# 1. General information

Transnational Corporation Plc, ("the Company" or "Transcorp"), was incorporated on 16 November, 2004 as a private limited liability Company domiciled in Nigeria in accordance with the requirements of the Companies and Allied Matters Act. Following a successful initial public offer (IPO), the Company was in December 2006, listed on the Nigerian Exchange Limited (Formerly Nigeria Stock Exchange). The shares of the Company have continued to be traded on the floor of the Exchange. The Company is domiciled in Nigeria and the address of its registered office is 38 Glover Road, Ikoyi, Lagos, Nigeria.

The Company maintains controlling interests in the following companies. The Company, together with the

subsidiaries are known as the Transcorp Group, ("the Group")

- Trans Afam Power Limited
- Transcorp Hotels Plc
- Transcorp Energy Limited
- Aura by Transcorp Hotels
- Transcorp Power Plc
- Transcorp Properties Limited
- Transcorp OPL 281 Limited
- Transcorp Hotels Ikoyi Limited
- Transcorp Hotels Port Harcourt Limited
- Terago Commodities Limited

The Company's business is investment and operation of portfolio companies in the hospitality, power, agro-allied and energy sectors.

# 2. Summary of Material Accounting Policies

# **Basis of preparation**

The condensed consolidated financial statements have been prepared in accordance with the Companies and Allied Matters Act (CAMA) 2020, IAS 34 Interim Financial Reporting, International Financial Reporting Standards (IFRS) and interpretations issued by the IFRS Interpretations Committee (IFRS IC) applicable to companies reporting under IFRS and the Financial Reporting Council of Nigeria Act 2023. The financial statements have been prepared on a historical cost basis except for "financial assets fair valued though other comprehensive income, financial assets and liabilities and investment property – measured at fair value.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Group's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in note 3.

The preparation of financial statements, in conformity with generally accepted accounting principles under IFRS, requires the directors to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on the directors' best knowledge of the amounts, events or actions, actual results ultimately may differ from those estimates.

# 2.1 Going Concern

Management believes that a going concern assumption is appropriate for the Group due to sufficient capital adequacy ratio and projected liquidity. This is based on historical experience that short-term obligations will be re-financed as required in the normal course of business.

Liquidity ratio and continuous evaluation of current ratio of the Group is carried out on an ongoing basis to ensure that there are no going concern threats to the operations of the Group.

# 2.2 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of Directors of Transcorp Plc.

# 2.3 Basis of Consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company (its subsidiaries) as at the period ended. Control is achieved when the Company has:

a) Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee)

b) Exposure, or rights, to variable returns from its involvement with the investee

c) The ability to use its power over the investee to affect its returns

The Company reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

When the Company has less than a majority of the voting rights of an investee, it considers that it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Company considers all relevant facts and circumstances in assessing whether or not the Company's voting rights in an investee are sufficient to give it power, including:

a) The size of the Company's holding of voting rights relative to the size and dispersion of holding of the other vote holders.

b) Potential voting rights held by the Company, other vote holders or other parties.

c) Rights arising from other contractual arrangements.

d) Any additional facts and circumstances that indicate that the Company has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full upon consolidation.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

If the Group loses control over a subsidiary, it derecognises the related assets (including goodwill), liabilities, noncontrolling interest and other components of equity, while any resultant gain or loss is recognised in profit or loss. Any investment retained is recognised at fair value.

# 2.4 Current versus non-current classification

The Group presents assets and liabilities in the statement of financial position based on current/non-current classification. An asset is current when it is:

- Expected to be realised or intended to be sold or consumed in the normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

# 2.5 Current versus non-current classification

A liability is current when:

- It is expected to be settled in the normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

Deferred tax assets and liabilities are classified as non-current assets and liabilities respectively.

# 3 Fair value estimation

The table below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

- (Level 1): Quoted prices (unadjusted) in active markets for identical assets or liabilities.

- (Level 2): Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).

- (Level 3): Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

# (a) Financial instruments in level 1

The fair value of financial instruments traded in active markets is based on quoted market prices at the balance sheet date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the group is the current bid price. These instruments are included in Level 1. Instruments included in Level 1 comprise primarily equity investments listed on the Nigerian Exchange Limited (NGX) classified as equity securities at fair value through other

### 4 Segment analysis

### The Group

The chief operating decision-maker has been identified as the Board of Directors of Transcorp. The Board reviews the Group's internal reporting in order to assess performance and allocate resources. The directors have determined the operating segments based on these reports. The Board considers the business from an industry perspective and has identified 5 operating segments.

### i Hospitality

The hospitality business is made up of its direct subsidiary Transcorp Hotels Plc. (THP) and indirect subsidiaries, Transcorp Hotels Ikoyi Limited, Transcorp Hotels Port Harcourt Limited and Aura by Transcorp Hotels. These entities render hospitality services to customers.

# ii Agro-allied

This relates to a subsidiary Teragro Commodities Limited. The subsidiary is engaged in the manufacturing/processing of fruit concentrates from fruits from which the Group derives revenue.

### iii Power

This relates to a subsidiary Transcorp Power Plc (TPP) and TransAfam Power Limited (TAPL). The subsidiaries are engaged in generation and sale of electric power.

### iv Energy

Two subsidiaries make up the energy segment namely Transcorp Energy Limited and Transcorp OPL 281 Limited. The companies are into the exploration, refining and marketing of petroleum products. The subsidiaries are in the start-up phase and have not started generating revenue.

### v Corporate Centre

This segment is the parent Company, Transnational Corporation Plc and the other non-operational subsidiaries.

The Board is the Chief Operating Decision Maker (CODM) and monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on profit or loss and is measured consistently with profit or loss in the consolidated financial statements. Also, the Group's financing (including finance costs, finance income and other income) and income taxes are managed on a Group basis and are not allocated to operating segments. Transfer prices between operating segments are on an arm's length basis in a manner similar to transactions with third parties.

Sales between segments are carried out at arm's length. The revenue from external parties reported to the group is measured in a manner consistent with that in the income statement.

Total segment assets are included in the reconciliation to the total statement of financial position assets.
