Unaudited results for the half-year ended 30 June 2022

MTN NIGERIA RELEASES UNAUDITED RESULTS FOR THE HALF-YEAR ENDED 30 JUNE 2022

Lagos Nigeria: 29 July 2022

Today, MTN Nigeria Communications Plc (MTN Nigeria) announces its unaudited results for the half-year ended 30 June 2022.

Salient points:

- Mobile subscribers increased by 7.6% to 74.1 million
 - o Added 5.7 million subscribers in H1 2022
- Active data users increased by 13.2% to 36.8 million
 - o Added 2.5 million active users in H1 2022
- Active fintech subscribers rose by 87.3% to 11.5 million
 - 4.2 million registered (2.4 million active) MoMo wallets since launch of PSB on 19 May 2022
- Service revenue increased by 19.9% to N947.9 billion
- Earnings before interest, tax, depreciation and amortisation (EBITDA) grew by 22.1% to N509.3 billion
- EBITDA margin increased by 0.9 percentage points (pp) to 53.6%
- Profit before tax (PBT) grew by 24.9% to N268.6 billion
- Profit after tax (PAT) grew by 28.1% to N181.6 billion
- Earnings per share (EPS) rose by 28.1% to N8.92 kobo
- Capital expenditure (Capex) rose by 67.1% to N311.6 billion (up 78.6% to N204.5 billion, excluding right of use assets)
- Interim dividend of N5.60 kobo per share, up by 23.1%

Unless otherwise stated, financial and non-financial information is year-on-year (YoY, 6M to June 2022 versus 6M to June 2021).

MTN Nigeria CEO, Karl Toriola comments:

During the first half of 2022, we made good progress in strengthening the resilience of the business in the face of our increasingly challenging operating environment with rising energy, food and general inflation putting pressure on consumer spending. The conflict in Ukraine as well as implementation of a "zero-COVID" policy in China, has also put a strain on global supply chains. To mitigate global supply chain

Unaudited results for the half-year ended 30 June 2022

and exchange rate risks, we accelerated capital expenditure for network expansion into the H1 2022.

We deployed capex of N311.6 billion to accelerate the rollout of our 4G network, which now covers 75.3% (compared to 65.1% in H1 2021) of the population and accounts for 77.9% of data traffic (compared to 67.2% in H1 2021).

In addition, having acquired one lot of 100MHz in the 3.5GHz spectrum band from the Nigerian Communications Commission (NCC), we are on track to launch 5G services across the country in Q3 2022. 5G technologies deliver significantly higher speeds and lower latency, potentially unlocking many new use cases for consumers and enterprises while improving network economics.

Since the directive from the NCC for all operators to restrict outgoing calls for subscribers whose SIMs are not associated with NINs, approximately 10 million of those affected have submitted their NIN, of which about 2.6 million have been reactivated following verification by National Identity Management Commission (NIMC). We continue to engage our affected customers and support NIMC in accelerating NIN enrolment in the country.

We maintained strong commercial momentum with a net addition of 5.7 million mobile subscribers in H1. This reflects a pleasing acceleration in the run-rate of monthly net additions during Q2, following the initial impact of the restriction of outgoing calls placed on subscribers who had not submitted their National Identity Number (NIN) as at 4 April 2022. Our aggressive drive for gross connections supported this recovery as we ramped up SIM registration and NIN enrolment capacity.

We added 2.5 million active data subscribers in H1 as we continued to drive data conversion from the new and existing subscriber base. In addition, we continue to enhance the quality and coverage of our network to accommodate the increasing demand for data.

We achieved some important strategic milestones in H1 towards delivering our Ambition 2025 strategy. This includes the final approval for our MoMo Payment Service Bank (PSB) and the commencement of commercial operations on 19 May 2022, leveraging the solid foundation of our existing MoMo business.

We are pleased with the progress since the launch and excited about the prospects of our fintech business and driving financial inclusion in the country. As at the end of June 2022, we recorded 4.2 million registered MoMo wallets of which 2.4 million are active, generating MoMo transaction volume of approximately 7 million within six weeks of operations.

MTN Nigeria Communications PLC

Corporate Head Office : MTN Plaza, Falomo, Ikoyi, Lagos. P.M.B. 80147 Adeola Odeku Post Office, Victoria Island, Lagos, Nigeria Website: www.mtnonline.com RC 395.010 **2** | Page

Unaudited results for the half-year ended 30 June 2022

Our financial performance during the period was underpinned by strong commercial momentum, driving broad-based growth across our key revenue lines such as data, fintech and digital services. However, growth developed at a slower rate in Q2 2022 mainly due to the restrictions arising from the new NIN-SIM directive, which came into effect on 4 April 2022. Consequently, service revenue grew by 19.9%, broadly in line with our medium-term growth guidance of 'at least 20%'.

Our ability to maintain service revenue growth while managing costs led to a 22.1% growth in EBITDA and a 0.9pp YoY expansion in EBITDA margin to 53.6%. This was achieved despite upward pressure on our operating expenses driven by higher lease rental costs, the acceleration in our site rollout and rising energy costs. The escalation of diesel prices in Nigeria impacted our EBITDA margin by about 0.3pp in H1. The robust EBITDA performance is a testament to the disciplined execution of our expense efficiency programme, which also underpinned our PAT growth of 28.1%.

Free cash flow was down by 14.3% due mainly to the accelerated capex, which was up 67.1%. In the second half, we expect capex to abate, which should benefit free cash flow in the remainder of the year. Our funding and liquidity are well managed, with net debt to EBITDA at 0.6 times. We will continue to invest in the resilience of our business and take advantage of growth opportunities while unlocking new revenue streams.

In line with our dividend policy, our Board of Directors has approved an interim dividend of N5.60 kobo per share to be paid out of distributable net income. This represents a growth of 23.1% over the N4.55 kobo per share paid in H1 2021.

As part of our work to build sustainable societies, we have made good progress on our rural telephony journey. During H1 2022, we added 370 rural sites, bringing the total to 1,553. We remain committed to driving increased telecommunications access to the unconnected.

MTN Nigeria Foundation continued its programs, training over 900 youths across six states in the 2022 edition of the ICT and business skills training, of which 200 people received equipment grants totalling N40 million. In addition, the Foundation completed and handed over fully furnished ICT Labs in 27 public secondary schools in 23 States, installed solar-powered boreholes in 16 states, and upgraded seven primary health care centres across the country.

Finally, we will continue executing our strategy to deliver service revenue growth in line with medium-term guidance. As we manage the increased pressures in the macroeconomy and our business, we will continue to focus on extracting efficiencies

Fintech Subscribers	11.5	6.1	87.3%	11.5	6.1	87.3%

Solid commercial momentum underpinning service revenue growth

Despite the slower growth recorded in Q2 due in large part to the restriction of outgoing calls for approximately 19 million of our subscribers (when initially implemented) in line with the NCC's directive, we remained largely on track, delivering service revenue growth in line with our medium-term guidance of at least 20% in H1.

Growth was driven mainly by data revenue, while voice was the most impacted by the restriction. However, we have seen a steady recovery in voice revenue since April 2022 as more customers are reactivated, and gross connections continue to ramp up, supported by increased usage from the existing base. Overall, **voice** revenue grew by 2.9% YoY in H1.

Unaudited results for the half-year ended 30 June 2022

Data revenue rose by 51.6%, maintaining the accelerated growth trajectory through increased subscribers and data usage. This was sustained by an aggressive 4G network expansion and enhanced quality and capacity of our network to support rising data traffic as we continue to drive the conversion of existing subscribers on the 3G network to 4G.

As a result, data traffic grew by 79.3% YoY, with 4G accounting for 77.9% of overall traffic, while data usage (MB per user) rose by 61.8%. The number of smartphones on our network continues to rise with the addition of about 3.4 million in H1, bringing smartphone penetration to 50.6%.

We continue to advance our goal to 'Own the Home' through differentiated value propositions while creating experiences that position MTN as the broadband service provider of choice. In H1, we added over 280k users, bringing our fixed broadband base to over 896k, with the deployment of broadband solutions including fibre, fixed wireless access (routers) and MiFi.

Fintech revenue rose by 27.8% and growth was broad-based across Xtratime, our airtime lending product, and mobile financial services. Xtratime accounted for 93.8% of the revenue from fintech services. Our fintech active users rose by 87.3% YoY to 11.5 million, of which 2.4 million represent active MoMo wallets. This has helped drive growth in the total volume of transactions to over 124.3 million.

Our MoMo PSB commenced commercial operations on 19 May 2022 and we are pleased with the progress thus far. Our primary focus has been to offer and scale basic services targeting the large unbanked segment and evolve into more advanced services across our fintech verticals, leveraging our vast distribution network.

Digital revenue grew by 60.9% as penetration of our digital products continues to deepen, driven by increased usage from our active base. Rich Media, Mobile Advertising and Content VAS drove revenue growth. We have reached approximately 9 million digital subscriptions (up 128.5% YoY), with ayoba (our instant messaging platform) accounting for 52.4% of the subscriptions and Rich Media accounting for 47.6%.

Revenue from the **enterprise** business rose by 44.6%, underpinned by the onboarding of new customers across segments and the uptake of our enhanced services. We remain on track with our plans to drive further adoption of enterprise platforms

(internet of things and cloud), creating additional value for our customers and enabling them to innovate while remaining profitable.

Value-based capital allocation drives efficiency and improves margins

We continue to realise cost savings through our expense efficiency programme and we remain disciplined with capital allocation. Cost of sales rose by 22.9% off a low base in the prior year, which was depressed by the suspension of new SIM sales and activations by the Regulator, lower device purchases during the period and the impact of growing gross connections in the current year.

Operating expenses (opex) increased by 15.1% due to the effects of Naira depreciation and higher dollar CPI on lease rental costs, the acceleration in our site rollout and rising energy costs. The escalation of diesel prices in Nigeria contributed to the 12.2% increase in direct network operating costs with a 0.3pp EBITDA margin impact.

Overall, our total expenses increased by 17.8%, below the service revenue growth rate. Consequently, our ability to drive operating leverage has enabled EBITDA growth of 22.1% and the expansion of our EBITDA margin by 0.9pp to 53.6%.

Depreciation and amortisation rose by 9.4%, resulting from increased site rollout, while net finance costs increased by 42.8% on higher borrowings as we raised N127 billion through commercial paper issuance in April 2022. Our Profit before tax (PBT) increased by 24.9% while our PAT rose by 28.1% despite the 18.7% increase in taxation due to the PBT growth, tax paid on investments in government securities following the expiration of the 10-year tax exemption period, and the education tax rate increase to 2.5%.

Capital expenditure in the period was N311.6 billion, up by 67.1%, due to accelerated coverage expansion, focusing on the 4G and 5G networks as well as our rural telephony programme. Core capex, excluding the right of use assets, increased by 78.6% to N204.5 billion.

We frontloaded some of our planned capex for the year in H1 to capture growth opportunities while mitigating foreign exchange and supply chain disruption risks as well as the impact of rising inflation. As a result, capex intensity increased by 7pp to 21.5%, temporarily exceeding our target levels. We deployed 127 5G sites in readiness to go live in Q3 2022. In addition, we rolled out 4,984 4G sites, representing an

MTN Nigeria Communications PLC

Corporate Head Office : MTN Plaza, Falomo, Ikoyi, Lagos. P.M.B. 80147 Adeola Odeku Post Office, Victoria Island, Lagos, Nigeria Website: www.mtnonline.com RC 395.010

Unaudited results for the half-year ended 30 June 2022

increase of 22.2% YoY and approximately 89% of the total sites deployed during the period. This is reflected in the solid data revenue growth.

The higher capex contributed to a 14.3% decline in free cash flow to N197.7 billion. However, we expect this to improve in H2 as the capex run-rate moderates over the remainder of the year.

Our funding and liquidity remain well-managed, supported by our cash flows and approved facilities. Our debt metrics remain well within all our financial covenants, with a net debt to EBITDA ratio of 0.6 times. As a result, we can comfortably meet our operational, financial and capex investment obligations. In addition, our foreign currency exposure is within manageable limits.

This was reflected in the outcome of our credit ratings. Agusto & Co. upgraded our issuer rating to Aa+ and maintained our stable outlook. GCR Ratings affirmed our national scale long-term and short-term issuer rating of AAA and A1+, respectively, with a stable outlook. Both agencies emphasized the Company's solid cash flow and leverage profile.

NIN-SIM linkage update

On 4 April 2022, the NCC directed all operators to restrict outgoing calls for subscribers whose SIMs are not associated with NINs. We implemented the directive on approximately 19 million of our affected subscribers at the time.

As at 30 June 2022, about 10 million of those initially restricted submitted their NINs for verification, of which approximately 2.6 million have been reactivated. In addition, we have seen an average of about 18.1% of monthly gross connections coming from the cohort of subscribers who were initially restricted. Combined with increased usage from the existing base, these have supported an acceleration in the sequential monthly service revenue growth recovery from April to June 2022.

In terms of how general traffic trends have evolved since the implementation of the directive, we have seen a gradual recovery in total voice traffic as the affected subscribers are reconnected to resume voice calls, and gross connections continue to ramp up. Data revenue has continued a steady increase supported by the switch to data by affected subscribers although it has not yet fully compensated for the decline in voice revenue of restricted subscribers.

MTN Nigeria Communications PLC

Corporate Head Office : MTN Plaza, Falomo, Ikoyi, Lagos. P.M.B. 80147 Adeola Odeku Post Office, Victoria Island, Lagos, Nigeria Website: www.mtnonline.com RC 395.010 **7** | Page

Unaudited results for the half-year ended 30 June 2022

We anticipate an increase in 'technical' churn in Q3 from affected subscribers who stopped activity after the initial restriction, opting instead to obtain new SIMs rather than reactivate their old lines. As we continue to engage our affected subscribers, drive NIN enrolment for subscribers who do not yet have a NIN (with over 8,300 points of enrolment across the country) and support NIMC in addressing capacity challenges, we believe that mitigating actions will recover the base in line with our broad expectations for FY 2022.

Outlook

The business continues to face some strong headwinds such as rising general inflation, paucity of foreign exchange, supply chain disruptions, and higher diesel and petrol prices, which places more financial pressure on our customers as well as our business.

We, however, remain focused on building on the solid foundation of growth we have laid thus far. We will continue to ramp up gross connections to grow our subscriber base to offset the impact of the expected increase in churn in Q3 2022. We will continue accelerating rural connectivity and expanding our 4G network towards achieving our goal of 80% coverage by year-end.

We plan to commence the initial launch of 5G services in the six geopolitical zones in Q3 2022, per our licence requirement, and unlock many new use cases for consumers and enterprises. We will also continue to pursue our home broadband strategy to capture a significant share of market growth while leveraging the fixed wireless access, fibre and 5G technologies for enhanced speeds.

The interventions we put in place to moderate the impact of the NIN-SIM linkage regulation on revenue and the anticipated increase in churn in Q3 2022 continue to yield results, although NIMC's validation capacity remains a challenge for which we will continue to provide support. This will impact the development of our subscriber base in Q3 2022. However, we anticipate a more normalised trajectory in Q4 2022.

Having commenced MoMo PSB commercial operations, our goal is to build an inclusive platform for customers, ecosystem partners and other stakeholders. In addition, we plan to provide more advanced services working with ecosystem partners in the country.

As we execute our strategy to sustain growth, we will continue implementing appropriate interventions as we navigate the challenging operating environment. MTN Nigeria Communications PLC

Corporate Head Office : MTN Plaza, Falomo, Ikoyi, Lagos. P.M.B. 80147 Adeola Odeku Post Office, Victoria Island, Lagos, Nigeria Website: www.mtnonline.com RC 395.010 **8** | Page

Unaudited results for the half-year ended 30 June 2022

This includes driving cost management across the business through our expense efficiency programme and strengthening our operations and financial position to improve shareholder returns.

As guided in our Q1 2022 results announcement, we anticipate that our revenue and margins in the current year will be slightly impacted in the near term by the NCC's directive on NIN-SIM linkage and a more aggressive roll-out on the Payment Service Bank than originally planned. There will also be an impact on margins from energy price inflation, but our exposure is mitigated in most of our tower contracts.

In addition, as we continue to drive NIN-SIM linkage for our subscribers, as well as accelerate our investment to rollout PSB across the country, we expect EBITDA margins for the full year to be slightly below our medium-term target range of 53-55%. We currently expect that our full-year capital expenditure will be approximately N340 billion on an IAS 17 basis.

We maintain our service revenue guidance of "at least 20%" over the medium term, while remaining mindful of the near-term impacts of changes in the regulatory and operating environment as the rest of the year unfolds. We remain committed to executing our Ambition 2025 strategy to sustain the growth and profitability of the business to the benefit of all our stakeholders.
