recognised for contracts that do not create enforceable rights and obligations to parties in a contract. The Group also does not recognise revenue for contracts that do not meet the revenue recognition criteria. In such cases where consideration is received it recognises a contract liability and only recognises revenue when the contract is terminated.

The Group may also have the unilateral rights to terminate an unperformed contract without compensating the other party. This could occur where the Group has not yet transferred any promised goods or services to the customer and the Group has not yet received, and is not yet entitled to receive, any consideration in exchange for promised goods or services.

### Identification of performance obligation

At inception, the Group assesses the goods or services promised in the contract with a customer to identify as a performance obligation, each promise to transfer to the customer either a distinct good or series of distinct goods. The number of identified performance obligations in a contract will depend on the number of promises made to the customer. The delivery of barrels of crude oil or units of gas are usually the only performance obligation included in oil and gas contract with no additional contractual promises. Additional performance obligations may arise from future contracts with the Group and its customers.

The identification of performance obligations is a crucial part in determining the amount of consideration recognised as revenue. This is due to the fact that revenue is only recognised at the point where the performance obligation is fulfilled. Management has therefore developed adequate measures to ensure that all contractual promises are appropriately considered and accounted for accordingly.

Transaction price is the amount allocated to the performance obligations identified in the contract. It represents the amount of revenue recognised as those performance obligations are satisfied. Complexities may arise where a contract includes variable consideration, significant financing component or consideration payable to a customer.

Variable consideration not within the Group's control is estimated at the point of revenue recognition and reassessed periodically. The estimated amount is included in the transaction price to the extent that it is highly probable that a significant reversal of the amount of cumulative revenue recognised will not occur when the uncertainty associated with the variable consideration is subsequently resolved. As a practical expedient, where the Group has a right to consideration from a customer in an amount that corresponds directly with the value to the customer of the Group's performance completed to date, the Group may recognise revenue in the amount to which it has a right to invoice.

Significant financing component (SFC) assessment is carried out (using a discount rate that reflects the amount charged in a separate financing transaction with the customer and also considering the Group's incremental borrowing rate) on contracts that have a repayment period of more than 12 months.

As a practical expedient, the Group does not adjust the promised amount of consideration for the effects of a significant financing component if it expects, at contract inception, that the period between when it transfers a promised good or service to a customer and when the customer pays for that good or service will be one year or less.

Instances when SFC assessment may be carried out include where the Group receives advance payment for agreed volumes of crude oil or receives take or pay deficiency payment on gas sales. Take or pay gas sales contract ideally provides that the customer must sometimes pay for gas even when not delivered to the customer. The customer, in future contract years, takes delivery of the product without further payment. The portion of advance payments that represents significant financing component will be recognised as interest expense.

Consideration payable to a customer is accounted for as a reduction of the transaction price unless the payment to the customer is in exchange for a distinct goods or services that the customer transfers to the Group.

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

### Breakage

The Group enters into take or pay contracts for sale of gas where the buyer may not ultimately exercise all of their rights to the gas. The take or pay quantity not taken is paid for by buyer called take or pay deficiency payment. The Group assesses if there is a reasonable assurance that it will be entitled to a breakage amount. Where it establishes that a reasonable assurance exists, it recognises the expected breakage amount as revenue in proportion to the pattern of rights exercised by the customer. However, where the Group is not reasonably assured of a breakage amount, it would only recognise the expected breakage amount as revenue when the likelihood of the customer exercising its remaining rights becomes remote.

### Contract modification and contract combination

Contract modifications relate to a change in the price and/or scope of an approved contract. Where there is a contract modification, the Group assesses if the modification will create a new contract or change the existing enforceable rights and obligations of the parties to the original contract. Contract modifications are treated as new contracts when the performance obligations are separately identifiable and transaction price reflects the standalone selling price of the crude oil or the gas to be sold. Revenue is adjusted prospectively when the crude oil or gas transferred is separately identifiable and the price does not reflect the standalone selling price. Conversely, if there are remaining performance obligations which are not separately identifiable, revenue will be recognised on a cumulative catch-up basis when crude oil or gas is transferred.

The Group combines contracts entered into at near the same time (less than 12 months) as one contract if they are entered into with the same or related party customer, the performance obligations are the same for the contracts and the price of one contract depends on the other contract.

### Portfolio expedients

As a practical expedient, the Group may apply the requirements of IFRS 15 to a portfolio of contracts (or performance obligations) with similar characteristics if it expects that the effect on the financial statements would not be materially different from applying IFRS to individual contracts within that portfolio.

### Contract assets and liabilities

The Group recognises contract assets for unbilled revenue from crude oil and gas sales. The Group recognises contract liability for consideration received for which performance obligation has not been met.

### Disaggregation of revenue from contract with customers

The Group derives revenue from two types of products, oil and gas. The Group has determined that the disaggregation of revenue based on the criteria of type of products meets the disaggregation of revenue disclosure requirement of IFRS 15. It depicts how the nature, amount, timing and uncertainty of revenue and cash flows are affected by economic factors. See further details in note 6.1.1.

## 3.9 Property, plant and equipment

Oil and gas properties and other plant and equipment are stated at cost, less accumulated depreciation, and accumulated impairment losses.

The initial cost of an asset comprises its purchase price or construction cost, any costs directly attributable to bringing the asset into operation, the initial estimate of any decommissioning obligation and, for qualifying assets, borrowing costs. The purchase price or construction cost is the aggregate amount paid and the fair value of any other consideration given to acquire the asset. Where parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items of property, plant and equipment.

Expenditure on major maintenance refits or repairs comprises the cost of replacement assets or parts of assets, inspection costs and overhaul costs. Where an asset or part of an asset that was separately depreciated and is now written off is replaced and it is probable that future economic benefits associated with the item will flow to the entity, the expenditure is

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

capitalised. Inspection costs associated with major maintenance programmes are capitalised and amortised over the period to the next inspection. Overhaul costs for major maintenance programmes are capitalised as incurred as long as these costs increase the efficiency of the unit or extend the useful life of the asset. All other maintenance costs are expensed as incurred.

### Depreciation

Production and field facilities are depreciated on a unit-of-production basis over the estimated proved developed reserves. Management applies judgment based on current information to avoid front loading or over depreciation of the reserves. The computation of the depletion rate factors the estimate for future development cost for the proved undeveloped reserves. Gas plant is depreciated on a straight-line basis over its useful lives. Assets under construction are not depreciated. Other property, plant and equipment are depreciated on a straight-line basis over their estimated useful lives. Depreciation commences when an asset is available for use. The depreciation rate for each class is as follows:

Plant and machinery	10% - 20%
Gas plant	4%
Motor vehicles	25%-30%
Office furniture and IT equipment	10%-33.33%
Buildings	4%
Land	-
Leasehold improvements	Over the unexpired portion of the lease

The expected useful lives and residual values of property, plant and equipment are reviewed on an annual basis and, if necessary, changes in useful lives are accounted for prospectively.

Gains or losses on disposal of property, plant and equipment are determined as the difference between disposal proceeds and carrying amount of the disposed assets. These gains or losses are included in the statement of profit or loss.

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal (i.e., at the date the recipient obtains control) or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit or loss when the asset is derecognised.

### 3.10 Right-of-use assets

The Group recognises right-of-use assets at the commencement date of a lease (i.e. the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets include the amount of lease liabilities recognised, initial direct costs incurred, decommissioning costs (if any), and lease payments made at or before the commencement date less any lease incentives received. Unless the Group is reasonably certain to obtain ownership of the leased asset at the end of the lease term, the recognised right-of-use assets are depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term. Right-of-use assets are subject to impairment.

### Short-term leases and leases of low value

The Group applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered of low value (i.e. low value assets). Low-value assets are assets with lease amount of less than \$5,000 when new. Lease payments on short-term leases and leases of low-value assets are recognised as an expense on a straight-line basis over the lease term.

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

### 3.11 Lease liabilities

At the commencement date of a lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating a lease, if the lease term reflects the Group exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as an expense in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable. The weighted average incremental borrowing rate for the Group is 7.56%. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the in-substance fixed lease payments or a change in the assessment to purchase the underlying asset. The lease term refers to the contractual period of a lease.

The Group has elected to exclude non-lease components in calculating lease liabilities and instead treat the related costs as an expense in the statement of profit or loss.

### 3.12 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Borrowing costs consist of interest and other costs incurred in connection with the borrowing of funds. These costs may arise from; specific borrowings used for the purpose of financing the construction of a qualifying asset, and those that arise from general borrowings that would have been avoided if the expenditure on the qualifying asset had not been made. The general borrowing costs attributable to an asset's construction is calculated by reference to the weighted average cost of general borrowings that are outstanding during the period.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on the qualifying assets is deducted from the borrowing costs eligible for capitalisation. All other borrowing costs are recognised in the statement of profit or loss in the period in which they are incurred.

### 3.13 Finance income and costs

#### Finance income

Finance income is recognised in the statement of profit or loss as it accrues using the effective interest rate (EIR), which is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the amortised cost of the financial instrument. The determination of finance income takes into account all contractual terms of the financial instrument as well as any fees or incremental costs that are directly attributable to the instrument and are an integral part of the effective interest rate (EIR), but not future credit losses.

#### Finance cost

Finance costs includes borrowing costs, interest expense calculated using the effective interest rate method, finance charges in respect of lease liabilities, the unwinding of the effect of discounting provisions, and the amortisation of discounts and premiums on debt instruments that are liabilities.

The Group applies the IBOR reform Phase 2 amendments which allows as a practical expedient for changes to the basis for determining contractual cash flows to be treated as changes to a floating rate of interest, provided certain conditions are met. The conditions include that the change is necessary as a direct consequence of IBOR reform and that the transition takes place on an economically equivalent basis.

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

### 3.14 Impairment of non-financial assets

Goodwill and intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment, or more frequently. Other non-financial assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Individual assets are grouped for impairment assessment purposes at the lowest level at which there are identifiable cash flows that are largely independent of the cash flows of other groups of assets. This should be at a level not higher than an operating segment.

If any such indication of impairment exists or when annual impairment testing for an asset group is required, the entity makes an estimate of its recoverable amount. Such indicators include changes in the Group's business plans, changes in commodity prices, evidence of physical damage and, for oil and gas properties, significant downward revisions of estimated recoverable volumes or increases in estimated future development expenditure.

The recoverable amount is the higher of an asset's fair value less costs of disposal ('FVLCD') and value in use ('VIU'). The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets, in which case, the asset is tested as part of a larger cash generating unit to which it belongs. Where the carrying amount of an asset group exceeds its recoverable amount, the asset group is considered impaired and is written down to its recoverable amount.

Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

In calculating VIU, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset/CGU. In determining FVLCD, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

#### Impairment – exploration and evaluation assets

Exploration and evaluation assets are tested for impairment once commercial reserves are found before they are transferred to oil and gas assets, or whenever facts and circumstances indicate impairment. An impairment loss is recognised for the amount by which the exploration and evaluation assets' carrying amount exceeds their recoverable amount. The recoverable amount is the higher of the exploration and evaluation assets' fair value less costs to sell and their value in use.

#### Impairment – proved oil and gas production properties

Proven oil and gas properties are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows.

### 3.15 Cash and cash equivalents

Cash and cash equivalents in the statement of cash flows comprise cash at banks and at hand and short-term deposits with an original maturity of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value.

### 3.16 Inventories

Inventories represent the value of tubulars, casings, spares and wellheads. These are stated at the lower of cost and net realisable value. Cost is determined using the invoice value and all other directly attributable costs to bringing the inventory to the point of use determined on a first in first out basis. Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated cost necessary to make the sale.

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

### 3.17 Other asset

The Group's interest in the oil and gas reserves of OML 55 has been classified as other asset. On initial recognition, it is measured at the fair value of future recoverable oil and gas reserves. Subsequently, the other asset is recognised at fair value through profit or loss.

### 3.18 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker.

The Board of directors has appointed a steering committee which assesses the financial performance and position of the Group and makes strategic decisions. The steering committee, which has been identified as the chief operating decision maker, consists of the Chief Financial Officer, the Vice President (Finance), the Director (New Energy) and the Financial Reporting Manager. See further details in Note 6.

### 3.19 Financial instruments

IFRS 9 provides guidance on the recognition, classification and measurement of financial assets and financial liabilities; derecognition of financial instruments; impairment of financial assets and hedge accounting. IFRS 9 also significantly amends other standards dealing with financial instruments such as IFRS 7 Financial Instruments: Disclosures.

#### Classification and measurement

##### Financial Assets

It is the Group's policy to initially recognise financial asset at fair value plus transaction costs, except in the case of financial assets recorded at fair value through profit or loss which are expensed in profit or loss.

Classification and subsequent measurement are dependent on the Group's business model for managing the asset and the cash flow characteristics of the asset. On this basis, the Group may classify its financial instruments at amortised cost, fair value through profit or loss and at fair value through other comprehensive income.

All the Group's financial assets as at 31 March 2024 satisfy the conditions for classification at amortised cost under IFRS 9 except for derivatives which are classified at fair value through profit or loss.

The Group's financial assets include trade receivables, NEPL receivables, NNPC receivables, other receivables, cash and bank balances and derivatives. They are included in current assets, except for maturities greater than 12 months after the reporting date. Interest income from these assets is included in finance income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in finance income/cost.

##### Financial liabilities

Financial liabilities of the Group are classified and measured at fair value on initial recognition and subsequently at amortised cost net of directly attributable transaction costs, except for derivatives which are classified and subsequently recognised at fair value through profit or loss.

Fair value gains or losses for financial liabilities designated at fair value through profit or loss are accounted for in profit or loss except for the amount of change that is attributable to changes in the Group's own credit risk which is presented in other comprehensive income. The remaining amount of change in the fair value of the liability is presented in profit or loss. The Group's financial liabilities include trade and other payables and interest-bearing loans and borrowings.

##### Impairment of financial assets

Recognition of impairment provisions under IFRS 9 is based on the expected credit loss (ECL) model. The ECL model is applicable to financial assets classified at amortised cost and contract assets under IFRS 15: Revenue from Contracts with Customers. The measurement of ECL reflects an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes, time value of money and reasonable and supportable information that is available without undue cost or effort at the reporting date, about past events, current conditions and forecasts of future economic conditions.

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

The Group applies the simplified approach or the three-stage general approach to determine impairment of receivables depending on their respective nature. The simplified approach is applied for trade receivables and contract assets while the general approach is applied to NEPL receivables, NNPC receivables, other receivables and cash and bank balances.

The simplified approach requires expected lifetime losses to be recognised from initial recognition of the receivables. This involves determining the expected loss rates using a provision matrix that is based on the Group's historical default rates observed over the expected life of the receivable and adjusted forward-looking estimates. This is then applied to the gross carrying amount of the receivable to arrive at the loss allowance for the period.

The three-stage approach assesses impairment based on changes in credit risk since initial recognition using the past due criterion and other qualitative indicators such as increase in political concerns or other macroeconomic factors and the risk of legal action, sanction or other regulatory penalties that may impair future financial performance.

Financial assets classified as stage 1 have their ECL measured as a proportion of their lifetime ECL that results from possible default events that can occur within one year, while assets in stage 2 or 3 have their ECL measured on a lifetime basis.

Under the three-stage approach, the ECL is determined by projecting the probability of default (PD), loss given default (LGD) and exposure at default (EAD) for each ageing bucket and for each individual exposure. The PD is based on default rates determined by external rating agencies for the counterparties. The LGD is determined based on management's estimate of expected cash recoveries after considering the historical pattern of the receivable, and it assesses the portion of the outstanding receivable that is deemed to be irrecoverable at the reporting period. The EAD is the total amount of outstanding receivable at the reporting period. These three components are multiplied together and adjusted for forward looking information, such as the gross domestic product (GDP) in Nigeria and crude oil prices, to arrive at an ECL which is then discounted back to the reporting date and summed. The discount rate used in the ECL calculation is the original effective interest rate or an approximation thereof.

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the related financial assets and the amount of the loss is recognised in profit or loss.

### Significant increase in credit risk and default definition

The Group assesses the credit risk of its financial assets based on the information obtained during periodic review of publicly available information, industry trends and payment records. Based on the analysis of the information provided, the Group identifies the assets that require close monitoring.

Furthermore, financial assets that have been identified to be more than 30 days past due on contractual payments are assessed to have experienced significant increase in credit risk. These assets are grouped as part of Stage 2 financial assets where the three-stage approach is applied.

In line with the Group's credit risk management practices, a financial asset is defined to be in default when contractual payments have not been received at least 90 days after the contractual payment period. Subsequent to default, the Group carries out active recovery strategies to recover all outstanding payments due on receivables. Where the Group determines that there are no realistic prospects of recovery, the financial asset and any related loss allowance is written off either partially or in full.

### Write off policy

The Group writes off financial assets, in whole or in part, when it has exhausted all practical recovery efforts and has concluded that there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include;

- ceasing enforcement activity and;
- where the Group's recovery method is foreclosing on collateral and the value of the collateral is such that there is no reasonable expectation of recovering in full.

The Group may write - off financial assets that are still subject to enforcement activity. The outstanding contractual amounts of such assets written off during the three months ended 31 March 2024 was nil (2023: nil).

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

The Group seeks to recover amounts it legally owed in full, but which have been partially written off due to no reasonable expectation of full recovery.

### Derecognition

#### Financial assets

The Group derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or when it transfers the financial asset and the transfer qualifies for derecognition. Gains or losses on derecognition of financial assets are recognised as finance income/cost.

#### Financial liabilities

The Group derecognises a financial liability when it is extinguished i.e. when the obligation specified in the contract is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised immediately in the statement of profit or loss.

In the context of IBOR reform, the Group's assessment of whether a change to an amortised cost financial instrument is substantial, is made after applying the practical expedient introduced by IBOR reform Phase 2. This requires the transition from an IBOR to an RFR to be treated as a change to a floating interest rate, as described in Note 3.13 above.

### Modification

When the contractual cash flows of a financial instrument are renegotiated or otherwise modified and the renegotiation or modification does not result in the derecognition of that financial instrument, the Group recalculates the gross carrying amount of the financial instrument and recognises a modification gain or loss immediately within finance income/(cost)-net at the date of the modification. The gross carrying amount of the financial instrument is recalculated as the present value of the renegotiated or modified contractual cash flows that are discounted at the financial instrument's original effective interest rate.

### Offsetting of financial assets and financial liabilities

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when and only when there is legally enforceable right to offset the recognised amount, and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

The legally enforceable right is not contingent on future events and is enforceable in the normal course of business, and in the event of default, insolvency or bankruptcy of the Company or the counterparty.

### Derivatives

The Group uses derivative financial instruments such as forward exchange contracts to hedge its foreign exchange risks as well as put options to hedge against its oil price risk. However, such contracts are not accounted for as designated hedges. Derivatives are initially recognised at fair value on the date a derivative contract is entered and subsequently remeasured to their fair value at the end of each reporting period. Any gains or losses arising from changes in the fair value of derivatives are recognised within operating profit in the statement of profit or loss for the period. An analysis of the fair value of derivatives is provided in Note 5, Financial risk Management.

The Group accounts for financial assets with embedded derivatives (hybrid instruments) in their entirety on the basis of its contractual cash flow features and the business model within which they are held, thereby eliminating the complexity of bifurcation for financial assets. For financial liabilities, hybrid instruments are bifurcated into hosts and embedded features. In these cases, the Group measures the host contract at amortised cost and the embedded features is measured at fair value through profit or loss.

For the purpose of the maturity analysis, embedded derivatives included in hybrid financial instruments are not separated. The hybrid instrument, in its entirety, is included in the maturity analysis for non-derivative financial liabilities.

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

### Fair value of financial instruments

The Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When available, the Group measures the fair value of an instrument using quoted prices in an active market for that instrument. A market is regarded as active if quoted prices are readily available and represent actual and regularly occurring market transactions on an arm's length basis.

If a market for a financial instrument is not active, the Group establishes fair value using valuation techniques. Valuation techniques include using recent arm's length transactions between knowledgeable, willing parties (if available), reference to the current fair value of other instruments that are substantially the same, and discounted cash flow analysis. The chosen valuation technique makes maximum use of market inputs, relies as little as possible on estimates specific to the Group, incorporates all factors that market participants would consider in setting a price, and is consistent with accepted economic methodologies for pricing financial instruments.

Inputs to valuation techniques reasonably represent market expectations and measure the risk-return factors inherent in the financial instrument. The Group calibrates valuation techniques and tests them for validity using prices from observable current market transactions in the same instrument or based on other available observable market data.

The best evidence of the fair value of a financial instrument at initial recognition is the transaction price – i.e., the fair value of the consideration given or received. However, in some cases, the fair value of a financial instrument on initial recognition may be different to its transaction price. If such fair value is evidenced by comparison with other observable current market transactions in the same instrument (without modification or repackaging) or based on a valuation technique whose variables include only data from observable markets, then the difference is recognised in the income statement on initial recognition of the instrument. In other cases, the difference is not recognised in the income statement immediately but is recognised over the life of the instrument on an appropriate basis or when the instrument is redeemed, transferred, or sold, or the fair value becomes observable.

### 3.20 Share capital

On issue of ordinary shares, any consideration received net of any directly attributable transaction costs is included in equity. Issued share capital has been translated at the exchange rate prevailing at the date of the transaction and is not retranslated after initial recognition.

### 3.21 Earnings per share and dividends

#### Basic EPS

Basic earnings per share is calculated on the Group's profit or loss after taxation attributable to the parent entity and on the basis of weighted average of issued and fully paid ordinary shares at the end of the year.

#### Diluted EPS

Diluted EPS is calculated by dividing the profit or loss after taxation attributable to the parent entity by the weighted average number of ordinary shares outstanding during the year plus the weighted average number of ordinary shares that would be issued on conversion of all the dilutive potential ordinary shares (after adjusting for outstanding share awards arising from the share-based payment scheme) into ordinary shares.

#### Dividends

Dividends on ordinary shares are recognised as a liability in the period in which they are approved.

### 3.22 Post-employment benefits

#### Defined contribution scheme

The Group contributes to a defined contribution scheme for its employees in compliance with the provisions of the Pension Reform Act 2014. The scheme is fully funded and is managed by licensed Pension Fund Administrators. Membership of

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

the scheme is automatic upon commencement of duties at the Group. The Group's contributions to the defined contribution scheme are charged to the statement of profit and loss account in the year to which they relate.

The employer contributes 17% while the employee contributes 3% of the qualifying employee's salary.

Employee benefits are all forms of consideration given by an entity in exchange for service rendered by employees or for the termination of employment. The Group operates a defined contribution plan and it is accounted for based on IAS 19 Employee benefits.

Defined contribution plans are post-employment benefit plans under which an entity pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods. Under defined contribution plans the entity's legal or constructive obligation is limited to the amount that it agrees to contribute to the fund.

Thus, the amount of the post-employment benefits received by the employee is determined by the amount of contributions paid by an entity (and perhaps also the employee) to a post-employment benefit plan or to an insurance company, together with investment returns arising from the contributions. In consequence, actuarial risk (that benefits will be less than expected) and investment risk (that assets invested will be insufficient to meet expected benefits) fall, in substance, on the employee.

### Defined benefit scheme

The Group operates a defined benefit gratuity plan, which requires contributions to be made to a separately administered fund. The Group also provides certain additional post-employment benefits to employees. These benefits are unfunded.

The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method and calculated annually by independent actuaries. The liability or asset recognised in the statement of financial position in respect of the defined benefit plan is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets (if any). The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using government bonds.

Remeasurements gains and losses, arising from changes in financial and demographic assumptions and experience adjustments, are recognised immediately in the statement of financial position with a corresponding debit or credit to retained earnings through other comprehensive income in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods.

Past service costs are recognised in profit or loss on the earlier of:

- The date of the plan amendment or curtailment; and
- The date that the Group recognises related restructuring costs.

Net interest is calculated by applying the discount rate to the net defined benefit obligation and the fair value of the plan assets.

The Group recognises the following changes in the net defined benefit obligation under employee benefit expenses in general and administrative expenses:

- Service costs comprises current service costs, past-service costs, gains and losses on curtailments and non-routine settlements.
- Net interest cost

### 3.23 Provisions

Provisions are recognised when

- the Group has a present legal or constructive obligation as a result of past events;
- it is probable that an outflow of economic resources will be required to settle the obligation as a whole; and
- the amount can be reliably estimated.

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

Provisions are not recognised for future operating losses. In measuring the provision:

- risks and uncertainties are taken into account;
- the provisions are discounted (where the effects of the time value of money is considered to be material) using a pre-tax rate that is reflective of current market assessments of the time value of money and the risk specific to the liability;
- when discounting is used, the increase of the provision over time is recognised as interest expense;
- future events such as changes in law and technology, are taken into account where there is subjective audit evidence that they will occur; and
- gains from expected disposal of assets are not taken into account, even if the expected disposal is closely linked to the event giving rise to the provision.

### Decommissioning

Liabilities for decommissioning costs are recognised as a result of the constructive obligation of past practice in the oil and gas industry, when it is probable that an outflow of economic resources will be required to settle the liability and a reliable estimate can be made. The estimated costs, based on current requirements, technology, and price levels, prevailing at the reporting date, are computed based on the latest assumptions as to the scope and method of abandonment.

Provisions are measured at the present value of management's best estimates of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as a finance cost. The corresponding amount is capitalised as part of the oil and gas properties and is amortised on a unit-of-production basis as part of the depreciation, depletion and amortisation.

If the change in estimate results in an increase in the decommissioning provision and, therefore, an addition to the carrying value of the asset, the Group considers whether this is an indication of impairment of the asset as a whole, and if so, tests for impairment in accordance with IAS 36. If, for mature fields, the revised oil and gas assets net of decommissioning provisions exceed the recoverable value, that portion of the increase is charged directly to expense.

### 3.24 Contingencies

A contingent asset or contingent liability is a possible asset or obligation that arises from past events and whose existence will be confirmed by the occurrence or non-occurrence of uncertain future events. The assessment of the existence of the contingencies will involve management judgement regarding the outcome of future events.

### 3.25 Income taxation

#### Current income tax

The income tax expense or credit for the period is the tax payable on the current period's taxable income, based on the applicable income tax rate for each jurisdiction, adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses. The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in the countries where the company and its subsidiaries and associates operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions, where appropriate, on the basis of amounts expected to be paid to the tax authorities.

#### Deferred tax

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that, at the time of the transaction, affects neither accounting nor taxable profit or loss.

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax liabilities and assets are not recognised for temporary differences between the carrying amount and tax bases of investments in foreign operations where the company is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Current and deferred tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

### Uncertainty over income tax treatments

The Group examines where there is an uncertainty regarding the treatment of an item, including taxable profit or loss, the tax bases of assets and liabilities, tax losses and credits and tax rates. It considers each uncertain tax treatment separately or together as a group, depending on which approach better predicts the resolution of the uncertainty. The factors it considers include:

- how it prepares and supports the tax treatment; and
- the approach that it expects the tax authority to take during an examination.

If the Group concludes that it is probable that the tax authority will accept an uncertain tax treatment that has been taken or is expected to be taken on a tax return, it determines the accounting for income taxes consistently with that tax treatment. If it concludes that it is not probable that the treatment will be accepted, it reflects the effect of the uncertainty in its income tax accounting in the period in which that determination is made (for example, by recognising an additional tax liability or applying a higher tax rate).

The Group measures the impact of the uncertainty using methods that best predicts the resolution of the uncertainty. The Group uses the most likely method where there are two possible outcomes, and the expected value method when there are a range of possible outcomes.

The Group assumes that the tax authority with the right to examine and challenge tax treatments will examine those treatments and have full knowledge of all related information. As a result, it does not consider detection risk in the recognition and measurement of uncertain tax treatments. The Group applies consistent judgements and estimates on current and deferred taxes. Changes in tax laws or the presence of new tax information by the tax authority is treated as a change in estimate in line with IAS 8 - Accounting policies, changes in accounting estimates and errors.

Judgements and estimates made to recognise and measure the effect of uncertain tax treatments are reassessed whenever circumstances change or when there is new information that affects those judgements. New information might include actions by the tax authority, evidence that the tax authority has taken a particular position in connection with a similar item, or the expiry of the tax authority's right to examine a particular tax treatment. The absence of any comment from the tax authority is unlikely to be, in isolation, a change in circumstances or new information that would lead to a change in estimate.

### 3.26 Business combinations

The acquisition method of accounting is used to account for all business combinations, regardless of whether equity instruments or other assets are acquired. The consideration transferred for the acquisition of a subsidiary comprises the:

- fair values of the assets transferred
- liabilities incurred to the former owners of the acquired business

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

- equity interests issued by the group
- fair value of any asset or liability resulting from a contingent consideration arrangement, and
- fair value of any pre-existing equity interest in the subsidiary.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are, with limited exceptions, measured initially at their fair values at the acquisition date. The group recognises any non-controlling interest in the acquired entity on an acquisition-by-acquisition basis either at fair value or at the non-controlling interest's proportionate share of the acquired entity's net identifiable assets. Acquisition-related costs are expensed as incurred.

The excess of the:

- consideration transferred,
- amount of any non-controlling interest in the acquired entity, and
- acquisition-date fair value of any previous equity interest in the acquired entity

over the fair value of the net identifiable assets acquired is recorded as goodwill. If those amounts are less than the fair value of the net identifiable assets of the business acquired, the difference is recognised directly in profit or loss as a bargain purchase.

### 3.27 Share based payments

Employees (including senior executives) of the Group receive remuneration in the form of share-based payments, whereby employees render services as consideration for equity instruments (equity-settled transactions).

#### Equity-settled transactions

The cost of equity-settled transactions is determined by the fair value at the date when the grant is made using an appropriate valuation model.

That cost is recognised in employee benefits expense together with a corresponding increase in equity (share-based payment reserve), over the period in which the service and, where applicable, the performance conditions are fulfilled (the vesting period). The cumulative expense recognised for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Group's best estimate of the number of equity instruments that will ultimately vest. The expense or credit in profit or loss for a period represents the movement in cumulative expense recognised as at the beginning and end of that period.

Service and non-market performance conditions are not taken into account when determining the grant date and for fair value of awards, but the likelihood of the conditions being met is assessed as part of the Group's best estimate of the number of equity instruments that will ultimately vest. Market performance conditions are reflected within the grant date fair value. Any other conditions attached to an award, but without an associated service requirement, are considered to be non-vesting conditions. Non-vesting conditions are reflected in the fair value of an award and lead to an immediate expensing of an award unless there are also service and/or performance conditions.

No expense is recognised for awards that do not ultimately vest because non-market performance and/or service conditions have not been met. Where awards include a market or non-vesting condition, the transactions are treated as vested irrespective of whether the market or non-vesting condition is satisfied, provided that all other performance and/or service conditions are satisfied. When the terms of an equity-settled award are modified, the minimum expense recognised is the grant date fair value of the unmodified award provided the original terms of the award are met. An additional expense, measured as at the date of modification, is recognised for any modification that increases the total fair value of the share-based payment transaction, or is otherwise beneficial to the employee. Where an award is cancelled by the entity or by the counterparty, any remaining element of the fair value of the award is expensed immediately through profit or loss. The dilutive effect of outstanding awards is reflected as additional share dilution in the computation of diluted earnings per share.

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

### 4. Significant accounting judgements estimates and assumptions

The preparation of the Group's consolidated historical financial information requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

#### 4.1 Judgements

In the process of applying the Group's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the consolidated historical financial information:

##### OMLs 4, 38 and 41

OMLs 4, 38, 41 are grouped together as a cash generating unit for the purpose of impairment testing. These three OMLs are grouped together because they each cannot independently generate cash flows. They currently operate as a single block sharing resources for generating cash flows. Crude oil and gas sold to third parties from these OMLs are invoiced when the Group has an unconditional right to receive payment.

##### Deferred tax asset

Deferred income tax assets are recognised for tax losses carried forward to the extent that the realisation of the related tax benefit through future taxable profits is probable.

##### Lease liabilities

In 2018, the Group entered into a lease agreement for its new head office building. The lease contract contains an option to purchase and right of first refusal upon an option of sales during the initial non-cancellable lease term of five (5) years.

In determining the lease liability/right-of-use assets, management considered all fact and circumstances that create an economic incentive to exercise the purchase option. Potential future cash outflow of \$45 million, which represents the purchase price, has not been included in the lease liability because the Group is not reasonably certain that the purchase option will be exercised. This assessment will be reviewed if a significant event or a significant change in circumstances occurs which affects the initial assessment and that is within the control of the management.

##### Foreign currency translation reserve

The Group has used the CBN rate to translate its Dollar currency to its Naira presentation currency. Management has determined that this rate is available for immediate delivery. If the rate was 10% higher or lower, revenue in Naira would have increased/decreased by ₦26.9 billion (2023: ₦15.2 billion). See Note 31 for the applicable translation rates.

##### Consolidation of Elcrest

On acquisition of 100% shares of Eland Oil and Gas Plc, the Group acquired indirect holdings in Elcrest Exploration and Production (Nigeria) Limited. Although the Group has an indirect holding of 45% in Elcrest, Elcrest has been consolidated as a subsidiary for the following basis:

- Eland Oil and Gas Plc has controlling power over Elcrest due to its representation on the board of Elcrest, and clauses contained in the Share Charge agreement and loan agreement which gives Eland the right to control 100% of the voting rights of shareholders.
- Eland Oil and Gas Plc is exposed to variable returns from the activities of Elcrest through dividends and interests.
- Eland Oil and Gas Plc has the power to affect the amount of returns from Elcrest through its right to direct the activities of Elcrest and its exposure to returns.

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

### Revenue recognition

#### Performance obligations

The judgments applied in determining what constitutes a performance obligation will impact when control is likely to pass and therefore when revenue is recognised i.e. over time or at a point in time. The Group has determined that only one performance obligation exists in oil contracts which is the delivery of crude oil to specified ports. Revenue is therefore recognised at a point in time.

For gas contracts, the performance obligation is satisfied through the delivery of a series of distinct goods. Revenue is recognised over time in this situation as gas customers simultaneously receive and consume the benefits provided by the Group's performance. The Group has elected to apply the 'right to invoice' practical expedient in determining revenue from its gas contracts. The right to invoice is a measure of progress that allows the Group to recognise revenue based on amounts invoiced to the customer. Judgement has been applied in evaluating that the Group's right to consideration corresponds directly with the value transferred to the customer and is therefore eligible to apply this practical expedient.

#### Significant financing component

The Group has entered into an advance payment contract with Mercuria for future crude oil to be delivered. The Group has considered whether the contract contains a financing component and whether that financing component is significant to the contract, including both of the following;

- a) The difference, if any, between the amount of promised consideration and cash selling price and;
- b) The combined effect of both the following:
  - The expected length of time between when the Group transfers the crude to Mercuria and when payment for the crude is received and;
  - The prevailing interest rate in the relevant market.

The advance period is greater than 12 months. In addition, the interest expense accrued on the advance is based on a comparable market rate. Interest expense has therefore been included as part of finance cost.

#### Transactions with Joint Operating arrangement (JOA) partners

The treatment of underlift and overlift transactions is judgmental and requires a consideration of all the facts and circumstances including the purpose of the arrangement and transaction. The transaction between the Group and its JOA partners involves sharing in the production of crude oil, and for which the settlement of the transaction is non-monetary. The JOA partners have been assessed to be partners not customers. Therefore, shortfalls or excesses below or above the Group's share of production are recognised in other income/ (expenses) - net.

### Exploration and evaluation assets

The accounting for exploration and evaluation ('E&E') assets require management to make certain judgements and assumptions, including whether exploratory wells have discovered economically recoverable quantities of reserves. Designations are sometimes revised as new information becomes available. If an exploratory well encounters hydrocarbon, but further appraisal activity is required in order to conclude whether the hydrocarbons are economically recoverable, the well costs remain capitalised as long as sufficient progress is being made in assessing the economic and operating viability of the well. Criteria used in making this determination include evaluation of the reservoir characteristics and hydrocarbon properties, expected additional development activities, commercial evaluation and regulatory matters. The concept of 'sufficient progress' is an area of judgement, and it is possible to have exploratory costs remain capitalised for several years while additional drilling is performed or the Group seeks government, regulatory or partner approval of development plans.

### Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker.

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

The Board of directors has appointed a steering committee which assesses the financial performance and position of the Group and makes strategic decisions. The steering committee, which has been identified as being the chief operating decision maker, consists of the chief financial officer, the Vice President (Finance), the Director (New Energy) and the financial reporting manager. See further details in note 6.

### 4.2 Estimates and assumptions

The key assumptions concerning the future and the other key source of estimation uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are described below. The Group based its assumptions and estimates on parameters available when the consolidated financial statements were prepared. Existing circumstances and assumptions about future developments may change due to market changes or circumstances arising that are beyond the control of the Group. Such changes are reflected in the assumptions when they occur.

The following are some of the estimates and assumptions made:

#### Defined benefit plans

The cost of the defined benefit retirement plan and the present value of the retirement obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, mortality rates and changes in inflation rates.

Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. The parameter most subject to change is the discount rate. In determining the appropriate discount rate, management considers market yield on federal government bonds in currencies consistent with the currencies of the post-employment benefit obligation and extrapolated as needed along the yield curve to correspond with the expected term of the defined benefit obligation.

The rates of mortality assumed for employees are the rates published in 67/70 ultimate tables, published jointly by the Institute and Faculty of Actuaries in the UK.

#### Oil and gas reserves

Proved oil and gas reserves are used in the units of production calculation for depletion as well as the determination of the timing of well closure for estimating decommissioning liabilities and impairment analysis. There are numerous uncertainties inherent in estimating oil and gas reserves. Assumptions that are valid at the time of estimation may change significantly when new information becomes available. Changes in the forecast prices of commodities, exchange rates, production costs or recovery rates may change the economic status of reserves and may ultimately result in the reserves being restated.

#### Share-based payment reserve

Estimating fair value for share-based payment transactions requires determination of the most appropriate valuation model, which depends on the terms and conditions of the grant. This estimate also requires determination of the most appropriate inputs to the valuation model including the expected life of the share award or appreciation right, volatility and dividend yield and making assumptions about them. The Group measures the fair value of equity-settled transactions with employees at the grant date.

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. Such estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

#### Provision for decommissioning obligations

Provisions for environmental clean-up and remediation costs associated with the Group's drilling operations are based on current constructions, technology, price levels and expected plans for remediation. Actual costs and cash outflows can differ from estimates because of changes in public expectations, prices, discovery and analysis of site conditions and changes in clean-up technology.

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

### Property, plant and equipment

The Group assesses its property, plant and equipment, including exploration and evaluation assets, for possible impairment if there are events or changes in circumstances that indicate that carrying values of the assets may not be recoverable, or at least at every reporting date.

If there are low oil prices or natural gas prices during an extended period, the Group may need to recognise significant impairment charges. The assessment for impairment entails comparing the carrying value of the cash-generating unit with its recoverable amount, that is, higher of fair value less cost to dispose and value in use. Value in use is usually determined on the basis of discounted estimated future net cash flows. Determination as to whether and how much an asset is impaired involves management estimates on highly uncertain matters such as future commodity prices, the effects of inflation on operating expenses, discount rates, production profiles and the outlook for regional market supply-and-demand conditions for crude oil and natural gas.

During the year, the Group carried out an impairment assessment on OML 4,38 and 41, OML 56, OML 53, OML 40 and OML 17. The Group used the higher of the fair value less cost to dispose and the value in use in determining the recoverable amount of the cash-generating unit. In determining the value, the Group uses a forecast of the annual net cash flows over the life of proved plus probable reserves, production rates, oil and gas prices, future costs (excluding (a) future restructurings to which the entity is not yet committed; or (b) improving or enhancing the asset's performance) and other relevant assumptions based on the year-end Competent Persons Report (CPR). The pre-tax future cash flows are adjusted for risks specific to the forecast and discounted using a pre-tax discount rate which reflects both current market assessment of the time value of money and risks specific to the asset.

Management considers whether a reasonable possible change in one of the main assumptions will cause an impairment and believes otherwise.

### Useful life of other property, plant and equipment

The Group recognises depreciation on other property, plant and equipment on a straight-line basis in order to write-off the cost of the asset over its expected useful life. The economic life of an asset is determined based on existing wear and tear, economic and technical ageing, legal and other limits on the use of the asset, and obsolescence. If some of these factors were to deteriorate materially, impairing the ability of the asset to generate future cash flow, the Group may accelerate depreciation charges to reflect the remaining useful life of the asset or record an impairment loss.

### Income taxes

The Group is subject to income taxes by the Nigerian tax authority, which does not require significant judgement in terms of provision for income taxes, but a certain level of judgement is required for recognition of deferred tax assets. Management is required to assess the ability of the Group to generate future taxable economic earnings that will be used to recover all deferred tax assets. Assumptions about the generation of future taxable profits depend on management's estimates of future cash flows. The estimates are based on the future cash flow from operations taking into consideration the oil and gas prices, volumes produced, operational and capital expenditure.

### Impairment of financial assets

The loss allowances for financial assets are based on assumptions about risk of default, expected loss rates and maximum contractual period. The Group uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the Group's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

### Intangible assets

The contract based intangible assets (licence) were acquired as part of a business combination. They are recognised at their fair value at the date of acquisition and are subsequently amortised on a straight-line bases over their estimated useful lives which is also the economic life of the asset. The fair value of contract based intangible assets is estimated using the multi period excess earnings method. This requires a forecast of revenue and all cost projections throughout the useful life of the intangible assets. A contributory asset charge that reflects the return on assets is also determined and applied to the revenue but subtracted from the operating cash flows to derive the pre-tax cash flow. The post-tax cashflows are then obtained by deducting out the tax using the effective tax rate.

# Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

Discount rates represent the current market assessment of the risks specific to each CGU, taking into consideration the time value of money. The discount rate calculation is based on the specific circumstances of the Group and its operating segments and is derived from its weighted average cost of capital (WACC). The WACC takes into account both debt and equity. The cost of equity is derived from the expected return on investment by the Group's investors. The cost of debt is based on the interest-bearing borrowings the Group is obliged to service.

## 5. Financial risk management

### 5.1 Financial risk factors

The Group's activities expose it to a variety of financial risks such as market risk (including foreign exchange risk, interest rate risk and commodity price risk), credit risk and liquidity risk. The Group's risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance.

Risk management is carried out by the treasury department under policies approved by the Board of Directors. The Board provides written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk and investment of excess liquidity.

Risk	Exposure arising from	Measurement	Management
Market risk – foreign exchange	Future commercial transactions Recognised financial assets and liabilities not denominated in US dollars.	Cash flow forecasting Sensitivity analysis	Match and settle foreign denominated cash inflows with foreign denominated cash outflows.
Market risk – interest rate	Interest bearing loans and borrowings at variable rate	Sensitivity analysis	Review refinancing opportunities
Market risk – commodity prices	Future sales transactions	Sensitivity analysis	Oil price hedges
Credit risk	Cash and bank balances, trade receivables and derivative financial instruments.	Aging analysis Credit ratings	Diversification of bank deposits.
Liquidity risk	Borrowings and other liabilities	Rolling cash flow forecasts	Availability of committed credit lines and borrowing facilities

#### 5.1.1 Credit risk

Credit risk refers to the risk of a counterparty defaulting on its contractual obligations resulting in financial loss to the Group. Credit risk arises from cash and bank balances as well as credit exposures to customers (i.e., Mercuria, Shell western, Pillar, Azura, Geregu Power, Sapele Power and Nigerian Gas Marketing Company (NGMC) receivables), and other parties (i.e., NNPC receivables, NEPL receivables and other receivables).

#### Risk management

The Group is exposed to credit risk from its sale of crude oil to Mercuria and Shell western. There is a 30-day payment term after Bill of Lading date in the off-take agreement with Mercuria (OMLs 4, 38 & 41) which expired in December 2022. The Group also has an off-take agreement with Shell Western Supply and Trading Limited which expires in September 2023. The Group is exposed to further credit risk from outstanding cash calls from Nigerian National Petroleum Corporation Exploration Limited (NEPL) and Nigerian National Petroleum Corporation (NNPC).

In addition, the Group is exposed to credit risk in relation to the sale of gas to its customers.

The credit risk on cash and bank balances is managed through the diversification of banks in which the balances are held. The risk is limited because the majority of deposits are with banks that have an acceptable credit rating assigned by an

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

international credit agency. The Group's maximum exposure to credit risk due to default of the counterparty is equal to the carrying value of its financial assets.

### Estimation uncertainty in measuring impairment loss

The table below shows information on the sensitivity of the carrying amounts of the Group's financial assets to the methods, assumptions and estimates used in calculating impairment losses on those financial assets at the end of the reporting period. These methods, assumptions and estimates have a significant risk of causing material adjustments to the carrying amounts of the Group's financial assets.

### Significant unobservable inputs

The table below demonstrates the sensitivity of the Group's profit before tax to movements in the loss given default (LGD) for financial assets, with all other variables held constant:

	Effect on profit before tax 31 March 2024	Effect on other components of equity before tax 31 March 2024	Effect on profit before tax 31 March 2024	Effect on other components of equity before tax 31 March 2024

-10%	112	-	243	-

### 5.1.2 Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. The Group manages liquidity risk by ensuring that sufficient funds are available to meet its commitments as they fall due.

The Group uses both long-term and short-term cash flow projections to monitor funding requirements for activities and to ensure there are sufficient cash resources to meet operational needs. Cash flow projections take into consideration the Group's debt financing plans and covenant compliance. Surplus cash held is transferred to the treasury department which invests in interest bearing current accounts and time deposits.

The following table details the Group's remaining contractual maturity for its non-derivative financial liabilities with agreed maturity periods. The table has been drawn based on the undiscounted cash flows of the financial liabilities based on the earliest date on which the Group can be required to pay.

Cash and cash equivalents	335,804	450,109	335,804	450,109
	<b>580,512</b>	<b>736,056</b>	<b>580,512</b>	<b>736,056</b>
<b>Financial liabilities at amortised cost</b>				
Interest bearing loans and borrowings	721,239	755,362	712,283	765,447
Trade and other payables**	302,261	389,149	302,261	389,149
	<b>1,023,500</b>	<b>1,144,511</b>	<b>1,014,544</b>	<b>1,154,596</b>
<b>Financial liabilities at fair value</b>				
Derivative financial instruments (Note 20)	(2,600)	(1,606)	(2,600)	(1,606)
	<b>(2,600)</b>	<b>(1,606)</b>	<b>(2,600)</b>	<b>(1,606)</b>

\*Trade and other receivables exclude Geregu Power, Sapele Power and NGMC VAT receivables, cash advances and advance payments.

In determining the fair value of the interest-bearing loans and borrowings, non-performance risks of the Group as at year-end were assessed to be insignificant.

\*\*Trade and other payables (excluding non-financial liabilities such as provisions, taxes, pension and other non-contractual payables), trade and other receivables (excluding prepayments), contract assets and cash and bank balances are financial instruments whose carrying amounts as per the financial statements approximate their fair values. This is mainly due to their short-term nature.

### 5.1.4 Fair Value Hierarchy

As at the reporting period, the Group had classified its financial instruments into the three levels prescribed under the accounting standards. There were no transfers of financial instruments between fair value hierarchy levels during the year.

- Level 1 – Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

The fair value of the financial instruments is included at the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value of the Group's derivative financial instruments has been determined using a proprietary pricing model that uses marked to market valuation. The valuation represents the mid-market value and the actual close-out costs of trades involved. The market inputs to the model are derived from observable sources. Other inputs are unobservable but are estimated based on the market inputs or by using other pricing models. The derivative financial instruments are in level 2.

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

### The valuation process

The finance & planning team of the Group performs the valuations of financial and non-financial assets required for financial reporting purposes, including level 3 fair values. This team reports directly to the General Manager (GM) Commercial who reports to the Chief Financial Officer (CFO) and the Audit Committee (AC). Discussions of valuation processes and results are held between the GM and the valuation team at least once every quarter, in line with the Group's quarterly reporting periods.

## 6. Segment reporting

Business segments are based on the Group's internal organisation and management reporting structure. The Group's business segments are the two core businesses: Oil and Gas. The Oil segment deals with the exploration, development and production of crude oil while the Gas segment deals with the production and processing of gas. These two reportable segments make up the total operations of the Group.

For the three months ended 31 March 2024, revenue from the gas segment of the business constituted 16% (2023: 10%) of the Group's revenue. Management is committed to continued growth of the gas segment of the business, including through increased investment to establish additional offices, create a separate gas business operational management team and procure the required infrastructure for this segment of the business. The gas business is positioned separately within the Group and reports directly to the (chief operating decision maker). As the gas business segment's revenues, results and cash flows are largely independent of other business units within the Group, it is regarded as a separate segment.

The result is two reporting segments, Oil and Gas. There were no intersegment sales during the reporting periods under consideration, therefore all revenue was from external customers.

Amounts relating to the gas segment are determined using the gas cost centres, with the exception of depreciation. Depreciation relating to the gas segment is determined by applying a percentage which reflects the proportion of the Net Book Value of oil and gas properties that relates to gas investment costs (i.e., cost for the gas processing facilities).

The Group accounting policies are also applied in the segment reports.

### 6.1 Segment profit disclosure

## 6.2 Segment assets

Segment assets are measured in a manner consistent with that of the financial statements. These assets are allocated based on the operations of the reporting segment and the physical location of the asset. The Group had no non-current assets domiciled outside Nigeria.

	Oil	Gas	Total	Oil	Gas	Total
Total segment assets	₦'million	₦'million	₦'million	\$'000	\$'000	\$'000
31 March 2024	3,843,534	751,629	4,595,163	2,734,702	534,790	3,269,492
31 December 2023	2,458,176	595,278	3,053,454	2,733,153	661,866	3,395,019

## 6.3 Segment liabilities

Segment liabilities are measured in a manner consistent with that of the financial statements. These liabilities are allocated based on the operations of the segment.

	Oil	Gas	Total	Oil	Gas	Total
Total segment liabilities	₦'million	₦'million	₦'million	\$'000	\$'000	\$'000
31 March 2024	1,614,424	468,686	2,083,110	1,148,674	333,474	1,482,148
31 December 2023	1,069,025	371,794	1,440,819	1,188,609	413,383	1,601,992

## 7. Revenue from contracts with customers

	3 Months ended 31 March 2024	3 Months ended 31 March 2023	3 Months ended 31 March 2024	3 Months ended 31 March 2023
	₦ million	₦ million	\$'000	\$'000
Crude oil sales	225,336	136,796	150,846	297,899
Gas sales	43,282	15,195	28,974	33,089
	268,618	151,991	179,820	330,988

The major off-takers for crude oil are Mercuria, Shell West and Chevron. The major off-takers for gas are Geregu Power, Sapele Power, Nigerian Gas Marketing Company and Azura.

## 8. Cost of sales

	3 Months ended 31 March 2024	3 Months ended 31 March 2023	3 Months ended 31 March 2024	3 Months ended 31 March 2023

Niger Delta Development Commission Levy	2,750	1,588	1,841	3,498
Operational & maintenance expenses	30,218	11,307	20,232	24,628
	204,805	60,939	137,105	132,712

Operational & maintenance expenses relates mainly to maintenance costs, warehouse operations expenses, security expenses, community expenses, clean-up costs, fuel supplies and catering services. Also included in operational and maintenance expenses is gas flare penalty of \$4.2million, ₦6.2 billion (2023: \$1.7million, ₦686 million).

Barging and Trucking costs relates to costs on the OML 40 Gbetiokun field.

## 9. Other income/(loss)

	3 Months ended 31 March 2024	3 Months ended 31 March 2023	3 Months ended 31 March 2024	3 Months ended 31 March 2023
	₦ million	₦million	\$'000	\$'000
Underlift/(Overlift)	84,300	(36,604)	56,433	(75,356)
Gain on foreign exchange	8,967	234	6,003	509
Tariffs	3,702	464	2,478	1,010
Others	197	32	132	69
	97,166	(33,874)	65,046	(73,768)

Overlifts/Underlifts are surplus/shortfalls of crude lifted above/below the share of production. It may exist when the crude oil lifted by the Group during the period is more/less than its ownership share of production. The surplus/shortfall is initially measured at the market price of oil at the date of lifting and recognised as other loss/income. At each reporting period, the surplus/shortfall is remeasured at the current market value. The resulting change, as a result of the remeasurement, is also recognised in profit or loss as other loss/income.

Gain on foreign exchange are principally due to the translation of Naira, Pounds and Euro denominated monetary assets and liabilities.

Tariffs which is a form of crude handling fee, relate to income generated from the use of the Group's pipeline.

Others represents other income, joint venture billing interest and joint venture billing finance fees.

## 10. General and administrative expenses

	3 Months ended 31 March 2024	3 Months ended 31 March 2023	3 Months ended 31 March 2024	3 Months ended 31 March 2023
	₦ million	₦million	\$'000	\$'000
Depreciation	2,698	316	1,807	691
Depreciation of right-of-use assets	1,822	502	1,220	1,093
Auditor's remuneration	212	113	142	245
Professional and consulting fees	3,332	1,014	2,231	2,209
Directors' emoluments (executive)	2,099	481	1,405	1,048
Directors' emoluments (non-executive)	1,536	609	1,028	1,326
Donations	38	111	26	242
Employee benefits	24,068	6,073	16,111	13,225
Flights and other travel costs	1,744	587	1,168	1,279

Rentals and other general expenses	(1,618)	(382)	(1,081)	(830)
	35,931	9,424	24,057	20,528

Directors' emoluments have been split between executive and non-executive directors.

Rentals and other general expenses relate to prior year accruals for rental & other general admin costs no longer required.

The increase in the General and administrative expenses is mainly driven by higher staff-related costs, particularly share based expenses premised on improved share prices.

## 11. Impairment loss on financial assets

	3 Months ended 31 March 2024	3 Months ended 31 March 2023	3 Months ended 31 March 2024	3 Months ended 31 March 2023
	₦ million	₦ million	\$'000	\$'000

NEPL receivables	(892)	(386)	(598)	(840)
Trade receivables (Geregu Power, Sapele Power and NGMC)	-	(62)	-	(136)
<b>Total impairment loss allowance</b>	<b>(972)</b>	<b>(412)</b>	<b>(651)</b>	<b>(898)</b>

## 12. Fair value loss

	3 Months ended 31 March 2024	3 Months ended 31 March 2023	3 Months ended 31 March 2024	3 Months ended 31 March 2023
	₦ million	₦ million	\$'000	\$'000
Hedge premium expenses	(2,420)	(551)	(1,620)	(1,200)
Fair value (loss)/ gain on derivatives (Note 18)	(1,223)	28	(819)	62
	(3,643)	(523)	(2,439)	(1,138)

Fair value loss/gain on derivatives represents changes in the fair value of hedging receivables charged to profit or loss.

## 13. Finance income/(cost)

	3 Months ended 31 March 2024	3 Months ended 31 March 2023	3 Months ended 31 March 2024	3 Months ended 31 March 2023
	₦ million	₦ million	\$'000	\$'000

<b>Finance income</b>				
Interest income	7,003	750	4,688	1,634
<b>Finance cost</b>				
Interest on bank loans	(27,603)	(8,655)	(18,478)	(18,848)
Interest on lease liabilities	(442)	(40)	(296)	(87)
Unwinding of discount on provision for decommissioning	(2,002)	(162)	(1,340)	(353)
	(30,047)	(8,857)	(20,114)	(19,288)
<b>Finance (cost) – net</b>	<b>(23,044)</b>	<b>(8,107)</b>	<b>(15,426)</b>	<b>(17,654)</b>

Finance income represents interest on short-term fixed deposits.

## 14. Taxation

The Income tax expense is recognised based on management's estimate of the weighted average effective annual income tax rate expected for the full financial year. The estimated annual tax rate used for the three months ended 31 March 2024 is 85% for crude oil activities and 30% for gas activities. As at 31 March 2024, the applicable tax rate was 85% and 30% respectively.

The effective tax rate for the period was 103% (2023: 33%).

The major components of income tax expense in the interim condensed consolidated statement:

### Income tax expense

	3 Months ended 31 March 2024	3 Months ended 31 March 2023	3 Months ended 31 March 2024	3 Months ended 31 March 2023
	₦ million	₦ million	\$'000	\$'000
<b>Current tax:</b>				
Current tax expense on profit for the year	18,047	10,965	12,081	23,879
Education tax	2,513	1,806	1,682	3,936
NASENI Levy	264	90	177	196
Police Levy	4	1	3	3
<b>Total current tax</b>	<b>20,828</b>	<b>12,862</b>	<b>13,943</b>	<b>28,014</b>
<b>Deferred tax:</b>				
Deferred tax expense in profit or loss (Note 14.1)	85,558	237	57,275	516
<b>Total tax expense in statement of profit or loss</b>	<b>106,386</b>	<b>13,100</b>	<b>71,218</b>	<b>28,530</b>
<b>Total tax charge for the period</b>	<b>106,386</b>	<b>13,100</b>	<b>71,218</b>	<b>28,530</b>
<b>Effective tax rate</b>	<b>103%</b>	<b>33%</b>	<b>103%</b>	<b>33%</b>

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

### 14.1 Deferred tax

The analysis of deferred tax assets and deferred tax liabilities is as follows:

	Balance as at 1 January 2024	(Charged)/ credited to profit or loss	Charged to other comprehensive income	Exchange difference	Balance as at 31 March 2024
	₦ million	₦ million	₦ million	₦ million	₦ million
Deferred tax assets	261,529	(23,218)	-	148,531	386,842
Deferred tax liabilities	(88,381)	(62,340)	-	(46,043)	(196,764)
	<b>173,148</b>	<b>(85,558)</b>	<b>-</b>	<b>102,488</b>	<b>190,078</b>

	Balance at 1 January 2024	(Charged)/ credited to profit or loss	Charged to other comprehensive income	Balance at 31 March 2024
	\$'000	\$'000	\$'000	\$'000
Deferred tax assets	290,784	(15,543)	-	275,241
Deferred tax liabilities	(98,267)	(41,732)	-	(139,999)
	<b>192,517</b>	<b>(57,275)</b>	<b>-</b>	<b>135,242</b>

In line with IAS 12, the Group elected to offset the deferred tax assets against the deferred tax liabilities arising from similar transactions.

## 15. Oil & Gas properties

During the three months ended 31 March 2024, the Group acquired assets amounting to ₦69.3 billion, \$46.4 million (Dec 2023: ₦20.2 billion, \$43.9 million)

## 16. Trade and other receivables

	31 March 2024	31 Dec 2023	31 March 2024	31 Dec 2023
	₦ million	₦ million	\$'000	\$'000

### 16.6 Advances for New Business

Advances for new business include deposit for investment of \$128.3 million, ₦180.3 billion (Dec 2023: \$128.3 million, ₦115.4 billion) towards the acquisition of the entire share capital of Mobil Producing Nigeria Unlimited from Exxon Mobil Corporation, Delaware.

## 17. Contract assets

	31 March 2024	31 Dec 2023	31 March 2024	31 Dec 2023
	₦'million	₦'million	\$'000	\$'000
Revenue on gas sales (Note 17.1)	11,823	7,496	8,412	8,334
Impairment loss on contract asset	(401)	(256)	(285)	(285)
	<b>11,422</b>	<b>7,240</b>	<b>8,127</b>	<b>8,049</b>

A contract asset is an entity's right to consideration in exchange for goods or services that the entity has transferred to a customer. The Group has recognised an asset in relation to a contract with Geregu Power, Sapele Power, Azura, NGMC, Transcorp Power, MSN Energy and Asherxino Limited for the delivery of gas supplies which these customers have received but which has not been invoiced as at the end of the reporting period.

The terms of payments relating to the contract is between 30- 45 days from the invoice date. However, invoices are raised after delivery between 14-21 days when the receivable amount has been established and the right to the receivables crystallises. The right to the unbilled receivables is recognised as a contract asset. At the point where the gas receipt certificates are obtained from the customers (Geregu Power, Sapele Power, Azura and NGMC) upon volumes reconciliations with offtakers authorising the quantities, this will be reclassified from contract assets to trade receivables.

### 17.1 Reconciliation of contract assets

The movement in the Group's contract assets is as detailed below:

	31 March 2024	31 Dec 2023	31 March 2024	31 Dec 2023
	₦'million	₦'million	\$'000	\$'000
Balance as at 1 January	7,496	3,493	8,334	7,811
Addition during the year	237,794	104,819	159,186	159,631
Amount billed during the year	(237,678)	(104,476)	(159,108)	(159,108)
Exchange difference	4,211	3,660	-	-
Impairment	(401)	(256)	(285)	(285)

Balance as at 31 March	11,422	7,240	8,127	8,049
------------------------	--------	-------	-------	-------

## 18. Derivative financial instruments

The Group uses its derivatives for economic hedging purposes and not as speculative investments. Derivatives are measured at fair value through profit or loss. They are presented as current liability to the extent they are expected to be settled within 12 months after the reporting period.

The fair value has been determined using a proprietary pricing model which generates results from inputs. The market inputs to the model are derived from observable sources. Other inputs are unobservable but are estimated based on the market inputs or by using other pricing models.

	31 March 2024	31 Dec 2023	31 March 2024	31 Dec 2023
	₦'million	₦'million	\$'000	\$'000
Opening balance	(1,445)	(954)	(1,606)	(2,135)
Realised fair value	2,399	1,402	1,606	2,135
Premium accrued	(261)	(240)	(175)	(365)
Unrealised fair value	(3,622)	(815)	(2,425)	(1,241)
Exchange difference	(725)	(838)	-	-
	(3,654)	(1,444)	(2,600)	(1,606)

## 19. Cash and cash equivalents

Cash and cash equivalents in the statement of financial position comprise of cash at bank, cash on hand and short-term deposits with a maturity of three months or less.

	31 March 2024	31 Dec 2023	31 March 2024	31 Dec 2023
	₦'million	₦'million	\$'000	\$'000

Exchange difference	125	111	-	-
<b>Loss allowance</b>	<b>346</b>	<b>221</b>	<b>246</b>	<b>246</b>

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

### 19.2 Restricted cash

	31 March 2024	31 Dec 2023	31 March 2024	31 Dec 2023
	₦'million	₦'million	\$'000	\$'000
Restricted cash	42,195	24,311	30,022	27,031
	42,195	24,311	30,022	27,031

### 19.3 Movement in restricted cash

	31 March 2024	31 Dec 2023	31 March 2024	31 Dec 2023
	₦'million	₦'million	\$'000	\$'000
Decrease in restricted cash	(4,468)	2,027	(2,991)	3,087
Exchange difference	22,352	11,578	-	-
	17,884	13,605	(2,991)	3,087

Included in the restricted cash balance is \$8 million, ₦11.3 billion and \$21 million, ₦29.5 billion set aside in the stamping reserve account and debt service reserve account respectively for the revolving credit facility. The amount is to be used for the settlement of all fees and costs payable for the purposes of stamping and registering the Security Documents at the stamp duties office and at the Corporate Affairs Commission (CAC).

Also included in the restricted cash balance is \$0.5 million, ₦0.6 billion for unclaimed dividend.

A garnishee order of \$0.5 million, ₦0.8 billion is included in the restricted cash balance as at the end of the reporting period.

These amounts are subject to legal restrictions and are therefore not available for general use by the Group.

## 20. Share capital

### 20.1 Authorised and issued share capital

	31 March 2024	31 Dec 2023	31 March 2024	31 Dec 2023
	₦'million	₦'million	\$'000	\$'000
<b>Authorised ordinary share capital</b>				
588,444,561 issued shares denominated in Naira of 50 kobo per share	297	297	1,864	1,864

## 21.2 Amortised cost of borrowings

	31 March 2024	31 Dec 2023	31 March 2024	31 Dec 2023
	₦million	₦million	\$'000	\$'000
Senior loan notes	903,265	588,351	642,680	654,164
Revolving loan facilities	13,560	9,197	9,648	10,206
Reserve based lending (RBL) facility	96,853	81,838	68,911	90,992
	<b>1,013,678</b>	<b>679,367</b>	<b>721,239</b>	<b>755,362</b>

### \$650 million Senior notes – April 2021

In March 2021, the Group offered 7.75% senior notes with an aggregate principal of \$650 million due in April 2026. The notes, which were priced on 25 March and closed on 1 April 2021, were issued by the Group in March 2021 and guaranteed by certain of its subsidiaries.

The gross proceeds of the Notes were used to redeem the existing \$350 million 9.25% senior notes due in 2023, to repay in full drawings of \$250 million under the existing \$350 million revolving credit facility for general corporate purposes, and to pay transaction fees and expenses. The amortised cost for the senior notes as at the reporting period is \$661.1 million, ₦ 304.7 billion although the principal is \$650 million.

### \$110 million Senior reserve-based lending (RBL) facility – March 2021

The Group through its subsidiary Westport on 28 November 2018 entered into a five-year loan agreement with interest payable semi-annually. The RBL facility has an initial contractual interest rate of 8% + USD LIBOR as at half year (8.30%) and a final settlement date of April 2026.

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

The RBL is secured against the Group's producing assets in OML 40 via the Group's shares in Elcrest, and by way of a debenture which creates a charge over certain assets of the Group, including its bank accounts.

The available facility is capped at the lower of the available commitments and the borrowing base. The current borrowing base is more than \$100 million, with the available commitments at \$100 million. The commitments were scheduled to reduce to \$87.5 million on 31 March 2021. The first reduction in the commitments occurred on 31st December 2019 in line with the commitment reduction schedule contained within the Facility Agreement. This resulted in the available commitments reducing from \$125.0 million to \$122.5million, with a further reduction to \$100.0 million as at December 2020.

The RBL has a maturity of five years, the repayments of principal are due on a semi-annual basis so that the outstanding balance of the RBL will not exceed the lower of (a) the borrowing base amount and (b) the total commitments. Interest rate payable under the RBL is USD SOFR plus 8%, as long as more than 50% of the available facility is drawn. This has been amended over time.

On 4th February 2020 Westport drew down a further \$10 million increasing the debt utilised under the RBL from \$90 million to \$100 million.

The interest rate of the facility is variable. The interest accrued at the reporting period is \$3.3 million, ₦4.6 billion using an effective interest rate of 13.90%. The interest paid was determined using SOFR rate + 8 % on the last business day of the reporting period.

On 17th March 2021, Westport signed an amendment and restatement agreement regarding the RBL. As part of the new agreement, the debt utilised and interest rate remain unchanged at \$100 million and 8% + USD LIBOR respectively, however, the maturity date was extended by either five years after the effective date of the loan (March 2026) or by the reserves tail date (expected to be March 2025). Due to the modification of the original agreement and based on the facts and circumstances, it was determined that the loan modifications were substantial. Therefore, the existing facility was derecognised, and a new liability was recognised, and the present value of the loan commitment was moved to long term liabilities (Borrowings due above 1 year).

On 24 May 2021 Westport drew down a further \$10 million increasing the debt utilized under the RBL from \$100 million to \$110 million. The amortized cost for this as at the reporting period is \$68.9 million, ₦96.9 billion (Dec 2023: \$91 million, ₦80.2 billion), although the principal is \$110 million.

### \$50 million Reserved based lending (RBL) facility – July 2021

In July 2021, the Group raised a \$50 million offtake line to the Reserved Based Lending Facility. The Facility has a 6-year tenor, maturing in 2027. As of the period under review, \$11 million has been drawn on this facility. The amortised cost for this as at the reporting period is \$9.6 million, ₦13.6 billion although the principal is \$11 million.

### \$350 million Revolving credit facility – September 2022

Seplat Energy Plc successfully refinanced its existing \$350million revolving credit facility due in December 2023 with a new three-year \$350 million revolving credit facility due in June 2025 (the "RCF"). The RCF includes an automatic maturity extension until December 2026 once a refinancing of the existing \$650 million bond due in April 2026 is implemented. The RCF is scheduled to reduce from July 2024, with such date automatically extended to July 2025 once the refinancing of the existing \$650 million bond is implemented. The RCF carries initial interest of 6% over the base rate (SOFR plus applicable credit adjustment spread) with the margin reducing to 5% after production flowing through the Amukpe-to-Escravos pipeline is stabilized at an average working interest production of at least 15,000 bpd over a 45 consecutive day period. The pricing is in line with the existing RCF pricing, although it reflects a change in the base rate from LIBOR to SOFR plus the applicable credit adjustment spread.

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

### 22. Trade and other payables

	31 March 2024	31 Dec 2023	31 March 2024	31 Dec 2023
	₦ million	₦ million	\$'000	\$'000
Trade payable	76,920	109,046	54,729	121,244
Accruals and other payables	270,008	176,416	192,112	196,150
NDDC levy	6,086	6,897	4,330	7,669

Overlift payable	99,483	130,139	70,783	144,696
	<b>524,302</b>	<b>480,136</b>	<b>373,044</b>	<b>533,845</b>

Included in accruals and other payables are field accruals of \$101.3 million, ₦142.3 billion (Dec 2023: \$80 million, ₦72 billion) and other vendor payables of \$17.8 million, ₦25 billion (Dec 2023: \$46.2 million, ₦41.6 billion). Royalties payable include accruals in respect of crude oil and gas production for which payment is outstanding at the end of the period.

Overlifts are excess crude lifted above the share of production. It may exist when the crude oil lifted by the Group during the period is above its ownership share of production. Overlifts are initially measured at the market price of oil at the date of lifting and recognised in profit or loss. At each reporting period, overlifts are remeasured at the current market value. The resulting change, as a result of the remeasurement, is also recognised in profit or loss and any amount unpaid at the end of the year is recognised in overlift payable.

## 24. Earnings/(Loss) per share EPS/(LPS)

### Basic

Basic EPS/(LPS) is calculated on the Group's profit after taxation attributable to the parent entity, which is based on the weighted average number of issued and fully paid ordinary shares at the end of the year.

### Diluted

Diluted EPS/(LPS) is calculated by dividing the profit after taxation attributable to the parent entity by the weighted average number of ordinary shares outstanding during the year plus all the dilutive potential ordinary shares (arising from outstanding share awards in the share-based payment scheme) into ordinary shares.

	31 March 2024	31 March 2023	31 March 2024	31 March 2023
	₦ million	₦ million	\$'000	\$'000
Profit attributable to Equity holders of the parent	1,570	26,705	1,045	58,143
(Loss)/profit attributable to Non-controlling interests	(4,444)	(281)	(2,975)	(613)
<b>Profit for the year</b>	<b>(2,874)</b>	<b>26,424</b>	<b>(1,930)</b>	<b>57,530</b>
	Shares '000	Shares '000	Shares '000	Shares '000

Outstanding share-based payments (shares)	1	1	1	1
<b>Weighted average number of ordinary shares adjusted for the effect of dilution</b>	<b>588,447</b>	<b>588,447</b>	<b>588,447</b>	<b>588,447</b>
Basic earnings per share for the period	₦	₦	\$	\$
Basic earnings per share	2.67	45.38	0.00	0.10
Diluted earnings per share	2.67	45.38	0.00	0.10
<b>Profit used in determining basic/diluted earnings per share</b>	<b>1,570</b>	<b>26,705</b>	<b>1,045</b>	<b>58,143</b>

The weighted average number of issued shares was calculated as a proportion of the number of months in which they were in issue during the reporting period.

## 25. Proposed dividend

The Group's directors proposed an interim dividend of 3 cents per share for the reporting period (2023: 3 cents)

## Notes to the interim condensed consolidated financial statements

For the three months ended 31 March 2024

### 26. Related party relationships and transactions

Seplat Energy Plc (the parent Company) controls all the other Companies within the Group. The Parent Company is owned 6.43% either directly or by entities controlled by Dr. A.B.C Orjiako (SPDCL(BVI)) and members of his family. The remaining shares in the parent Company are widely held.

The goods and services provided by the related parties are disclosed below.

#### Shareholders of the parent company

**Amaze Limited:** Dr. A.B.C Orjiako is a director and shareholder of Amaze Ltd. The company provided consulting services to Seplat. Services provided to the Group during the period amounted to nil (Dec 2023: \$587.4, ₦528.3 million).

### 27. Commitments and contingencies

#### 27.1 Contingent liabilities

The Group is involved in a number of legal suits as defendant. The estimated value of the contingent liabilities for the three months ended 31 March 2024 is ₦562 million, \$0.4 million (Dec 2023: ₦198 million, \$0.22 million). The contingent liability for the year is determined based on possible occurrences, though unlikely to occur. No provision has been made for this potential liability in these financial statements. Management and the Group's solicitors are of the opinion that the Group will suffer no loss from these claims.

### 28. Events after the reporting period

There was no event after the reporting period which could have a material effect on the disclosures and the financial position of the Group as at 31 March 2024 and on its profit or loss and other comprehensive income for the period ended.

### 29. Exchange rates used in translating the accounts to Naira

The table below shows the exchange rates used in translating the accounts into Naira

	Basis	31 March 2024	31 March 2023	31 Dec 2023
