Unaudited report and financial statements For the period ended 31 March 2024

#### Notes to the financial statements.

#### 1.0 Corporate information.

The Company was incorporated as a private limited liability Company on 13 March 1995 and commenced business activities on 15 March 1995. The principal activities of the Company include manufacturing and distribution of pharmaceutical products. The Company's shares were quoted the Nigerian Stock Exchange on 5 June 2008. The issued share capital is held as to 38.86% directly by the Directors, 5.74% indirectly by the Directors and 54.94% by the Nigerian Public.

#### 1.1 Composition of the financial statements

The Financial statements are drawn up in Naira, the functional currency of Fidson Healthcare Plc. In accordance with IFRS accounting presentation, the Financial Statements comprise:

- Statement of Profit or Loss and Other Comprehensive Income
- Statement of Financial Position
- Statement of Changes in Equity
- Statement of Cash flows
- Notes to the Financial Statements.

#### 1.2 Financial period

These Financial Statements cover the financial period 31 March 2024 with comparative amounts for the year ended 31 March 2023.

#### 2.0 Material accounting policy information

#### 2.1 Basis of preparation and measurement

These financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) that are effective at 31 December 2023 and Financial Reporting Council Act as issued by the Financial Reporting Council of Nigeria (FRCN), and the requirements of Companies and Allied Matters Act (CAMA) of Nigeria.

The financial statements have been prepared on a historical cost basis, except for certain financial assets which have been measured at fair value. The financial statements are presented in the Nigerian Naira and all values are rounded to the nearest thousands ( $\Re'$ 000), except where otherwise indicated.

#### 2.2 Reclassification

Certain reclassifications have been made to prior year's financial statements to aid comparability with the current year's financial statements. This reclassification has had no impact on prior year's reported position.

#### 2.3 Material accounting policy information

The following are the significant accounting policies applied by the Company in preparing its financial statements:

Unaudited report and financial statements For the period ended 31 March 2024

Notes to the financial statements.

#### 2.3.1 Current versus non-current classification

The Company presents assets and liabilities in statement of financial position based on current/non-current classification. An asset is current when it is:

- Expected to be realised or intended to sell or consumed in normal operating cycle.
- Held primarily for the purpose of trading.
- Expected to be realised within twelve months after the reporting period.
   Or
- Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle.
- It is held primarily for the purpose of trading.
- It is due to be settled within twelve months after the reporting period.
   Or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

#### 2.3.2 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, if market participants act in their economic best interest.

A fair value measurement of a non-financial asset considers a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market

participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the relevant observable inputs and minimizing the use of unobservable inputs.

Unaudited report and financial statements For the period ended 31 March 2024

Notes to the financial statements.

#### 2.3.3 Revenue recognition

Revenue is recognised to depict the transfer of promised goods to the customer in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods.

Revenue is recognised by applying a five-step approach:

- Identify the contract
- Identify the separate performance obligations in the contract for Ethical and OTC when the
  products are delivered to the customer and for consumer healthcare when the customer picks
  up the product from the factory.
- Determine the transaction price
- Allocate the transaction price to separate performance obligations
- Recognise revenue when (or as) each performance obligation is accomplished (delivery of Ethical and Consumer healthcare product)

The Company recognises revenue from the following major sources:

- Sale of Ethical Products, ethical product category are infusion, capsule, and tablet. Revenue Is recognise when products are delivered to customers.
- Sale of Over the Counter (OTC) products. OTC product category are tablet, capsule, and syrup. Herbal product. Revenue is recognised when products are delivered to customer.
- The company also recognises revenue from manufacturing pharmaceutical products on behalf
  of its customers. The performance obligation in this type of contract involves the delivery of
  finished pharmaceutical drugs to its customers. Revenue is recognised overtime for this type of
  contract.

Revenue is measured based on the consideration to which the Company expects to be entitled in a contract with a customer and excludes amounts collected on behalf of third parties. The Company recognises revenue when the ethical and OTC products are delivered to the customer and or when the consumer healthcare customer picks their product from the factory.

#### Cost to obtain a contract.

In addition to the cost of the product, the Company pays sales commission to its employees and distributor for certain contracts that they obtain for sales of products. The Company has elected to apply the optional practical expedient for costs to obtain a contract which allows the Company to immediately expense sales commissions (included under sales expenses) because the amortisation period of the asset that the Company otherwise would have used is one year or less.

#### **Dividends**

Dividends are recognised when the Company's right to receive the payment is established, which is generally when shareholders approve the dividend.

#### 2.3.4 Government grants

Government grants are recognised where there is reasonable assurance that the grant will be received, and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the period that the related costs, for which it is intended to compensate, are expensed. When the grant relates to an asset, it is recognised as income in equal amounts over the expected useful life of the related asset.

When the Company receives grants of non-monetary assets, the asset and the grant are recorded at fair value amounts and released to the profit or loss over the expected useful life in a pattern of

Unaudited report and financial statements For the period ended 31 March 2024

Notes to the financial statements.

#### 2.3.4 Government grants (cont'd)

consumption of the benefit of the underlying asset by equal annual instalments. When loans or similar assistance are provided by governments or related institutions, with an interest rate below the current applicable market rate, the effect of this favourable interest is regarded as a government grant. The loan or assistance is initially recognised and measured at fair value and the government grant is measured as the difference between the initial carrying value of the loan and the proceeds received. The loan is subsequently measured as per the accounting policy in Note 2.2.12 (ii).

#### 2.3.5 Taxes

#### **Current income tax**

The income tax assets or liabilities for the current year are measured at the amount expected to be recovered from or paid to the tax authorities. The tax rates and tax laws used to compute the amount are determined in accordance with the Companies Income Tax Act (CITA) 2007 at 30% of total profit after deducting capital allowances and loss relief. Education tax is also assessed at 2.5% of the assessable profits.

Current income tax relating to items recognised outside the profit or loss are recognised outside profit or loss.

Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

#### **Deferred tax**

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- In respect of taxable temporary differences associated with investments in subsidiaries, associates, and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

 When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

Unaudited report and financial statements For the period ended 31 March 2024

Notes to the financial statements.

#### 2.3.5 Taxes (cont'd)

#### Deferred tax (cont'd)

- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognised only to the extent that it is probable that
- the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised.

Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax on items recognised in the profit or loss is also recognised in the profit or loss, while deferred tax on items recognised outside the profit or loss is also recognised outside the profit or loss.

The Company offsets deferred tax assets and deferred tax liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority on the same taxable entity.

#### Value Added Tax (VAT)

Revenues, expenses, and assets are recognized net of the amount of Value Added Tax (VAT), except:

- Where the VAT incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case the VAT is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable.
- Receivables and payables are stated with the amount of VAT included.

The net amount of VAT recoverable from, or payable to, the tax authority is included as part of receivables or payables in the statement of financial position.

#### 2.3.6 Foreign currency transaction

Foreign currency transactions are converted into the functional currency, the Nigerian Naira at the rate of exchange prevailing at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency interbank rate of exchange ruling at the reporting date in accordance with the Central Bank of Nigeria guidelines. Any exchange gains or losses arising on settlement or translation of monetary items are recognised in the profit or loss. Nonmonetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions.

#### 2.3.7 Property plant and equipment

Property, plant and equipment are stated at cost of purchase or construction, net of accumulated depreciation and/or accumulated impairment loss, if any. Such cost includes the cost of replacing

Unaudited report and financial statements For the period ended 31 March 2024

Notes to the financial statements.

#### 2.3.7 Property plant and equipment (cont'd)

component parts of the property, plant and equipment and borrowing costs for long term projects if the recognition criteria are met.

When significant parts of property, plant and equipment are required to be replaced at intervals, such parts are recognised as individual assets with specific useful lives and depreciated accordingly. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in the profit or loss as incurred.

Depreciation on the categories of property, plant and equipment is calculated to write off the cost less the residual value of the asset, using the straight-line basis, over the assets' expected useful lives. Land and capital work-in-progress are not depreciated. The attributable cost of each item of capital work-in-progress is transferred to the relevant asset category immediately the asset is available for use and depreciated accordingly. Deprecation commences once asset is available for use. The normal expected useful lives for the major categories of property, plant and equipment are:

	Years
Land	Nil
Buildings	50
Plant and machinery	4 to 25
Office equipment	4 to 10
Furniture and fittings	8
Motor vehicles	4 to 6
Capital work-in-progress (WIP)	Nil

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the profit or loss when the asset is derecognised.

The assets 'residual values, useful lives and methods of depreciation are reviewed at each financial year end and adjusted prospectively, if appropriate.

Impairment reviews are performed when there are indicators that the carrying amounts may not be recoverable.

Impairment losses and reversals of impairment losses are recognised in the profit or loss.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. The gain or loss arising on the disposal or retirement of an asset is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

#### 2.3.8 Leases

The Company assesses whether a contract is or contains a lease, at inception of the contract. The Company recognises a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets (less then N50,000) (such as tablets and personal

Unaudited report and financial statements For the period ended 31 March 2024

Notes to the financial statements.

#### 2.3.8 Leases (cont'd)

computers, small items of office furniture and telephones). For these leases, the Company recognises the lease payments as an operating expense on a straight-line basis over the term of the lease unless

another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the Company uses its incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise:

Fixed lease payments (including in-substance fixed payments), less any lease incentives receivable.

- Variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date.
- The amount expected to be payable by the lessee under residual value guarantees.
- The exercise price of purchase options, if the lessee is reasonably certain to exercise the options;
- Payments of penalties for terminating the lease if the lease term reflects the exercise of an option to terminate the lease.

The lease liability is presented as a separate line in the statement of financial position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made.

The Company remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) whenever:

- The lease term has changed or there is a significant event or change in circumstances resulting in a change in the assessment of exercise of a purchase option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate.
- The lease payments change due to changes in an index or rate or a change in expected payment under
  a guaranteed residual value, in which cases the lease liability is remeasured by discounting the revised
  lease payments using an unchanged discount rate (unless the lease payments change is due to a change
  in a floating interest rate, in which case a revised discount rate is used).
- A lease contract is modified, and the lease modification is not accounted for as a separate lease, in which
  case the lease liability is remeasured based on the lease term of the modified lease by discounting the
  revised lease payments using a revised discount rate at the effective date of the modification.

The Company did not make any such adjustments during the periods presented.

The right-of-use assets comprise the initial measurement of the corresponding lease liability, lease payments made at or before the commencement day, less any lease incentives received and any initial direct costs. They are subsequently measured at cost less accumulated depreciation and impairment losses.

Whenever the Company incurs an obligation for costs to dismantle and remove a leased asset, restore the site on which it is located or restore the underlying asset to the condition required by the terms and conditions of the lease, a provision is recognised and measured under IAS 37. To the extent that the costs

Unaudited report and financial statements For the period ended 31 March 2024

Notes to the financial statements.

#### 2.3.8 Leases (cont'd)

relate to a right-of-use asset, the costs are included in the related right-of-use asset, unless those costs are incurred to produce inventories.

Right-of-use assets are depreciated over the shorter period of lease term and useful life of the underlying asset. If a lease transfers ownership of the underlying asset or the cost of the right-of-use asset reflects that the Company expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying asset. The depreciation starts at the commencement date of the lease.

The right-of-use assets are presented as a separate line in the statement of financial position.

The Company applies IAS 36 to determine whether a right-of-use asset is impaired and accounts for any identified impairment loss as described in the 'Property, Plant and Equipment' policy.

Variable rents that do not depend on an index or rate are not included in the measurement the lease liability and the right-of-use asset. The related payments are recognised as an expense in the period in which the event or condition that triggers those payments occurs.

As a practical expedient, IFRS 16 permits a lessee not to separate non-lease components, and instead account for any lease and associated non-lease components as a single arrangement. The Company has not used this practical expedient. For contracts that contain a lease component and one or more additional lease or non-lease components, the Company allocates the consideration in the contract to each lease component based on the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components.

#### The Company as a lessee

Finance leases transfer to the Company substantially all the risks and rewards incidental to ownership of the leased asset.

The assets are measured at the commencement of the lease at the fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments are apportioned between finance charges and reduction of the lease liability to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognised as finance costs in the profit or loss.

The capital element of assets under finance lease is capitalised along with the Company's property, plant and equipment and depreciated at the same rates for assets of that category, or over the lease term, where the lease term is shorter than the assets' useful lives.

Operating lease payments are recognised as an operating expense in the profit or loss on a straight-line basis over the lease term.

#### Leases - as a lessor

Leases for which the Company is a lessor are classified as finance or operating leases. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on a straight-line basis over the lease term.

Unaudited report and financial statements For the period ended 31 March 2024

Notes to the financial statements.

#### 2.3.8 Leases (cont'd)

Amounts due from lessees under finance leases are recognised as receivables at the amount of the Company's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Company's net investment outstanding in respect of the leases.

When a contract includes both lease and non-lease components, the Company applies IFRS 15 to allocate the consideration under the contract to each component.

#### 2.3.9 Borrowing costs.

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period to get ready for its intended use or sale are capitalised as part of the cost of the respective assets. All other borrowing costs are expensed in the year in which they occur. Borrowing costs consist of interest and other costs that the Company incurs in connection with the borrowing of funds.

#### 2.3.10 Investment properties

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at cost less accumulated depreciation and accumulated impairment losses.

The investment properties are subject to annual depreciation charge of 2% on a straight-line basis.

If Investment properties are derecognized when either they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognized in the profit or loss in the year of derecognition.

Transfers are made to or from investment property only when there is a change in use. For a transfer from investment property to owner-occupied property, the deemed cost for subsequent accounting is the fair value at the date of change. Owner-occupied property becomes an investment property, the Company accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use.

#### 2.3.11 Intangible assets

Product licenses are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses. The Company makes upfront payments to purchase product licenses. The product licenses are held on various pharmaceutical products sold by the Company and have license years that range from 2 to 5 years. The licenses may be renewed by the Company at the expiration of the license period.

Intangible assets with finite lives are amortised over the useful economic lives. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each financial year end.

Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortisation period or method, as appropriate, and treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the profit or loss in the expense category consistent with the function of the intangible asset.

Unaudited report and financial statements For the period ended 31 March 2024

Notes to the financial statements.

#### 2.3.11 Intangible assets (cont'd)

Amortisation is calculated using the straight–line basis to write down the cost of intangible assets to their residual values over their estimated useful lives.

An intangible asset is derecognised on disposal or when no future economic benefit is expected from use or disposal. The gain or loss arising from the derecognition of an intangible asset is determined as the difference between the net disposal proceeds and the carrying amount of the intangible asset and recognised in the statement of profit or loss when the asset is derecognised.

#### 2.3.12 Financial instruments

#### (i) Financial assets

A financial asset is any asset that is:

- cash.
- an equity instrument of another entity.
- a contractual right to receive cash or another financial asset (e.g., receivables); or
- a contractual right to exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to Fidson (e.g., derivatives resulting in an asset, bonds, and investments)

#### (ii) Financial liability

A financial liability is any liability that is:

- a contractual obligation to deliver cash or another financial asset (e.g., payable); or
- a contractual obligation to exchange financial assets or financial liabilities with another
  entity under conditions that are potentially unfavourable to the Company (e.g.,
  payables, loans and derivatives resulting in a liability).

#### (iii) Amortised cost

All Fidson's financial assets and liabilities are measured at amortised cost, including, trade receivables and trade payables. The amortised cost of a financial asset or financial liability is the amount at which the asset or liability is measured at initial recognition minus principal repayments to date, and minus any reduction for impairment.

If there is a difference between the initial amount and the maturity amount (arising from reasons other than impairment), amortised cost will also be plus or minus the cumulative amortisation using the effective interest method.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in profit or loss as finance costs.

#### (iv) Effective interest method

The effective interest method calculates amortised cost by allocating the interest payment or expense over the relevant period. This calculation only applies if a premium has been paid or a discount received. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument. When

Unaudited report and financial statements For the period ended 31 March 2024

Notes to the financial statements.

#### 2.3.12 Financial instruments (cont'd)

estimating cash flows, all contractual terms are considered but expected future credit losses are not taken into account unless the financial instrument is credit impaired.

#### (v) Expected credit loss (ECL)

The expected credit loss is the difference between the cash flows due under the contract and the cash flows expected to be received, discounted at the original effective interest rate. An expected credit loss allowance is similar to an impairment provision.

An allowance for expected credit losses (ECLs) on all financial assets measured at amortised cost, e.g., most trade and other receivables, is set up through the Income Statement at initial recognition of the asset. The ECL is deducted from the carrying value of the asset on the balance sheet. Subsequent movements in the ECL (including release of the ECL if the asset is recovered in full) are reported in the Income Statement.

All ECL (impairment) allowances must be reviewed at least quarterly.

In applying the IFRS 9 impairment requirements, an entity needs to apply one of the following approaches:

- The simplified approach, which will be applied to trade receivables.
- The general approach, which will be applied to other receivables, including royalty receivables, and to loan assets and investments in debt securities.

#### a) The simplified impairment approach.

The simplified approach applied to trade receivables requires the recognition of lifetime ECLs at all times. Fidson uses a provision matrix as a practical expedient for determining ECLs on trade receivables, including non-overdue balances. The provision matrix should incorporate forward-looking information into historical customer default rates and, where appropriate, group receivables into customer segments that have similar loss patterns, such as Distributors, Sales representatives, and Institutions.

#### b) The general impairment approach

Under the general approach, prior to an asset actually being credit-impaired, entities recognise expected credit losses (ECLs) in two stages. For assets for which there has not been a significant increase in credit risk since initial recognition (i.e. 'good' exposures), entities are required to provide for ECLs that would result from default events that are possible within the next 12 months (a 12-month ECL).

For assets for which there has been a significant increase in credit risk since initial recognition, a loss allowance for ECLs expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL), is required.

Unaudited report and financial statements For the period ended 31 March 2024

Notes to the financial statements.

#### 2.3.12 Financial instruments (cont'd)

# (v) Expected credit loss (ECL) (cont'd)

#### b) The general impairment approach (cont'd)

Indicators of a significant increase in credit risk include:

- An actual or expected significant change in the financial asset's external or internal credit rating.
- Existing or forecast adverse changes in business, financial or economic conditions that
  are expected to cause a significant change in the debtor's ability to meet its debt
  obligations, such as an increase in interest rates or a significant increase in
  unemployment rates.
- An actual or expected significant change in the operating results of the debtor.
- Significant increases in credit risk on other financial instruments of the debtor;
- An actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant change in the debtor's ability to meet its debt obligations, such as a decline in the demand for the debtor's sales product because of a shift in technology;
- Expected changes in the loan documentation (i.e. changes in contract terms) including
  an expected breach of contract that may lead to covenant waivers or amendments,
  interest payment holidays, interest rate step-ups, requiring additional collateral or
  guarantees, or other changes to the contractual framework of the instrument;
- Significant changes in the expected performance and behaviour of the debtor, including changes in the payment status of debtor in the group (e.g., an increase in the expected number or extent of delayed contractual payments); and
- Past due information on debtors.

For current assets (expected to be recovered in less than 12 months), there will be no difference between the 12-month ECL and the lifetime ECL.

#### (vii) Impairment of financial asset investments

financial assets are impaired if there is objective evidence of impairment, resulting from one or more loss events that occurred after initial recognition but before the reporting date, that have an impact on the future cash flows of the asset.

In the case of equity investments classified as financial asset, objective evidence would include a significant or prolonged decline in the fair value of the investment below its cost. 'Significant' is evaluated against the original cost of the investment and 'prolonged' against the year in which the fair value has been below its original cost.

When there is evidence of impairment, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that investment previously recognized in the profit or loss – is reclassified from equity and to the profit or loss. Impairment losses on equity investments are not reversed through the profit or loss; increases in their fair value after impairment are recognized in other comprehensive income.

Unaudited report and financial statements For the period ended 31 March 2024

Notes to the financial statements.

#### 2.3.12 Financial instruments (cont'd)

#### (viii) Derecognition of financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- The rights to receive cash flows from the asset have expired.
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either.
  - (a) the Company has transferred substantially all the risks and rewards of the asset, or
  - (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered a pass-through arrangement and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of it, the asset is recognised to the extent of the Company's continuing involvement in it.

In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

#### (ix) Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in the profit or loss.

#### (x) Offsetting of financial instruments

Financial assets and financial liabilities are offset, and the net amount reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

Unaudited report and financial statements For the period ended 31 March 2024

Notes to the financial statements.

#### 2.3.13 Inventories

Inventories are valued at the lower of cost and net realisable value.

Costs incurred in bringing each product to its present location and condition is accounted for as follows:

- Raw materials are stated at purchase cost on the weighted average basis.
- Finished goods and work in progress: Cost in this case consists of direct purchase cost, conversion cost (materials, labour and overhead) and other costs incurred to bring inventory to its present condition and location. Finished goods are valued using weighted average cost.
- Goods in transit are valued at the invoiced price.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

Finished goods with six (6) months or less to expiration and expired materials are provided in the profit or loss account.

#### 2.3.14 Impairment of non-financial assets

The Company assesses at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an assets or cash-generating units (CGU) fair value less costs of disposal and its value in use.

Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

Impairment losses of continuing operations are recognised in the profit or loss in expense categories consistent with the function of the impaired asset.

An assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the assets or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the profit or loss.

Unaudited report and financial statements For the period ended 31 March 2024

Notes to the financial statements.

#### 2.3.14 Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and in hand and short-term deposits with an original maturity of three months or less, as shown in the statement of financial position.

For the purpose of the statement of cash flows, cash and cash equivalents comprise cash at bank and in hand and short-term deposits with an original maturity of three months or less, as shown in the statement of financial position, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

#### 2.3.15 Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is recognized in profit or loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

#### 2.3.16 Pension and other post-employment benefits

#### **Retirement benefit Schemes**

The gratuity scheme is a defined benefit plan. The cost of providing the benefits under the defined benefit plan is determined using the projected unit credit method.

Actuarial gains and losses are recognized immediately in the statement of financial position with a corresponding debit or credit to retained earnings through other comprehensive income in the year in which they occur. Actuarial gains and losses are not reclassified to the profit or loss in subsequent years.

#### **Pension**

The Company operates a defined contribution plan in line with the provisions of the Pension Reform Act 2014 as amended. This plan is in proportion to the services rendered to the Company by the employees with no further obligation on the part of the Company. The Company and its employee contribute 10% and 8% respectively of employees' current salaries and designated allowances to the scheme. Staff contributions to the scheme are funded through payroll deductions while the Company's contribution is recorded as personnel expenses in the profit or loss.

Past service costs are recognized in the profit or loss on the earlier of:

- the date of the plan amendment or curtailment, and
- the date that the Company recognizes restructuring-related costs

Unaudited report and financial statements For the period ended 31 March 2024

Notes to the financial statements.

#### 2.3.16 Pension and other post-employment benefits (cont'd)

#### Pension (cont'd)

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Company recognizes the following changes in the net defined benefit obligation under 'cost of sales', 'administration expenses' and 'selling and distribution expenses' in statement of profit or loss (by function):

- Service costs comprising current service costs, past-service costs and gains and losses on curtailments
- Net interest expense or income

#### **Short term benefits**

Short term employee benefits are measured on an undiscounted basis and are expensed as the related service is provided. A provision is recognized for the amount expected to be paid under short term cashbonus plans if the Company has a present and constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be measured reliably.

#### **Termination benefits**

Termination benefits are recognized as an expense when the Company is demonstrably committed without realistic possibility of withdrawal, to a formal detailed plan to terminate employment before the normal retirement date.

#### 2.3.17 Dividends

Dividends on ordinary shares are recognised as a liability when they are approved by the Company's shareholders at the Annual General Meeting. Dividends for the year that are approved after the reporting date are disclosed in the financial statements as a non-adjusting event.

#### 2.3.18 Segment reporting

For management purposes, the Company is organised into business units based on its products and has three reportable segments as follows:

- The over-the-counter segment, which represent the products that may be sold directly to the consumer without a prescription.
- Ethical products segment, which are drugs, injectables and infusion which would be sold to the consumer only on the possession of a valid prescription.
- Consumer healthcare product which represent manufacturing product for customers.

The Executive Management Committee monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on revenue and cost of sales.

#### 2.3.19 Dealing in Securities by insiders

The company's directors are constantly reminded, and they are aware of the restrictions imposed on them with regards to trading in the shares of the Company during closed periods. The policy in place is obeyed by the Directors and other senior employees who by virtue of their position constantly meet price sensitive information.

Enquiries have been made and it is hereby stated that in respect of this financial statements submitted in the course of the year under review none of the Directors violated the rules relating to securities trading.

Unaudited report and financial statements For the period ended 31 March 2024

#### Notes to the financial statements.

#### 3 Significant Accounting Judgments, Estimates and Assumptions

The preparation of the financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future years.

Other disclosures relating to the Company's exposure to risks and uncertainties includes:

- Capital management Note 42
- Financial risk management and policies Note 41

#### 3.1 Judgments

In the process of applying the Company's accounting policies, management has made the following judgments, which have the most significant effect on the amounts recognized in the financial statements:

#### Property, plant and equipment

The Company own a property with dual purpose. The portion not occupied by the Company cannot be separately sold or leased out under a finance lease arrangement. Management believe it occupies a significant portion of the property; hence the whole property has been classified as property, plant & equipment.

#### 3.2 Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

#### **Taxes**

Uncertainties exist with respect to the interpretation of complex tax regulations, changes in tax laws, and the amount and timing of future taxable income. Given the wide range of international business relationships and the long-term nature and complexity of existing contractual agreements, differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expense already recorded. The Company establishes provisions, based on reasonable estimates, for possible consequences of audits by the tax authorities.

#### **Retirement benefits**

The cost of defined benefit gratuity scheme is determined using actuarial valuations. An actuarial valuation involves making various assumptions, which may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, mortality rates and future pension increases. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date. Refer to Note 2 for assumptions relating to retirement benefits.

Unaudited report and financial statements For the period ended 31 March 2024

Notes to the financial statements.

## 3.2 Estimates and assumptions (cont'd)

#### Fair value measurement of financial instruments

When the fair value of financial assets and financial liabilities recorded in the statement of financial position cannot be derived from active markets, their fair value is determined using valuation techniques including the discounted cash flow model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. The judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See Note 41 for further disclosures.

#### **Financial instruments**

The Company assesses at each reporting date whether there is any objective evidence that the financial assets is impaired. Financial assets are deemed to be impaired if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition (an incurred 'loss event') and that loss event has an impact on the estimated future cash flows of the Available-for-sale financial assets that can be reliably estimated. The objective evidence the Management relies upon in assessing the Available-for-sale financial assets for impairment includes information about significant changes with an adverse effect that have taken place in the technological, market, economic or legal environment in which the issuer operates, and indicates that the cost of the investment in the equity instrument may not be recovered. A significant or prolonged decline in the fair value of an investment in an equity instrument below its cost is also seen as objective evidence of impairment.

The Company judges that the impairment is significant if the fair value declined is between 20% and 30% and prolonged when it is between 9 and 12 months.

When the fair value of available-for-sale financial assets cannot be derived from active markets, their fair value is determined using valuation techniques including the discounted cash flow model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. The judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. Refer to Note 19 on the details of financial instrument.

#### Property, plant and equipment

The Company carries its property, plant and equipment at cost in the Statement of Financial Position. Estimates and assumptions made to determine their carrying value and related depreciation are critical to the Company's financial position and performance. The charge in respect of periodic depreciation is derived after determining an estimate of an asset's expected useful life and the expected residual value at the end of its life. The useful lives and residual values of the assets are determined by management at the time the asset is acquired and reviewed periodically. The lives are based on historical experience with similar assets as well as anticipation of future events, which may impact their life, such as changes in technology. The Company reviews the estimated the useful lives and residual values of its property, plant and equipment, and accounts for any changes prospectively. Refer to Note 14 on property plant and equipment.

Unaudited report and financial statements For the period ended 31 March 2024

Notes to the financial statements.

#### 4.0 Application of new and revised International Financial Reporting Standards (IFRSs)

#### New and amended IFRS Accounting Standards that are effective for the current year (2023)

In the current year, the Company has applied a number of amendments to IFRS Accounting Standards issued by the International Accounting Standards Board (IASB) that are mandatorily effective for an accounting period that begins on or after 1 January 2023. Their adoption has not had any material impact on the disclosures or on the amounts reported in these financial statements.

# Amendments to IAS 1 Presentation of Financial Statements and IFRS Practice Statement 2 Making Materiality Judgements — Disclosure of Accounting Policies

The Company has adopted the amendments to IAS 1 for the first time in the current year. The amendments change the requirements in IAS 1 with regard to disclosure of accounting policies. The amendments replace all instances of the term 'significant accounting policies' with 'material accounting policy information'. Accounting policy information is material if, when considered together with other information included in an entity's financial statements, it can reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements. The supporting paragraphs in IAS 1 are also amended to clarify that accounting policy information that relates to immaterial transactions, other events or conditions is immaterial and need not be disclosed. Accounting policy information may be material because of the nature of the related transactions, other events or conditions, even if the amounts are immaterial. However, not all accounting policy information relating to material transactions, other events or conditions is itself material.

The IASB has also developed guidance and examples to explain and demonstrate the application of the 'four-step materiality process' described in IFRS Practice Statement 2.

# Amendments to IAS 12 *Income Taxes*—Deferred Tax related to Assets and Liabilities arising from a Single Transaction

The Company has adopted the amendments to IAS 12 for the first time in the current year. The amendments introduce a further exception from the initial recognition exemption. Under the amendments, an entity does not apply the initial recognition exemption for transactions that give rise to equal taxable and deductible temporary differences. Depending on the applicable tax law, equal taxable and deductible temporary differences may arise on initial recognition of an asset and liability in a transaction that is not a business combination and affects neither accounting profit nor taxable profit. Following the amendments to IAS 12, an entity is required to recognise the related deferred tax asset and liability, with the recognition of any deferred tax asset being subject to the recoverability criteria in IAS 12.

# Amendments to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors—Definition of Accounting Estimates

The Company has adopted the amendments to IAS 8 for the first time in the current year. The amendments replace the definition of a change in accounting estimates with a definition of accounting estimates. Under the new definition, accounting estimates are "monetary amounts in financial statements that are subject to measurement uncertainty". The definition of a change in accounting estimates was deleted.

Unaudited report and financial statements For the period ended 31 March 2024

Notes to the financial statements.

#### 4.0 Application of new and revised International Financial Reporting Standards (IFRSs) (cont'd)

#### New and revised IFRS Accounting Standards in issue but not yet effective

At the date of authorisation of these financial statements, the Company has not applied the following new and revised IFRS Accounting Standards that have been issued but are not yet effective.

Amendments to IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures—Sale or Contribution of Assets between an Investor and its Associate or Joint Venture The amendments to IFRS 10 and IAS 28 deal with situations where there is a sale or contribution of assets between an investor and its associate or joint venture. Specifically, the amendments state that gains or losses resulting from the loss of control of a subsidiary that does not contain a business in a transaction with an associate or a joint venture that is accounted for using the equity method, are recognised in the parent's profit or loss only to the extent of the unrelated investors' interests in that associate or joint venture. Similarly, gains and losses resulting from the remeasurement of investments retained in any former subsidiary (that has become an associate or a joint venture that is accounted for using the equity method) to fair value are recognised in the former parent's profit or loss only to the extent of the unrelated investors' interests in the new associate or joint venture. The effective date of the amendments has yet to be set by the IASB; however, earlier application of the amendments is permitted.

The directors of the Company anticipate that the application of these amendments may have an impact on the Company's financial statements in future periods should such transactions arise.

# Amendments to IAS 1 Presentation of Financial Statements—Classification of Liabilities as Current or Non-current

The amendments to IAS 1 published in January 2020 affect only the presentation of liabilities as current or non-current in the statement of financial position and not the amount or timing of recognition of any asset, liability, income or expenses, or the information disclosed about those items. The amendments clarify that the classification of liabilities as current or non-current is based on rights that are in existence at the end of the reporting period, specify that classification is unaffected by expectations about whether an entity will exercise its right to defer settlement of a liability, explain that rights are in existence if covenants are complied with at the end of the reporting period, and introduce a definition of 'settlement' to make clear that settlement refers to the transfer to the counterparty of cash, equity instruments, other assets or services.

The amendments are applied retrospectively for annual periods beginning on or after 1 January 2024, with early application permitted. The IASB has aligned the effective date with the 2022 amendments to IAS 1. If an entity applies the 2020 amendments for an earlier period, it is also required to apply the 2022 amendments early.

The directors of the company anticipate that the application of these amendments may have an impact on the Company's financial statements in future periods.

Unaudited report and financial statements For the period ended 31 March 2024

#### Notes to the financial statements.

#### 4.0 Application of new and revised International Financial Reporting Standards (IFRSs) (cont'd)

#### Amendments to IAS 1 Presentation of Financial Statements—Non-current Liabilities with Covenants

The amendments specify that only covenants that an entity is required to comply with on or before the end of the reporting period affect the entity's right to defer settlement of a liability for at least twelve months after the reporting date (and therefore must be considered in assessing the classification of the liability as current or noncurrent). Such covenants affect whether the right exists at the end of the reporting period, even if compliance with the covenant is assessed only after the reporting date (e.g. a covenant based on the entity's financial position at the reporting date that is assessed for compliance only after the reporting date).

The IASB also specifies that the right to defer settlement of a liability for at least twelve months after the reporting date is not affected if an entity only has to comply with a covenant after the reporting period. However, if the entity's right to defer settlement of a liability is subject to the entity complying with covenants within twelve months after the reporting period, an entity discloses information that enables users of financial statements to understand the risk of the liabilities becoming repayable within twelve months after the reporting period. This would include information about the covenants (including the nature of the covenants and when the entity is required to comply with them), the carrying amount of related liabilities and facts and circumstances, if any, that indicate that the entity may have difficulties complying with the covenants.

The amendments are applied retrospectively for annual reporting periods beginning on or after 1 January 2024. Earlier application of the amendments is permitted. If an entity applies the amendments for an earlier period, it is also required to apply the 2020 amendments early. The directors of the company anticipate that the application of these amendments may have an impact on the company's financial statements in future periods.

# Amendments to IAS 7 Statement of Cash Flows and IFRS 7 Financial Instruments: Disclosures—Supplier Finance Arrangements

The amendments add a disclosure objective to IAS 7 stating that an entity is required to disclose information about its supplier finance arrangements that enables users of financial statements to assess the effects of those arrangements on the entity's liabilities and cash flows. In addition, IFRS 7 was amended to add supplier finance arrangements as an example within the requirements to disclose information about an entity's exposure to concentration of liquidity risk.

The term 'supplier finance arrangements' is not defined. Instead, the amendments describe the characteristics of an arrangement for which an entity would be required to provide the information. To meet the disclosure objective, an entity will be required to disclose in aggregate for its supplier finance arrangements:

- The terms and conditions of the arrangements
- The carrying amount, and associated line items presented in the entity's statement of financial position, of the liabilities that are part of the arrangements
- The carrying amount, and associated line items for which the suppliers have already received payment from the finance providers
- Ranges of payment due dates for both those financial liabilities that are part of a supplier finance arrangement and comparable trade payables that are not part of a supplier finance arrangement
- · Liquidity risk information

The amendments, which contain specific transition reliefs for the first annual reporting period in which an entity applies the amendments, are applicable for annual reporting periods beginning on or after 1 January 2024. Earlier application is permitted.

Unaudited report and financial statements For the period ended 31 March 2024

Notes to the financial statements.

#### 4.0 Application of new and revised International Financial Reporting Standards (IFRSs) (cont'd)

#### Amendment to IFRS 16 Leases—Lease Liability in a Sale and Leaseback

The amendments to IFRS 16 add subsequent measurement requirements for sale and leaseback transactions that satisfy the requirements in IFRS 15 to be accounted for as a sale. The amendments require the seller-lessee to determine 'lease payments' or 'revised lease payments' such that the seller-lessee does not recognise a gain or loss that relates to the right of use retained by the seller-lessee, after the commencement date.

The amendments do not affect the gain or loss recognised by the seller-lessee relating to the partial or full termination of a lease. Without these new requirements, a seller-lessee may have recognised a gain on the right of use it retains solely because of a remeasurement of the lease liability (for example, following a lease modification or change in the lease term) applying the general requirements in IFRS 16. This could have been particularly the case in a leaseback that includes variable lease payments that do not depend on an index or rate.

As part of the amendments, the IASB amended an Illustrative Example in IFRS 16 and added a new example to illustrate the subsequent measurement of a right-of-use asset and lease liability in a sale and leaseback transaction with variable lease payments that do not depend on an index or rate. The illustrative examples also clarify that the liability, that arises from a sale and leaseback transaction that qualifies as a sale applying IFRS 15, is a lease liability.

The amendments are effective for annual reporting periods beginning on or after 1 January 2024. Earlier application is permitted. If a seller-lessee applies the amendments for an earlier period, it is required to disclose that fact.

A seller-lessee applies the amendments retrospectively in accordance with IAS 8 to sale and leaseback transactions entered into after the date of initial application, which is defined as the beginning of the annual reporting period in which the entity first applied IFRS 16.

		(149,523)	(149,523)

The company did not pledge any inventory as collateral for loans. The value of inventory written down in the year is ₩149.5 million (2023: ₩149.5 million)

Unaudited report and financial statements For the period ended 31 March 2024

Individually

#### Notes to the financial statements.

		Mar-24 ₦'000	Dec-23 ₩'000
20	Trade and other receivables		
	Trade receivables	6,930,028	5,693,528
	Impairement loss (Note 20a)	(364,000)	(364,000)
		6,566,028	5,329,528
	Other Receivables (Note 20b)	655,784	558,299
		7,221,812	5,887,827

Other receivables relateto withholding tax, and staff advances. These are not interest bearing and repayment is within 1 year.

Trade receivables meet the definition of financial asset and the carrying amount of the trade receivables approximates their fair value. Trade receivables are expected to be fully collected within 1 year.

The company measures the loss allowance for trade receivables at an amount equal to lifetime expected credit loss (ECL). The expected credit losses on trade receivables are estimated using a provision matrix by reference to past default experience of the debtor and an analysis of the debtor's current financial position adjusted for factors that are specific to the debtors' general economic conditions of the industry in which the debtor operate and an amendment of both the current as well as the forecast direction of conditions at the reporting rate.

There has been no change in the estimation techniques or significant assumption made during the current reporting period.

The company writes off a trade receivable when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the debtor has been placed under liquidation or has entered bankruptcy proceedings, or when the bad receivables are over two years past due, which occurs earlier.

As at 31 March 2024, trade receivables valued at ₩364million (2023: ₩364million) were impaired and provided for. See below for the movements in the provision for impairment of trade receivables.

At 1 January 2024 Addition Write off of trade receivables	impaired 'N000 364,000
At 31 March2024	364,000
At 1 January 2023 Addition Write off of trade receivables	136,218 227,782 
At 31 Dec 2023	364,000

	and time deposits)	23,543	10,091
	Restricted cash for letter of credit		6,116,167
	Total cash and cash equivalents	2,303,641	10,786,643

Short—term deposits are made for varying years of between one day and three months, depending on the immediate cash requirements of the Company and weighted average interest rate is at 9.57%.

For the purpose of cash flows, cash and cash equivalents consist of:

	Mar-24	Dec-23
	<b>₩</b> ′000	<b>₩</b> ′000
Bank overdraft (Note 23.1)	(1,885,134)	(781,784)
Cash and cash equivalents	2,303,641	10,786,643
	418,507	10,004,859

22.1 Bank overdraft represents the outstanding commitment on short-term borrowings for working capital management. The bank overdrafts are secured against mortgage debenture held by a trustee. The lenders are Wema Bank, Guaranty Trust Bank, FCMB, Fidelity and FSDH. The interest on the overdraft ranges from 29–31%.

Cash at banks in some classified account (e.g Call accounts, DSRA account and others) earn interest at floating rates based on daily bank deposit rates. Short-term deposits are made for varying periods of between one day and three months, depending on the immediate cash requirements of the Company, and earn interest at the respective short-term deposit rates.

The BOI loan is a N2billion loan granted in two tranches of N1bn each. The first N1bn granted at 10% for 84 months for capital expenditure while the other N1bn granted at 15% for 42 months to augment working capital.

A fair value of the loan was obtained using an estimated market rate of 18%. The difference between the loan rate and market rate accounted for a grant element of N221.2m. This was recognized as a government grant and will be amortized to profit or loss over the duration of the loan. The loan was granted in 2019 with a moratorium of 1 year.

The moratorium on principal repayment of BOI loan 3 and 4 has been extended by one year, this is to cushion the effect of the covid pandemic,2% reduction in interest rate was also granted until March 31, 2021. The working capital loan has been paid off.

23c FCMB loan is a N2.5billion Central Bank of Nigeria (CBN) Real Sector Support Facility-Differentiated Cash Reserve Requirement granted to Fidson Healthcare PLC for 84 months. N2billion is for acquisition while N500million is for working capital. The working capital portion has been fully repaid. The principal and interest shall be in twenty equal instalments and the interest shall be 9% per annum, however the CBN concessionary rate of 5% elapsed on February 28,2021. in addition, the moratorium period for principal repayment was further extended by another one year till 2022.

#### Notes to the financial statements.

- 23d Nexim Loan is a N3billion Nigerian Export-Import bank loan under the direct lending scheme to Fidson Healthcare PLC at the rate of 9% per annum.
  - The loan was disbursed in two equal instalments, N1.5billion for equipment finance and the other for working capital utilization. The first instalment was disbursed in December 2020 while the last instalment was disbursed in February 2021. The working capital loan has been paid off.
- The new BOI facility is a 6years period term loan of N5billion of which the sum of N2billion was disbursed in 2022 while N3billion was disbursed in 2023. The initial interest rate on the facility is 5% which elapsed in February 2022 and current interest rate on the facility is 9%. The security on the borrowing is a tripartite legal mortgage over the property.
- The new BOI facility is a 6-year period term loan of N2.5billion secured in 2023 for additional equipment finance due to the expansion of our production facility. The interest rate on the facility is 10% with a 12 month moratorium. The security on the borrowing is a tripartite legal mortgage over the property.
- 23g Short- term borrowings above are current and are expected to be settled within 12 months of the reporting date. The loans from Coronation Bank, Parallex Bank, Lotus Bank, Unity Bank and Rand Merchant Bank are secured by Naira cash provided to the banks. The security on the borrowings from FCMB, Fidelity Bank and Wema Bank is a tripartite legal mortgage over the property of the Company and attract an interest rate of 30%. The carrying value of short-term borrowings approximates their fair value due to the short-term nature and the fact that there were no material movement in market rates since the inception the loans.

	Details of short-term borrowings are as follows:	Mar-24	Dec-23
