Employees and Employment

Employees' Health, Safety and Environment

The Company strictly observes all health and safety regulations. The Company maintains business premises designed with a view to guaranteeing the safety and healthy living conditions of its employees and customers alike. Employees are adequately insured against occupational and other hazards. Financial provision is also made for all employees in respect of transportation, housing, medical expenses and meals.

Employment of Disabled Persons

It is the policy of the Company that there is no discrimination in considering applications for employment including those of physically challenged persons. All employees whether physically challenged or not are given equal opportunities to develop their knowledge and to qualify for promotion in furtherance of their careers.

Employees' Involvement and Training

The Company is committed to keeping employees fully informed as much as possible regarding the Company's performance and progress. Views of employees are sought, where practicable, on matters which particularly affect them as employees. The Company runs an open door management policy. Management, professional and technical expertise are the Company's major assets and investment in developing such skills is continuous. The Company's expanding skills base is being brought about by a wide range of in-house and external training. Opportunities for career development within the company have also been broadened.

Incentive schemes designed to meet the circumstances of each individual are implemented wherever appropriate and some of these schemes include staff retirement benefit, productivity bonus, promotion and salary review.

Statement of Directors' Responsibilities

In accordance with the provisions of Section 334 and 335 of the Companies and Allied Matters Act 2004 and Sections 24 and 28 of the Banks and Other Financial Institutions Act 1991, the Directors are responsible for the preparation of annual financial statements which give a true and fair view of the financial position at the end of the financial year of the Company and of the operating result for the year then ended.

The responsibilities include ensuring that:

- Appropriate and adequate internal controls are established to safeguard the assets of the Company and to prevent and detect fraud and other irregularities;
- The Company keeps proper accounting records which disclose with reasonable accuracy the financial position of the Company and which ensure that the financial statements comply with the requirements of the Financial Reporting Council Act 2011, Companies and Allied Matters Act, 2004, Insurance Act 2003.
- The Company has used appropriate accounting policies, consistently applied and supported by reasonable and prudent judgments and estimates, and that all applicable accounting standards have been followed; and
- The financial statements are prepared on a going concern basis unless it is presumed that the Company will not continue in business.

The Directors accept responsibility for the year's financial statements, which have been prepared using appropriate accounting policies supported by reasonable and prudent judgments and estimates in conformity with;

- First-time Adoption – IFRS 1
- Financial Reporting Council Act 2011
- Insurance Act 2003
- Companies and Allied Matters Act 2004

The Directors are of the opinion that the financial statements give a true and fair view of the state of the financial affairs of the Company and of its operating result for the year ended.

The Directors further accept responsibility for the maintenance of accounting records that may be relied upon in the preparation of the financial statements, as well as adequate systems of financial control.

Nothing has come to the attention of the Directors to indicate that the Company will not remain a going concern for at least twelve months from the date of this statement.

Signed on behalf of the Directors on June 9, 2014 by:

SOVEREIGN TRUST INSURANCE PLC
ANNUAL REPORT AND FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2013

Certification Pursuant to Section 60(2) of Investment and Securities Act No. 29 of 2007

We the undersigned hereby certify the following with regards to our Audited Financial Statements for the year ended December 31, 2013 that:

- We have reviewed the report;
- To the best of our knowledge, the report does not contain:
 - Any untrue statement of a material fact, or
 - Omit to state a material fact, which would make the statements, misleading in the light of circumstances under which such statements were made;
- To the best of our knowledge, the financial statement and other financial information included in the report fairly present in all material respects the financial condition and results of operation of the company as of, and for the periods presented in the report.
- We:
 - Are responsible for establishing and maintaining internal controls.
 - Have designed such internal controls to ensure that material information relating to the company and its consolidated subsidiary is made known to such officers by others within those entries particularly during the period in which the periodic reports are being prepared;
 - Have evaluated the effectiveness of the company's internal controls as of date within 90 days prior to the report;
 - Have presented in the report our conclusions about the effectiveness of our internal controls based on our evaluation as of that date;
- We have disclosed to the auditors of the company and audit committee:
 - All significant deficiencies in the design or operation of internal controls which would adversely affect the company's ability to record, process, summarize and report financial data and have identified for the company's auditors any material weakness in internal controls, and
 - Any fraud, whether or not material, that involves management or other employees who have significant role in the company's internal controls;

We have identified in the report whether or not there were significant changes in internal controls or other factors that could significantly affect internal controls subsequent to the date of our evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

Independent Auditor's Report
To the members of Sovereign Trust Insurance Plc

We have audited the accompanying financial statements of Sovereign Trust Insurance Plc (the Company) the Statement of Financial Position as at December 31, 2013, and the Statement of Comprehensive Income, Cash Flows Statement and the statement of significant accounting policies on pages 18 to 44 and explanatory notes to the financial statements, as set out on pages 49 to 51.

Director's Responsibility for the Financial Statements

The directors are responsible for the preparation and presentation of these financial statements in accordance with International Financial Reporting Standards (IFRS) and in the manner required by the Companies and Allied Matters Act, 2004 (CAMA 2004), Financial Reporting Council (FRC) 2011, the Insurance Act 2003 of Nigeria, the Investments and Securities Act 2007 and National Insurance Commission (NAICOM) circulars. This responsibility includes designing, implementing and maintaining internal controls relevant to the preparation and presentation of financial statements that are free from material misstatement, whether due to fraud or error, selecting and applying appropriate accounting policies and making judgements and estimates that are reasonable in the circumstances.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Nigerian Standards on Auditing (NSA) and International Standards on Auditing (ISA). Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

Our audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. These procedures include assessing the risk of material misstatement, whether due to fraud or error, and performing other procedures to respond to those risks. These procedures include examining internal control relevant to the entity's preparation and presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the

purpose of expressing an opinion on the effectiveness of the entity's internal controls. Our audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements give a true and fair view of the financial position of Sovereign Trust Insurance Plc as at December 31, 2013, and of its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs) applicable and in the manner required by the Financial Reporting Council (FRC) Companies and Allied Matters Act 2004, the Insurance Act 2003 of Nigeria, the Investments and Securities Act 2007 and the relevant NAICOM circulars.

Report on Other Legal/Regulatory Requirements: Compliance with the requirements of the Companies and Allied Matters Act 2004

In our opinion, proper books of account have been kept by the Company, so far as appears from our examination of those books and other relevant financial position and comprehensive accounts in agreement with the books of account.

Emphasis of Matter

We draw your attention to note 48 of the financial statements which indicates that the Company's Solvency Margin is less than the minimum regulatory solvency requirement of 15%.

Date: 13/04/2014

Report of the Audit Committee

To the members of Sovereign Trust Insurance Plc

In accordance with the provisions of Section 359(6) of the Companies and Allied Matters Act, Cap 59 of the Laws of the Federation of Nigeria 2004, we the Members of the Audit Committee of Sovereign Trust Insurance Plc, has carried out our statutory functions under the Act, hereby report as follows:

- We have reviewed the scope and planning of the audit for the year ended December 31, 2013 and we confirm that they were adequate.
- The Company's reporting and accounting policies as well as internal control systems conform to legal requirements and agreed ethical practices.
- We are satisfied with the departmental responses to the External Auditors' findings on management matters for the year ended December 31, 2013.

Finally, we acknowledge and appreciate the co-operation of Management and Staff in the conduct of these duties.

Mr. Bimbo Oguntunde
Chairman of the Audit Committee
FRC/2013/NIM/00000003361

Date 27/05/14

Members of the Audit Committee

Mr. Bimbo Oguntunde	•	(Shareholders' Representative)	Chairman
Otunba Femi Dina	•	(Shareholders' Representative)	Member
Mrs. Adefemi .A. Taire	•	(Directors' Representative)	Member
Sir (Dr.) Ogala Osoka	•	(Directors' Representative)	Member

The Company Secretary/Legal Adviser acted as the Secretary to the Committee.

Statement of Significant Accounting Policies

1. General information

The company was incorporated as a limited liability company on February 26, 1980, but was reorganized and commenced business as a reorganized non-life insurance company on 2nd January 1995 with an authorized share capital of N30 million and a fully paid up capital of the N20 million following the acquisition and recapitalization of the then Grand Union Assurances Limited.

The principal activity of the Company continues to be the provision of all classes of non-life insurance and special risk insurance, settlement of claims and Insurance of Policy Holders' Fund. The Company, currently having its corporate head office at 17 Ademola Adetokunbo Street, Victoria Island, Lagos with 21 other branches spread across major cities and commercial centers in Nigeria, became a Public Limited Company (Plc) on the 7th of April 2004 and was listed on the Nigerian Stock Exchange on 29th November 2006.

These financial statements were authorized by the Board on 9th June 2014

2. Going Concern

These financial statements have been prepared on the going concern basis. The Company has no intention or need to reduce substantially its business operations and management believes that the going concern assumption is appropriate for the Company due to sufficient capital adequacy ratio and projected liquidity, based on historical experience that short-term obligations will be refinanced in the normal course of the business. Liquidity ratio and continuous evaluation of current ratio of the Company is carried out by the Company to ensure that there are no going concerns threats to the operation of the Company.

3 Summary of significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

3.1 Basis of Preparation and Compliance with IFRS

These financial statements are the stand alone financial statements of Sovereign Trust Insurance. The Company's financial statements for the year 2013 have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the IASB. Additional information required by national regulations is included where appropriate.

Functional and Presentation of Currency

The financial statements are presented in Nigerian currency (Naira) which is the Company's functional currency. Except otherwise indicated, financial information presented in Naira have been rounded to the nearest thousand.

Basis of Measurement

The financial statements have been prepared under the historical cost basis except for the following:

- Financial instruments at fair value through profit or loss which are measured at fair value through profit or loss.
- Financial assets classified as available for sale which are measured at fair value through other comprehensive income.
- Loans and receivables and held to maturity financial assets and financial liabilities

Summary of Significant Accounting Policies (Cont'd)

which are measured at amortised cost.

- Investment properties which are measured at fair value.

3.2 Critical Accounting Estimates, Judgments and Assumptions

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Company's accounting policies. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions and conditions. Changes in assumptions may have a significant impact on the financial statements in the period the assumptions changed. Management believes that the underlying assumptions are appropriate and that the Company's financial statements therefore present the financial position and results fairly.

3.3 Judgement, Estimates and Assumption

The estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised, if the revision affects only that period or if the revision affects both current and future periods.

Information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements are described below:

3.3.1 Income Taxes

Significant estimates are required in determining the provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain. The Company recognises liabilities for anticipated tax issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions.

3.3.2 Retirement benefits

The present value of the retirement benefit obligations depends on a number of factors that are determined on an actuarial basis using a number of assumptions. Any changes in these assumptions will impact the carrying amount of gratuity obligations. The assumptions used in determining the net cost (income) for gratuity include the discount rate, rate of return on assets, future salary increments and mortality rates. The Company determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the gratuity obligations. In determining the appropriate discount rate, the Company considers the interest rates of high-quality government bonds that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating the terms of the related gratuity liability. Other key assumptions for gratuity obligations are based in part on current market conditions.

In most cases, no explicit assumptions are made regarding future rates of claims inflation or loss ratios. Instead, the assumptions used are those implicit in the historical claims development data on which the projections are based. Additional qualitative judgement is used to assess the extent to which past trends may not apply in future, (e.g., to reflect one-

Summary of Significant Accounting Policies (Cont'd)

off occurrences, changes in external or market factors such as public attitudes to claiming, economic conditions, levels of claims inflation, judicial decisions and legislation, as well as internal factors such as portfolio mix, policy features and claims handling procedures) in order to arrive at the estimated ultimate cost of claims that present the likely outcome from the range of possible outcomes, taking account of all the uncertainties involved.

Similar judgements, estimates and assumptions are employed in the assessment of adequacy of provisions for unearned premium. Judgement is also required in determining whether the pattern of insurance service provided by a contract requires amortisation of unearned premium on a basis other than time apportionment.

3.3.3 Fair valuation of investment properties

The fair value of investment properties is based on the nature, location and condition of the specific asset. The fair value is determined by reference to observable market prices. The fair value of investment property does not reflect future capital expenditure that will improve or enhance the property and does not reflect the related future benefits from this future expenditure. These valuations are performed annually by external appraisers. Assumptions are made about expected future cashflows and the discounting rates.

3.4 Improvements to IFRSs

Below are the IFRSs and International Financial Reporting Interpretations Committee (IFRIC) interpretations that are effective for the first time for the financial period beginning on or after 1 January 2013 that would be expected to have an impact on the company.

3.4.1 IFRS Updates (Effective in 2013 and beyond) and IFRS Updates in 2013

List of amendments

Amendments Issued 2013

- Recoverable Amount Disclosures for Non Financial Assets- IAS 36 (Issued May 2013)
- IFRIC 21: New Interpretation (Issued May 2013)
- Novation of Derivatives and Continuation of Hedge Accounting for novations (Issued June 2013)

Amendments Effective 1st January, 2013

1. **IFRS 1 (First time Adoption):** IFRS 1 amendment includes an exception to the retrospective application of IFRS 9(Financial Instruments) and IAS 20 (Accounting for government grants).
2. **IAS 19 (Employee benefit):** This includes certain amendments such as **eliminating the corridor approach** to recognizing actuarial gains and losses.
3. **IFRS 7 (Financial Instruments- Disclosures):** The amendments require an entity to disclose information about rights of set-off (financial assets and liabilities) and related arrangements.
4. **IFRS 10 (Consolidated Financial Statement), IAS 27(Separate Financial Statements):** This amendment addresses IFRS 10 for consolidated financial statements and IAS 27 for separate financial statements. It also revises the definition of control.
5. **IFRS 12 (Disclosures):** IFRS 12 requires certain disclosures to facilitate understanding of financial statements by users of financial statements.

Summary of Significant Accounting Policies (Cont'd)

6. **IFRS 13 (Fair value measurement):** IFRS 13 gives a definition for fair value wherever fair value is used under IFRS with the exclusion of fair value under IFRS 2 (Share based payment) and IAS 17(Leases).
7. **IAS 32(Off-setting financial Assets and Financial Liabilities -Amendments to IAS 32) :** IAS 32 clarifies the meaning of “ legally enforceable rights to set off”
8. **Investment Entities- Amendments to IFRS 10, IFRS 12, and IAS 27:** This amendment requires Investment entities to account for investment in subsidiaries at Fair value through profit or loss in accordance with IAS 39. In addition, a criterion for qualifying as an Investment entity is that Investments in associates and Joint ventures are accounted for at Fair value through profit or loss in accordance with IAS 39.
9. **Novation of Derivatives and Continuation of Hedge Accounting- IAS 39 Amendments:** Amendments to IAS 39 provides relief from discontinuing hedge accounting for novations of hedging instruments that meet certain criteria.
10. **Recoverable Amount Disclosures for Non financial Assets- Amendments to IAS 36:** This amendment removes the requirements for an entity to disclose the recoverable amount of every CGU to which significant goodwill or indefinite – lived intangible assets have been allocated. Instead, such disclosure is required only when an impairment loss has been recognized or reversed.
11. **IFRIC 21:** IFRIC 21 provides guidance on determining the obligating event that give rise to a liability in connection with a levy imposed by a government. IFRIC 21 clarifies that the obligating event is the activity that triggers the payment of the levy as identified by the legislation. Income taxes in the scope of IAS 12, fines and penalties are not in the scope of IFRIC 21.

Effective January 1st, 2015

12. **IFRS 9 (Financial Instruments):** These amendments apply to the classification and measurement of financial assets and liabilities.
13. **IFRS 1: Government Loans — Amendments to IFRS 1**

Effective for annual periods beginning on or after 1 January 2013

Key requirements

The IASB has added an exception to the retrospective application of IFRS 9 Financial Instruments (or IAS 39 Financial Instruments: Recognition and Measurement, as applicable) and IAS 20 Accounting for Government Grants and Disclosure of Government Assistance. These amendments require first-time adopters to apply the requirements of IAS 20 prospectively to government loans existing at the date of transition to IFRS.

However, entities may choose to apply the requirements of IFRS 9 (or IAS 39, as applicable) and IAS 20 to government loans retrospectively if the information needed to do so had been obtained at the time of initially accounting for that loan.

Summary of Significant Accounting Policies (Cont'd)

The exception would give first-time adopters relief from retrospective measurement of government loans with a below market rate of interest. As a result of not applying IFRS 9 (or IAS 39, as applicable) and IAS 20 retrospectively, first-time adopters would not have to recognise the corresponding benefit of a below-market rate government loan as a government grant.

Transition

The amendments may be applied earlier than the effective date, in which case, this must be disclosed.

Impact

These amendments give first-time adopters the same relief as existing preparers of IFRS financial statements and therefore will reduce the cost of transition to IFRS

➤ IAS 19 Employee Benefits (Revised)

Effective for annual periods beginning on or after 1 January 2013.

Key requirements

The revised standard includes a number of amendments that range from fundamental changes to simple clarifications and re-wording.

The more significant changes include the following:

- For defined benefit plans, the ability to defer recognition of actuarial gains and losses (i.e., the corridor approach) has been removed. As revised, actuarial gains and losses are recognised in OCI as they occur. Amounts recorded in profit or loss are limited to current and past service costs, gains or losses on settlements, and net interest income (expense). All other changes in the net defined benefit asset (liability) are recognised in OCI with no subsequent recycling to profit or loss.
- Objectives for disclosures of defined benefit plans are explicitly stated in the revised standard, along with new or revised disclosure requirements. These new disclosures include quantitative information about the sensitivity of the defined benefit obligation to a reasonably possible change in each significant actuarial assumption.
- Termination benefits will be recognised at the earlier of when the offer of termination cannot be withdrawn, or when the related restructuring costs are recognised under IAS 37 Provisions, Contingent Liabilities and Contingent Assets.
- The distinction between short-term and other long-term employee benefits will be based on the expected timing of settlement rather than the employee's entitlement to the benefits.

Transition

The revised standard is applied retrospectively in accordance with the requirements of IAS 8 for changes in accounting policy. There are limited exceptions for restating assets outside the scope of IAS 19 and presenting sensitivity disclosures for comparative periods in the period the amendments are first effective. Early application is permitted and must be disclosed.

Impact

These changes represent a significant further step in reporting gains and losses outside of profit and loss, with no subsequent recycling. Actuarial gains and losses will be excluded permanently from earnings.

Summary of Significant Accounting Policies (Cont'd)

➤ IFRS 7: Disclosures — Offsetting Financial Assets and Financial Liabilities — Amendments to IFRS 7

Effective for annual periods beginning on or after 1 January 2013.

Requirements

These amendments require an entity to disclose information about rights of set-off and related arrangements (e.g., collateral agreements). The disclosures would provide users with information that is useful in evaluating the effect of netting arrangements on an entity's financial position. The new disclosures are required for all recognised financial instruments that are set off in accordance with IAS 32 Financial Instruments.

Presentation

The disclosures also apply to recognised financial instruments that are subject to an enforceable master netting arrangement or 'similar agreement', irrespective of whether they are set off in accordance with IAS 32.

Transition

These amendments are applied **retrospectively** in accordance with IAS 8. They do not refer to the ability to adopt early. However, if an entity chooses to early adopt IAS 32 "Offsetting Financial Assets and Financial Liabilities — Amendments to IAS 32, it also must make the disclosure required by IFRS 7 Disclosures — Offsetting Financial Assets and Financial liabilities — Amendments to IFRS 7.

➤ IFRS 10 Consolidated Financial Statements, IAS 27 Separate Financial Statements

Effective for annual periods beginning on or after 1 January 2013.

Key requirements

IFRS 10 replaces the portion of IAS 27 that addresses the accounting for consolidated financial statements. It also addresses the issues raised in SIC-12 *Consolidation — Special Purpose Entities* which resulted in SIC-12 being withdrawn. IAS 27, as revised, is limited to the accounting for investments in subsidiaries, joint ventures, and associates in separate financial statements.

IFRS 10 does not change consolidation procedures (i.e., how to consolidate an entity). Rather, IFRS 10 changes whether an entity is consolidated by revising the definition of control.

Control exists when an investor has:

- Power over the investee (defined in IFRS 10 as when the investor has existing rights that give it the current ability to direct the relevant activities)
- Exposure, or rights, to variable returns from its involvement with the investee and
- The ability to use its power over the investee to affect the amount of the investor's returns.

IFRS 10 also provides a number of clarifications on applying this new definition of control, including the following key points:

- An investor is any party that potentially controls an investee; such party need not hold an equity investment to be considered an investor.
- An investor may have control over an investee even when it has less than a majority of the voting rights of that investee (sometimes referred to as de facto control).

Summary of Significant Accounting Policies (Cont'd)

- Exposure to risks and rewards is an indicator of control, but does not in itself constitute control.
- When decision-making rights have been delegated or are being held for the benefit of others, it is necessary to assess whether a decision-maker is a principal or an agent to determine whether it has control.
- Consolidation is required until such time as control ceases, even if control is temporary.

Transition

The new standard is applied retrospectively in accordance with the requirements of IAS 8 for changes in accounting policy, with some relief being provided.

Earlier application is permitted if the entity also applies the requirements of IFRS 11 Joint Arrangements, IFRS 12 Disclosure of Interests in Other Entities, IAS 27 (as revised in 2011) and IAS 28 Investments in Associates (as revised in 2011) at the same time.

Impact

IFRS 10 creates a new, and broader, definition of control than under current IAS 27. This may result in changes to a consolidated group (more or fewer entities being consolidated than under current IFRS).

Assessing control will require a comprehensive understanding of an investee's purpose and design, and the investor's rights and exposures to variable returns, as well as rights and returns held by other investors. This may require input from sources outside of the accounting function, such as operational personnel and legal counsel, and information external to the entity. It will also require significant judgment of the facts and circumstances.

➤ IFRS 12 Disclosure of Interests in Other Entities

Effective for annual periods beginning on or after 1 January 2013.

Key requirements

IFRS 12 applies to an entity that has an interest in subsidiaries, joint arrangements, associates and/or structured entities. Many of the disclosure requirements of IFRS 12 were previously included in IAS 27, IAS 31, and IAS 28, while others are new.

The objective of the new disclosure requirements is to help the users of financial statements understand the following:

- The effects of an entity's interests in other entities on its financial position, financial performance and cash flows
- The nature of, and the risks associated with, the entity's interest in other entities

Some of the more extensive qualitative and quantitative disclosures of IFRS 12 include:

- Summarised financial information for each of its subsidiaries that have non-controlling interests that are material to the reporting entity.
- Significant judgments used by management in determining control, joint control and significant influence, and the type of joint arrangement (i.e., joint operation or joint venture), if applicable.
- Summarised financial information for each individually material joint venture and associate.
- Nature of the risks associated with an entity's interests in unconsolidated structured entities, and changes to those risks.

Summary of Significant Accounting Policies (Cont'd)

Transition

IFRS 12 must be applied retrospectively in accordance with the requirements of IAS 8 for changes in accounting policy, with comparative disclosures required.

An entity may early adopt IFRS 12 before adopting IFRS 10, IFRS 11, IAS 27 and IAS 28. Entities are also encouraged to provide some of the information voluntarily without necessarily adopting all of IFRS 12 before its effective date.

Impact

The new disclosures will assist users to make their own assessment of the financial impact were management to reach a different conclusion regarding consolidation. Additional procedures and changes to systems may be required to gather information for the preparation of the additional disclosures.

➤ IFRS 13 Fair Value Measurement

Effective for annual periods beginning on or after 1 January 2013.

Key requirements

IFRS 13 does not affect when fair value is used, but rather describes how to measure fair value where fair value is required or permitted by IFRS. Fair value under IFRS 13 is defined as “the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date” (i.e., an “exit price”). “Fair value” as used in IFRS 2 Share-based Payments and IAS 17 Leases is excluded from the scope of IFRS 13.

The standard provides clarification on a number of areas, including the following:

- Concepts of “highest and best use” and “valuation premise” are relevant only for non-financial assets and liabilities
- Market participants are assumed to transact in a way that maximizes value in situations where the unit of account for the item being measured is not clear from other IFRS
- The impact of blockage discounts is prohibited in all fair value measurements
- A description of how to measure fair value when a market becomes less active.

New disclosures related to fair value measurements are also required to help users understand the valuation techniques and inputs used to develop fair value measurements and the effect of fair value measurements on profit or loss.

Transition

IFRS 13 is applied prospectively. Early application is permitted and must be disclosed.

Impact

Specific requirements relating to the highest and best use and the principal market may require entities to re-evaluate their processes and procedures for determining fair value, and assess whether they have the appropriate expertise.

➤ IAS 32 (Offsetting Financial Assets and Financial Liabilities) — Amendments to IAS 32

Effective for annual periods beginning on or after 1 January 2014.

Summary of Significant Accounting Policies (Cont'd)

Key requirements

These amendments clarify the meaning of “currently has a legally enforceable right to set-off”. The amendments also clarify the application of the IAS 32 offsetting criteria to settlement systems (such as central clearing house systems) which apply gross settlement mechanisms that are not simultaneous. IAS 32 paragraph 42(a) requires that “a financial asset and a financial liability shall be offset ... when, and only when, an entity currently has a legally enforceable right to set off the recognised amounts ...” The amendments clarify that rights of set-off must not only be legally enforceable in the normal course of business, but must also be enforceable in the event of default and the event of bankruptcy or insolvency of all of the counterparties to the contract, including the reporting entity itself. The amendments also clarify that rights of set-off must not be contingent on a future event. The IAS 32 offsetting criteria require the reporting entity to intend either to settle on a net basis, or to realise the asset and settle the liability simultaneously. The amendments clarify that only gross settlement mechanisms with features that eliminate or result in insignificant credit and liquidity risk and that process receivables and payables in a single settlement process or cycle would be, in effect, equivalent to net settlement and, therefore, meet the net settlement criterion.

Transition

These amendments are applied retrospectively, in accordance with IAS 8. Early application is permitted. However, if an entity chooses to early adopt, it must disclose that fact and also make the disclosure required by IFRS 7 Disclosures — Offsetting Financial Assets and Financial liabilities — Amendments to IFRS 7.

Impact

Entities will need to review legal documentation and settlement procedures, including those applied by the central clearing houses they deal with to ensure that offsetting of financial instruments is still possible under the new criteria. Changes in offsetting may have a significant impact on financial presentation. The effect on leverage ratios, regulatory capital requirements, etc., will need to be considered by management.

➤ Investment Entities- IFRS 10, IFRS 12 and IAS 27 (Amendments)

Effective for annual periods beginning on or after 1 January 2014.

Key requirements

The investment entities amendments apply to investments in subsidiaries, joint ventures and associates held by a reporting entity that meets the definition of an investment entity.

The key amendments include:

- Investment entity' is defined in IFRS 10
- An investment entity must meet three elements of the definition and consider four typical characteristics, in order to qualify as an investment entity
- An entity must consider all facts and circumstances, including its purpose and design, in making its assessment
- An investment entity accounts for its investments in subsidiaries, associates and joint ventures at fair value through profit or loss in accordance with IFRS 9 (or IAS 39, as applicable), except

Summary of Significant Accounting Policies (Cont'd)

for investments in subsidiaries, associates and joint ventures that provide services that relate only to the investment entity, which must be consolidated (investments in subsidiaries) or accounted for using the equity method (investments in associates or joint ventures)

- An investment entity must measure its investment in another controlled investment entity at fair value
- A non-investment entity parent of an investment entity is not permitted to retain the fair value accounting that the investment entity subsidiary applies to its controlled investees
- For venture capital organizations, mutual funds, unit trusts and others that do not qualify as investment entities, the existing option in IAS 28, to measure investments in associates and joint ventures at fair value through profit or loss, is retained.

Transition

The amendments must be applied retrospectively, subject to certain transition reliefs. Early application is permitted and must be disclosed.

Impact

The concept of an investment entity is new to IFRS. The amendments represent a significant change for investment entities, which are currently required to consolidate investees that they control. Significant judgment of facts and circumstances may be required to assess whether an entity meets the definition of investment entity.

Effective Jan 1st, 2015

➤ IFRS 9 Financial Instruments — Classification and Measurement

IFRS 9 for financial assets was first published in November 2009 and was later updated in October 2010 to include financial liabilities. These pronouncements initially required the adoption of the standard for annual periods on or after 1 January 2013. Amendments to IFRS 9 Mandatory Effective Date of IFRS 9 and Transition Disclosures, issued in December 2011, moved the mandatory effective date of both the 2009 and 2010 versions of IFRS 9 from 1 January 2013 to 1 January 2015.

Key requirements

The first phase of IFRS 9 addresses the classification and measurement of financial instruments (Phase 1). The Board's work on the other phases is ongoing and includes impairment of financial instruments and hedge accounting, with a view to replacing IAS 39 in its entirety. Phase 1 of IFRS 9 applies to all financial instruments within the scope of IAS 39.

Financial assets

All financial assets are measured at fair value at initial recognition.

Debt instruments may, if the Fair Value Option (FVO) is not invoked, be subsequently measured at amortised cost if:

- The asset is held within a business model that has the objective to hold the assets to collect the contractual cash flows and
- The contractual terms of the financial asset give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal outstanding.
- All other debt instruments are subsequently measured at fair value.

Summary of Significant Accounting Policies (Cont'd)

- All equity investment financial assets are measured at fair value either through other comprehensive income (OCI) or profit or loss.

Equity instruments held for trading must be measured at fair value through profit or loss. However, entities have an irrevocable choice by instrument for all other equity financial assets.

Financial liabilities

For FVO liabilities, the amount of change in the fair value of a liability that is attributable to changes in credit risk must be presented in OCI. The remainder of the change in fair value is presented in profit or loss, unless presentation of the fair value change in respect of the liability's credit risk in OCI would create or enlarge an accounting mismatch in profit or loss.

All other IAS 39 classification and measurement requirements for financial liabilities have been carried forward into IFRS 9, including the embedded derivative separation rules and the criteria for using the FVO.

Transition

The entity may choose to apply the classification and the measurement requirements of IFRS 9 retrospectively, in accordance with the requirements of IAS 8. However, the restatement of comparative period financial statements is not required.

IFRS 7 has been amended to require additional disclosures on transition from IAS 39 to IFRS 9. The new disclosures are either required or permitted on the basis of the entity's date of transition and whether the entity chooses to restate prior periods.

Early application of the financial asset requirements is permitted.

Early application of the financial liabilities requirements is permitted if the entity also applies the requirements for financial assets. Early application must be disclosed.

Impact

Phase 1 of IFRS 9 will have a significant impact on:

- The classification and measurement of financial assets
- Reporting for entities that have designated liabilities using the FVO

For entities considering early adoption, there are a number of benefits and challenges that should be considered. Careful planning for this transition will be necessary

Summary of Significant Accounting Policies (Cont'd)

4 Cash and cash equivalents

Cash and cash equivalents are balances that are held for the primary purpose of meeting short term cash commitments. Hence this includes cash in hand and cash equivalents that are readily convertible to known amount of cash, are subject to insignificant risk of changes in value and whose original maturity is three months or less.

This includes cash on hand, deposit held at call with banks and other short term highly liquid investments which originally matures in three months or less.

5 Financial assets

In accordance with IAS 39, all financial assets – which include derivative financial instruments – have to be recognised in the statement of financial position and measured in accordance with their assigned category.

5.1 Financial assets

The Company classifies financial assets into the following IAS 39 categories: (a) financial assets at fair value through profit or loss; loans and receivables; held-to-maturity investments and available-for-sale financial assets. Management determines the classification of its financial instruments at initial recognition and the classification depends on the purpose for which the investments were acquired.

(a) Financial assets at fair value through profit or loss

This category comprises two sub-categories: financial assets classified as held for trading, and financial assets designated by the Company as at fair value through profit or loss upon initial recognition.

A financial asset is classified as held for trading if it is acquired or incurred principally for the purpose of selling or repurchasing it in the near term or if it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking.

Financial instruments included in this category are recognised initially at fair value; transaction costs are taken directly to the Statement of Comprehensive Income. Gains and losses arising from changes in fair value are included directly in the statement of comprehensive income. Interest income and expense and dividend income and expenses on financial assets held for trading are included in the Statement of Comprehensive Income.

The Company's investments in quoted equities are carried at fair value through profit or loss.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than:

(1) those that the Company intends to sell immediately or in the short term, which are classified as held for trading, and those that the entity upon initial recognition designated as at fair value through profit or loss;

(2) those that the Company upon initial recognition designates as available for sale; or

(3) those for which the holder may not recover substantially all of its initial investment, other than because of credit deterioration.

Summary of Significant Accounting Policies (Cont'd)

Loans and receivables are initially recognised at fair value – which is the cash consideration to originate or purchase the loan including any transaction costs – and measured subsequently at amortised cost less impairment (if any) using the effective interest rate method. Interest is included in the statement of comprehensive income and reported under investment income.

C Held to maturity financial assets

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Company's management has the positive intention and ability to hold to maturity, other than:

- (1) those that the Company upon initial recognition designated as at fair value through profit or loss;
- (2) those that the Company designates as available-for-sale; and
- (3) those that meet the definition of loans and receivables.

These are initially recognised as at fair value including direct and incremental transaction costs and measured subsequently at amortised cost, using the effective interest method.

Interest on held-to-maturity investments is included in the statement of comprehensive income and reported under investment income.

(d) Available-for-sale financial assets

Available-for-sale investments are financial assets that are intended to be held for an indefinite period of time, which may be sold in response to needs for liquidity or changes in interest rates, exchange rates or equity prices or that are not classified as loans and receivables, held-to-maturity investments or financial assets at fair value through profit or loss.

Available-for-sale financial assets are initially recognised at fair value, which is the cash consideration including any transaction costs, and measured subsequently at fair value with gains and losses being recognised in the other comprehensive income, except for impairment losses and foreign exchange gains and losses, until the financial asset is derecognized.

If an available-for-sale financial asset is determined to be impaired, the cumulative gain or loss previously recognised in the other comprehensive income is recognised in the statement of comprehensive income. However, interest is calculated using the effective interest method and foreign currency gains and losses on monetary assets classified as available for sale is recognised in the statement of comprehensive income. Dividends on available-for-sale equity instruments are recognised in the statement of comprehensive income under investment when the Company's right to receive payment is established.

The investment in unquoted equities, Federal Government Bond, managed funds and treasury bills are classified as available for sale.

Summary of Significant Accounting Policies (Cont'd)

5.2 Determination of fair value

For financial instruments traded in active markets, the determination of fair values of financial assets and financial liabilities is based on quoted market prices or dealer price quotations. This includes listed equity securities and quoted debt instruments on major exchanges (for example, Nigerian Stock Exchange NSE) and broker quotes from the Financial Markets Dealers Association.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. If the above criteria are not met, the market is regarded as being inactive. Indications that a market is inactive are when there is a wide bid-offer spread or significant increase in the bid-offer spread or there are few recent transactions.

For all other financial instruments, fair value is determined using valuation techniques. In these techniques, fair values are estimated from observable data in respect of similar financial instruments, using models to estimate the present value of expected future cash flows or other valuation techniques, using inputs (for example, NIBOR yield curve, FX rates, volatilities and counterparty market development).

5.3 Trade receivables

Trade receivables arising from insurance contracts are stated after deducting allowance made for specific debts considered doubtful of recovery. Trade receivables are reviewed at every reporting period for impairment.

They are initially recognised at fair value and subsequently measured at amortised cost less provision for impairment. A provision for impairment is made when there is objective evidence (such as the probability of solvency or significant financial difficulties of the debtors) that the Company will not be able to collect the entire amount due under the original terms of the invoice. Allowances are made based on an impairment model which consider the loss given default for each customer, probability of default for the sectors in which the customer belongs and emergence period which serves as an impairment trigger based on the age of the debt. Impaired debts are derecognized when they are assessed as uncollectible. If in a subsequent period the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previous recognised impairment loss is reversed to the extent that the carrying value of the asset does not exceed its amortised cost at the reversed date. Any subsequent reversal of an impairment loss is recognised in the profit and loss.

5.4 Derecognition

The Company derecognises a financial asset only when the contractual rights to the cash flows from the asset expire or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Company neither transfers nor retains

substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

Summary of Significant Accounting Policies (Cont'd)

6 Reinsurance Assets

Reinsurance premiums are recognised as outflows in accordance with the tenor of the reinsurance contract while cost represents outward premium paid to reinsurance companies less the unexpired portion as at the end of the accounting year.

7 Deferred acquisition costs (DAC)

Those direct and indirect costs incurred during the financial period arising from the writing or renewing of insurance contracts and are deferred to the extent that these costs are recoverable out of future premiums. All other acquisition costs are recognized as an expense when incurred. DAC for general insurance are apportioned over the period in which the related revenues are earned.

Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortization period and are treated as a change in an accounting estimate.

DAC are derecognized when the related contracts are either settled or disposed off.

Deferred expenses-Reinsurance commissions

Commissions receivable on outwards reinsurance contracts are deferred and amortized on a straight line basis over the term of the expected premiums payable.

8 Other Receivables and Prepayments

Other receivables and prepayments are carried at amortised cost less any accumulated impairment losses.

9 Investment in Associate

In the financial statements, the Company's investment in its associate is accounted for using the equity method of accounting. An associate is an entity in which the Company has significant influence and which is neither a subsidiary nor a joint venture.

Under the equity method, the investment in the associate is carried in the statement of financial position at cost plus post-acquisition changes in the Company's share of net assets of the associate.

The share of profit of the associate is shown on the face of the income statement. This is profit attributable to equity holders of the associate and, therefore, is profit after tax and non-controlling interests in the subsidiaries of the associates.

10 Investment Properties

Properties that are held for long-term rental yields or for capital appreciation or both, and that are not occupied by the Company, are classified as investment properties.

Recognition of investment properties takes place only when it is probable that the future economic benefits that are associated with the investment property will flow to the entity and the cost can be measured reliably. This is usually the day when all risks are transferred.

Investment properties are measured initially at cost, including transaction costs. The carrying amount includes the cost of replacing parts of an existing investment property at the time the cost was incurred if the recognition criteria are met; and excludes the costs of day-to-day servicing of an investment property.

Subsequent to initial recognition, investment properties are stated at fair value, which reflects market conditions at the date of the statement of financial position. Gains or losses arising from changes in the fair value of investment properties are included in the statement of comprehensive income in the year in which they arise.

Subsequent expenditure is included in the asset's carrying amount only when it is probable that

Summary of Significant Accounting Policies (Cont'd)

future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance costs are charged to the statement of comprehensive income during the financial period in which they are incurred.

The fair value of investment properties is based on the nature, location and condition of the specific asset. The fair value is based on active market prices adjusted, if necessary, for any difference in the nature, location or condition of the specific asset. The fair value of investment property does not reflect future capital expenditure that will improve or enhance the property and does not reflect the related future benefits from this future expenditure. These valuations are performed annually by independent valuation experts.

If an item of property and equipment becomes an investment property because its use has changed, any difference arising between the carrying amount and the fair value of this item at the date of transfer is recognised in other comprehensive income as a revaluation of property, plant and equipment.

However, if a fair value gain reverses a previous impairment loss, the gain is recognised in the Statement of Comprehensive Income. Upon the disposal of such investment property, any surplus previously recorded in equity is transferred to retained earnings; the transfer is not made through the Statement of Comprehensive Income.

Investment properties are derecognised either when they have been disposed of, or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property is recognised in the statement of comprehensive income in the year of retirement or disposal

11 Property, Plant and Equipment

Property and equipment comprise mainly land and buildings, motor vehicles, computer and office equipment, furniture and fittings and plant and machinery and are stated at historical cost less accumulated depreciation and accumulated impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Property and equipment is recognized when it is probable that economic benefits associated with the item will flow to the Company and the cost of the item can be reliably measured.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the statement of comprehensive income during the financial period in which they are incurred.

Land is not depreciated. Depreciation on other assets is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives, as follows:

-Buildings	2.0 %
-Leasehold improvements	10.0 %
-Motor vehicles	25.0 %
-Furniture and fittings	15.0 %
-Computer equipment	33.3 %
-Office equipment	20.0 %
-Plant and machinery	15.0 %

Summary of Significant Accounting Policies (Cont'd)

The assets' residual values and useful lives are reviewed at the end of each reporting period and adjusted if appropriate. The depreciation method is also reviewed at each reporting date. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and value in use. No property and equipment was impaired at 31 December 2013 (31 December 2012).

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in other operating expenses in the statement of comprehensive income.

12 Statutory Deposit

Statutory Deposit represents amount deposited with the Central Bank of Nigeria (CBN) in accordance with Section 10 (3) of Insurance Act, 2003. Statutory deposit is measured at cost. Interest income on statutory deposit is recognized in the statement comprehensive income.

13. Intangible Asset

Recognition of software acquired is only allowed if it is probable that future benefits to this intangible asset are attributable and will flow to company. Software acquired is initially measured at cost. The cost of acquired software comprises its Purchase Price, including import duties and non-refundable purchase taxes, and any directly attributable expenditure on preparing the asset for its intended use. After initial recognition, software acquired is carried at its cost less any accumulated amortization and any accumulated impairment losses.

Internally developed software is capitalized when the Company has the intention and demonstrates the ability to complete the development and use of the software in a manner that will generate future economic benefits, and can reliably measure the cost to complete the development. The capitalized costs include all cost directly attributable to the development of the software. Internally developed software is stated at capitalized cost less accumulated amortization and impairment.

Subsequent expenditure on software assets is capitalized only when it increase the future economic benefits embodied in the specific asset to which it relates. All other expenditure is expensed as incurred. Amortization is recognized in profit or loss on a straight line basis over the estimated useful life of the software, from the date that it is available for use. The estimated useful life of the software is 3 years subject to annual reassessment.

14 Deferred income tax

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the date of the statement of financial position and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of the asset or liability and is not discounted. Deferred tax assets are reviewed at each statement of financial position date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Summary of Significant Accounting Policies (Cont'd)

Deferred tax liabilities are recognised for all taxable temporary differences, except:

_ When the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

_ In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised except:

Where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

_ In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised. Unrecognised deferred tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Summary of Significant Accounting Policies (Cont'd)

15 Insurance contracts

Sovereign Trust issues contracts that transfer insurance risk.

Insurance contracts are those contracts that transfer significant insurance risk. Sovereign Trust defines significant insurance risk as the possibility of having to pay benefits, on the occurrence of an insured event, that are significantly more than the benefits payable if the insured event did not occur.

These contracts are accident and casualty and property insurance contracts.

Accident and casualty insurance contracts protect the Company's customer against the risk of causing harm to third parties as a result of their legitimate activities. Damages covered include both contractual and non contractual events. The typical protection offered is designed for employers who become legally liable to pay compensation to injured employee (employers' liability) and for individual and business customers who become liable to pay compensation to a third party for bodily harm or property damage (public holiday)

Property insurance contract mainly compensate the Company's customer for damage suffered to their properties or for the value of properties lost. Customers who undertake commercial activities on their premises could also receive compensation for the loss of earnings caused by the inability to use the insured properties in their business activities (business interruption cover).

In accordance to IFRS 4, the Company has continued to apply the accounting policies it applied in accordance with the prechange over from Nigerian GAAP.

Salvages

Some insurance contracts permit the Company to sell (usually damaged) property acquired in the process of settling a claim. The Company may also have the right to pursue third parties for payment of some or all costs of damages to its client's property (i.e. subrogation right). Salvage recoveries are used to reduce the claim expenses when the claim is settled.

Subrogation

Subrogation is the right for an insurer to pursue a third party that caused an insurance loss to the insured. This is done as a means of recovering the amount of the claim paid to the insured for the loss. A receivable for subrogation is recognized in other assets when the liability is settled and the company has the right to receive future cash flow from the third party.

16 Insurance Contract Liabilities

These are computed in compliance with the provision of section 20, 21, and 22 of the Insurance Act 2003as follows:

A General Insurance Contracts

Reserves for unearned premium

In compliance with Section 20(1) (a) of Insurance Act 2003, the reserve for unearned premium is calculated on a time apportionment basis in respect of the risks accepted during the year

Reserve for outstanding claims

A full provision is made for the estimated cost of all claims notified but not settled at the date of the financial position, using the best information available at that time. Provision is also made for the cost of claims incurred but not reported (IBNR) until after the financial position date.

Summary of Significant Accounting Policies (Cont'd)

Similarly, provision is made for "unallocated claims expenses" being the estimated administrative expenses that will be incurred after the statement of financial position date in settling all claims outstanding as at the date, including IBNR. Differences between the provision for outstanding claims at the statement of financial position date and the subsequent settlements are included in the Revenue Account of the following year.

Reserves for unearned premium

A provision for additional unexpired risk reserve (AURR) is recognised for an underwriting year where it is envisaged that the estimated cost of claims and expenses would exceed the unearned premium reserve (UPR)

B Liability Adequacy test

At each end of the reporting period, liability adequacy test are performed by an Actuary to ensure the adequacy of the insurance contract liability. In performing these tests, current best estimates of future contractual cash flows and claims handling and administration expenses, as well as investment income from the assets backing such liabilities, are used. Any deficiency is immediately charged to profit or loss initially by writing off DAC and by subsequently establishing a provision for losses arising from Liability Adequacy test "the unexpired risk provision."

17 Financial liabilities

Financial liabilities are carried at fair value through profit or loss (including financial liabilities held for trading and those that designated at fair value) and financial liabilities at amortised cost. Financial liabilities are derecognised when extinguished.

(a) Financial liabilities at fair value through profit or loss

This category comprises two sub-categories: financial liabilities classified as held for trading and financial liabilities designated by the Company as at fair value through profit or loss upon initial recognition.

A financial liability is classified as held for trading if it is acquired or incurred principally for the purpose of selling or repurchasing it in the near future term or if it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking. Derivatives are also categorized as held for trading, unless designated as an effective hedging instrument.

Gains and losses arising from changes in fair value of financial liabilities classified held for trading are included in the statement of comprehensive income in fair value gains and losses.

The Company did not have any financial liabilities that meet the classification criteria of held for trading and did not designate any financial liabilities as at fair value through profit or loss.

(b) Other liabilities measured at amortised cost

Financial liabilities that are not classified as fair value through profit or loss fall into this category and are measured at amortised cost.

At reporting date the debt security in issue which is the convertible bond and other liabilities were carried at amortised cost.

18 Trade payables

Trade payables are recognised when due and are measured on initial recognition at the fair value of the consideration received less directly attributable transaction costs. Subsequent to initial recognition, they are measured at amortized cost using the effective interest rate method.

Derecognition of Trade payables

Insurance payables are derecognized when the obligation under the liability is settled, cancelled or expired.

Summary of Significant Accounting Policies (Cont'd)

19 Other Payables and Accruals

Other payables and accruals are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method. The fair value of a non-interest bearing liability is its discounted repayment amount. If the due date of the liability is less than one year discounting is omitted.

20 Employee benefits

The Company operates two retirement benefit schemes in the form of a pension scheme and gratuity benefits scheme. The Company has both defined benefit and defined contribution plans. A defined benefit plan is a pension plan that defines an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation. A defined contribution plan is a pension plan under which the Company pays fixed contributions into a separate entity. The Company has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods.

(a) Pension costs

The Company operates a defined contribution scheme for its staff and is managed by a highly reputable pension fund administrator. Under the scheme, the company contributes 7.5% while each employee contributes 7.5% of basic salary, housing and transport allowances on a monthly basis. The Company has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expenses when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

(b) Gratuity benefits

The Company operates a non-contributory defined benefits service gratuity scheme for its employees. The employees' entitlement to retirement benefits under the service gratuity scheme depends on the individual years of service, terminal salary and conditions of service. The liability recognised in the statement of financial position in respect of defined benefit pension plans is the present value of the defined benefit obligation at the end of the financial reporting period less the fair value of plan assets, together with adjustments for unrecognized actuarial gains or losses and past service costs. Plan assets exclude any insurance contracts issued by the Company. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using the interest rate of Federal Government Bonds of Nigeria as High Quality Corporate bonds are not available.

Actuarial gains and losses are recognised in full in other comprehensive income when they occur. Past-service costs are recognised immediately in income.

21 Income tax

(a) Current income tax

Income tax payable/(receivable) is calculated on the basis of the applicable tax law in the respective jurisdiction and is recognised as an expense/(income) for the period except to the extent that current tax related to items that are charged or credited in other comprehensive income or directly to equity. In these circumstances, current tax is charged or credited to other comprehensive income or to equity (for example, current tax on of available-for-sale investment).

Where the Company has tax losses that can be relieved against a tax liability for a previous year, it

Summary of Significant Accounting Policies (Cont'd)

recognizes those losses as an asset, because the tax relief is recoverable by refund of tax previously paid. This asset is offset against an existing current tax balance.

Where tax losses can be relieved only by carry-forward against taxable profits of future periods, a deductible temporary difference arises. Those losses carried forward are set off against deferred tax liabilities carried in the statement of financial position.

The Company does not offset income tax liabilities and current income tax assets.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss. Deferred tax items are recognised in correlation to the underlying transaction either in other comprehensive income or directly in equity.

22 Share capital

(a) Share issue costs

Incremental costs directly attributable to the issue of new shares or options or to the acquisition of a business are shown in equity as a deduction, net of tax, from the proceeds.

(b) Dividends on ordinary shares

Dividends on ordinary shares are recognised in equity in the period in which they are approved by the Company's shareholders.

Dividends for the year that are declared after the date of the statement of financial position are disclosed in the subsequent events note.

Dividends proposed by the Directors' but not yet approved by members are disclosed in the financial statements in accordance with the requirements of the Company and Allied Matters Act.

23 Contingency Reserves

Non-life business

In compliance with Section 21 (2) of Insurance Act 2003, the contingency reserve is credited with the greater of 3% of total premium, or 20% of the net profits. This shall accumulate until it reaches the amount of greater of minimum paid-up capital or 50 percent of net premium.

24 Available-for-Sale Reserve

The available-for-sale reserve comprises the cumulative net change in the fair value of the Company's available-for-sale investments. Net fair value movements are recycled to income statements if an underline available-for-sale investment is either derecognized or impaired.

25 Gross premium

The Company recognizes gross premium at the point of attachment of risk to a policy before deducting cost of reinsurance cover. All written premium relating to risk for period not falling due within the accounting period is carried forward as an unearned premium

Summary of Significant Accounting Policies (Cont'd)

26 Reinsurance Expenses

The Company cedes insurance risk in the normal course of business for the purpose of limiting its net loss potential on policies written. Premium ceded comprise written premiums ceded to reinsurers, adjusted for the reinsurers' share of the movement in the provision for the unearned premiums. Reinsurance arrangements do not relieve the Company from its direct obligations to its policyholders. Premium ceded, claims reimbursed and commission recovered are presented in the statement of comprehensive income and statement of financial position separately from the gross amounts.

27 Underwriting expenses

Underwriting expenses are subdivided into acquisition and maintenance expenses. Acquisition expenses are expenses incurred in obtaining and renewing insurance contracts. They include commission paid, policy expenses and indirect expenses such as salaries of underwriting staff; and are deferred and amortised in proportion to the amount of premium determined separately for each class of business. Maintenance expenses are those incurred in servicing existing policies/contract. Maintenance expenses are charged to the revenue account in the accounting period which they are incurred.

28 Interest income and expense

Interest income and expense for all interest-bearing financial instruments are recognised within 'Interest income' and 'Interest expense' in the income statement using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Company estimates cash flows considering all contractual terms of the financial instrument (for example, prepayment options) but does not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

Once a financial asset or a group of similar financial assets has been written down as a result of an impairment loss, interest income is recognised using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

29 Dividend income

Dividends are recognised in the income statement in 'Investment income' when the entity's right to receive payment is established.

30 Fees and commission income

Insurance contract policyholders are charged for policy administration services and other contract fees. These fees are recognized as revenue over the period in which the related services are performed. If the fees are for services provided in future periods, then they are deferred and recognized over those future periods.

31 Other Income

Other incomes are income other than interest income, dividend income and stock trading income. They include rental income, profit on sales of fixed assets and fairvalue gain on investment property.

Summary of Significant Accounting Policies (Cont'd)

32 Management expenses

Management expenses are expenses other than claims, investment expenses, employee benefit, expenses for marketing and administration and underwriting expenses. They include wages, Professional fees, depreciation expenses and other non-operating expenses. Management expenses are accounted for on an accrual basis and recognised in the statement of comprehensive income upon utilisation of the service or receipt of goods.

33 Impairment of financial assets

The Company assesses at each reporting date whether there is any objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred 'loss event') and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganisation and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

a) Assets carried at amortised cost

For financial assets carried at amortised cost, the Company first assesses individually whether objective evidence of impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If the Company determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognised are not included in a collective assessment of impairment.

If there is objective evidence that an impairment loss on assets carried at amortised cost has been incurred, the amount of the loss is measured as the difference between the carrying amount of the asset and the present value of estimated future cash flows (excluding future expected credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate.

The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in the Statement of comprehensive Income. Interest income continues to be accrued on the reduced carrying amount and is accrued using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. The interest income is recorded as part of investment income in Statement of comprehensive Income. Loans together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realised or has been transferred to the Company. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognised, the previously recognised impairment loss is increased or reduced by adjusting the allowance account. If a future write-off is later recovered, the recovery is credited to the 'finance cost' in the Statement of comprehensive Income.

Future cash flows on a group of financial assets that are collectively evaluated for impairment are

estimated on the basis of historical loss experience for assets with credit risk characteristics similar to those in the group. Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not exist currently. Estimates of changes in future cash flows reflect, and are directionally consistent with, changes in related observable data from year to year (such as changes in unemployment rates, property prices, commodity prices, payment status, or other factors that are indicative of incurred losses in the group and their magnitude). The methodology and assumptions used for estimating future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

b) Assets classified as available for sale

For available-for-sale financial investments, the Group assesses at each reporting date whether there is objective evidence that an investment or a group of investments is impaired.

In the case of equity investments classified as available-for-sale, objective evidence would include a 'significant or prolonged' decline in the fair value of the investment below its cost. 'Significant' is to be evaluated against the original cost of the investment and 'prolonged' against the period in which the fair value has been below its original cost. Where there is evidence of impairment, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that investment previously recognized in the Statement of Comprehensive Income – is removed from other comprehensive income and recognised in the Statement of Comprehensive Income. Impairment losses on equity investments are not reversed through the Statement of Comprehensive Income; increases in their fair value after impairment are recognised directly in other comprehensive income.

In the case of debt instruments classified as available-for-sale, impairment is assessed based on the same criteria as financial assets carried at amortised cost. However, the amount recorded for impairment is the cumulative loss measured as the difference between the amortised cost and the current fair value, less any impairment loss on that investment previously recognised in the statement of comprehensive income.

Future interest income continues to be accrued based on the reduced carrying amount of the asset and is accrued using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. The interest income is recorded as part of finance income. If, in a subsequent year, the fair value of a debt instrument increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in the Statement of Comprehensive Income, the impairment loss is reversed through the statement of comprehensive income.

For available-for-sale financial investments, the Group assesses at each reporting date whether there is objective evidence that an investment or a group of investments is impaired.

In the case of equity investments classified as available-for-sale, objective evidence would include a 'significant or prolonged' decline in the fair value of the investment below its cost. 'Significant' is to be evaluated against the original cost of the investment and 'prolonged' against the period in which the fair value has been below its original cost.. Where there is evidence of impairment, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that investment previously recognized in the Statement of Comprehensive Income – is removed from other comprehensive income and recognised in the Statement of Comprehensive Income. Impairment losses on equity investments are not reversed through the Statement of Comprehensive Income; increases in their fair value after impairment are recognised directly in other comprehensive income.

In the case of debt instruments classified as available-for-sale, impairment is assessed based on the

Summary of Significant Accounting Policies (Cont'd)

same criteria as financial assets carried at amortised cost. However, the amount recorded for impairment is the cumulative loss measured as the difference between the amortised cost and the current fair value, less any impairment loss on that investment previously recognised in the statement of comprehensive income.

Future interest income continues to be accrued based on the reduced carrying amount of the asset and is accrued using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. The interest income is recorded as part of finance income. If, in a subsequent year, the fair value of a debt instrument increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in the Statement of Comprehensive Income, the impairment loss is reversed through the statement of comprehensive income.

In the case of debt instruments classified as available-for-sale, impairment is assessed based on the same criteria as financial assets carried at amortised cost. However, the amount recorded for impairment is the cumulative loss measured as the difference between the amortised cost and the current fair value, less any impairment loss on that investment previously recognised in the income statement.

Future interest income continues to be accrued based on the reduced carrying amount of the asset and is accrued using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. The interest income is recorded as part of finance income. If, in a subsequent year, the fair value of a debt instrument increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in the income statement, the impairment loss is reversed through the income statement.

34 Impairment of non-financial assets

Assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Additionally, assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there have separately identifiable cash inflows (cash-generating units). The impairment test also can be performed on a single asset when the fair value less cost to sell or the value in use can be determined reliably. Non-financial assets other than goodwill that suffered impairment are reviewed for possible reversal of the impairment at each reporting date.

Impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised. An impairment loss in respect of goodwill is not reversed.

35 Provisions, contingent liabilities and assets

Provisions are liabilities that are uncertain in amount and timing.

Provisions are recognised when the Company has a present legal or constructive obligation as a result of past events and it is more likely than not that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole.

Summary of Significant Accounting Policies (Cont'd)

A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation.

A contingent liability is a possible obligation that arises from past event and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or the Company has a present obligation as a result of a past event. It is not recognised because it is not likely that an outflow of resources will be required to settle the obligation or the amount cannot be reliably estimated. Contingent liabilities normally comprise of legal claims under arbitration or court process in respect of which a liability is not likely to occur.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. Contingent assets are not recognised but they are disclosed in the financial statement when they arise.

36 Comparatives

Except when a standard or an interpretation permits or requires otherwise, all amounts are reported or disclosed with comparative information. Where IAS 8 applies, comparative figures have been adjusted to conform to changes in presentation in the current year.

37 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker is the person or group that allocates resources to and assesses the performance of the operating segments of an entity. The Company has determined the Company's executive management as its chief operating decision maker.

38 Earning Per Share

Basic earnings per share is calculated by dividing the net profit of the Company by the weighted average number of ordinary shares in issue during the year, excluding the average number of ordinary shares purchased by the Company and held as treasury shares.

Notes to the Financial Statements (Cont'd)

The above are investments in land & Buildings held primarily for generating income or capital appreciation and not occupied substantially for use in the operation of the company. This is carried in the financial position at their market value and revalued periodically on systematic basis every year.

Investment properties are stated at fair value, which has been determined based on valuations performed by Jide Taiwo & Co. with FRC registration number (FRC/2012//00000001254), J. Ajay Patunola & Co with registration number FRC/2012//00000000679, Osato Osawaya & Co with registration number FRC/2013/NIESV/00000004002 and Gerry Ikputu & Partners with registration number FRC/2013/NIESV/00000001685 ,the estate surveyors and valuers/project managers as at December 2013 and 2012

The valuers are the industry specialists in valuing these types of investment properties. The fair value is supported by market evidence and represent the amount at which the assets could be exchanged between knowledgeable, willing buyers and knowledgeable, seller in an arm's length transaction at the date of valuation, in accordance with standards issued by international valuation standards committee. Valuations are performed on an annual basis and the fair value gains and losses are recorded within the income statement.

This is an investment in land and buildings held primarily for generating income or capital appreciation and not occupied substantially for use in the operation of the company. This is carried in the financial position at their market value and revalued periodically on systematic basis at least once in every three years.

This represents zero coupon JPY846,000,000 direct, unconditional, unsubordinated and unsecured European Bond with options issued to Daewoo securities Europe Limited in 2008. The underlying Bond has a put period of 30 months with a yield to put of 4.25% per annum while the tenor of the convertible option is valid up to year 2024. The purpose for which the Bond was issued relates to Expansion of Branch Network, Upgrade of Information and Communication Technology and Working Capital.

The option, commonly referred to as "Call Option" is the option side of the instrument and gives the option holder (Daewoo Securities) the right but not obligation to subscribe to the equity of the issuer at an agreed price (Strike Price) and predetermined time period (Expiration). When exercised, a fresh injection of the capital is required to take up the new issues created.

The Company has secured the consent and agreement of Daewoo Securities (Europe) Limited to restructure the bond for a period of 5 years commencing from year 2013 to 2017 under a new interest rate arrangement which incorporate any previous default interest.

Notes to the Financial Statements (Cont'd)

The bond which was originally issued to mature in September 2010 has been restructured with a new maturity date set at September 2017 while options maintain the validity up to 2024.

SOVEREIGN TRUST INSURANCE PLC
ANNUAL REPORT AND FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2013

Notes to the Financial Statements (Cont'd)

17 Taxation	Dec. 2013	<i>Dec. 2012</i>
	N'000	<i>N'000</i>
Income tax expense		
Company income tax	15,261	83,958
Education Tax	4,652	31,702
IT Development Levy (NITDA)	2,966	15,851
Total current tax	22,879	131,511
Deferred tax		
Origination and reversal of temporary differences	(94,950)	(22,753)
Impact of change in tax rate		-
Amount of previously unused tax losses	-	-
Write down or reversal of deferred tax assets		-
Total deferred tax	(94,950)	(22,753)
Income tax expense	(72,071)	108,759

Profit before tax differs from the theoretical amount that would arise using the basic tax rate as follows:

Profit before income tax	274,859	1,585,113
Tax calculated at the corporate tax rate	82,458	336,560
Effect of:		
Non-deductible expenses	-	33,881
Education tax levy	4,652	31,702
IT Development Levy (NITDA)	2,966	15,851
Tax exempt income	(162,147)	(308,470)
Tax incentives	-	(765)
Tax loss effect	-	-
(Over) / under provided in prior years	-	-
Total income tax expense in income statement	(72,071)	108,759

The current tax charge has been computed at the applicable rate of 30% (31 December 2012: 30%) plus education levy of 2% (31 December 2012: 2%) on the profit for the year after adjusting for certain items of expenditure and income which are not deductible or chargeable for tax purposes. Non-deductible expenses include items such as legal fees, donations, public relations expenses and certain provisions which are not allowed as a deduction by the tax authorities. Tax exempt income include income such as dividend income and income from government bonds which are not taxable.

Notes to the Financial Statements (Cont'd)

The movement in the current income tax liability is as follows:

	Dec. 2013	<i>Dec. 2012</i>
	N'000	<i>N'000</i>
As at January 1	127,506	83,475
Tax paid	(124,359)	(87,480)
Income tax charge	29,584	131,511
As at December 31	32,732	127,506
Current	32,732	127,506
Non-current	-	-
	32,732	127,506

18 Deferred tax

Deferred income taxes are calculated on all temporary differences under the liability method using an effective tax rate of 30 % for 2013 and 2012 respectively.

Deferred income tax assets and liabilities are attributable to the following items:

	Dec. 2013	<i>Dec. 2012</i>
	N'000	<i>N'000</i>
Deferred tax liabilities		
Fixed assets	(35,183)	(116,675)
	(35,183)	(116,675)
Deferred tax assets		
Defined benefit obligation	114,390	81,492
	114,390	81,492
As at December 31	79,207	(35,183)
	Dec. 2013	<i>Dec. 2012</i>
	N'000	<i>N'000</i>
Net deferred tax asset/(liability)	79,207	(35,183)
Deferred tax assets		
To be recovered after more than 12 months	114,390	81,492
To be recovered within 12 months	-	-
	114,390	81,492
Deferred tax liabilities		
To be recovered after more than 12 months	-	-
To be recovered within 12 months	-	(116,675)
	-	(116,675)

35 Finance Cost	122,715	51,792
Finance cost represents interest paid on zero coupon rate bond.		
36 Actuarial losses in defined gratuity scheme	(29,715)	(9,077)
	Dec. 2013	Dec. 2012
	N'000	N'000
37 Unrealised gains/ losses)	27,478	2,955

Unrealised Net gains/(losses) relate to fair value adjustments on the investments in the MTN Shares which are classified as available for sale. Fair value adjustments on available for sale investments are recognized in OCI

Notes to the Financial Statements (Cont'd)

	Dec. 2013	<i>Dec. 2012</i>
	N'000	<i>N'000</i>
38 Net Reclassification adjustment	-	(6,313)

Net reclassification adjustments refer to the fair value adjustments previously recognized in OCI. The financial instruments available for sale were disposed during the year hence the amounts are recycled to the income statement from OCI as the fair value adjustments are now realized.

39 Earnings per share

Basic

Basic earnings per share is calculated by dividing the net profit of the Company by the weighted average number of ordinary shares in issue during the year, excluding the average number of ordinary shares purchased by the Company and held as treasury shares.

	Dec. 2013	<i>Dec. 2012</i>
	N'000	<i>N'000</i>
Profit/(loss) of the Company	274,859	<i>1,585,113</i>
Weighted average number of ordinary shares in issue (in thousands)	6,871,757	<i>6,871,757</i>
Basic earnings per share (expressed in Kobo per share)	4.00	<i>23.07</i>

Diluted

There is no dilution of earnings per share.

Notes to the Financial Statements (Cont'd)

SOVEREIGN TRUST INSURANCE PLC
ANNUAL REPORT AND FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2013

46. Claim Development Table

The claims data has six risk groups - Marine, Motor, Casualty, Fire, Personal Accident, Oil and Gas and Workmen Compensation.

The combined claims data for all lines of business between 2007 and 2013 are summarized in the table below;

Incremental Chain Ladder - Yearly Projections (N)							
Accident Year	1	2	3	4	5	6	7
2007	283,808,079	218,454,304	38,770,836	6,219,139	1,872,360	406,161	1,341,561
2008	429,955,263	216,788,763	53,176,207	9,092,685	4,115,533	3,691,251	-
2009	297,746,922	387,193,217	94,475,369	52,219,117	13,609,258	-	-
2010	359,967,073	442,922,023	146,487,462	284,300,952	-	-	-
2011	465,179,327	400,397,983	144,759,346	-	-	-	-
2012	405,403,050	720,365,344	-	-	-	-	-
2013	542,576,248	-	-	-	-	-	-

Premium Data

The premium data received have been compared with the revenue account as at 31st December, 2013. This certifies the accuracy of the data used in computing unearned risk premium. The table below presents the distribution of premiums by class of business.

Financial Accounts compared with Gross Premium Date

Class of Business	Gross Premium - Data	Gross Premium - Data
Accident	1,092,579,932	1,092,579,932
Engineering	279,550,775	279,550,775
Fire	835,645,014	835,645,014
Marine	698,173,586	698,173,586
Motor	1,367,874,140	1,367,874,140
Oil and Gas	4,417,457,217	4,417,457,217
Total	8,691,280,664	8,691,280,664

Financial Accounts compared with Reinsurance Premium Date

Class of Business	Ceded Premium - Data (N)	Ceded Premium - Data (N)
Accident	225,572,661	225,572,661
Engineering	94,390,905	94,930,905
Fire	186,191,230	186,191,230
Marine	152,626,937	152,626,937
Motor	-	27,860,000
Oil and Gas	3,384,315,957	3,532,138,944
Total	4,043,097,690	4,219,320,677

SOVEREIGN TRUST INSURANCE PLC
ANNUAL REPORT AND FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2013

Claim Development Table

Basic Chain Ladder Method - Motor Claims

The claims paid are allocated to claim development years as illustrated below. Of the claims that arose in 2007, N161.22 million was paid in 2007 (development year 1), N116.72 million in 2008 (development year 2) etc.

Incremental Chain Ladder

Accident Year	Incremental Chain Ladder - Yearly Projections (N)						
	1	2	3	4	5	6	7
2007	161,219,903	116,716,559	4,485,453	311,067	48,547	-	-
2008	169,900,044	107,835,857	13,186,997	3,384,452	3,404,804	800,000	-
2009	181,552,201	146,736,420	15,858,377	800,963	703,896	-	-
2010	225,016,084	122,872,249	10,142,714	692,973	-	-	-
2011	292,165,155	126,132,960	8,334,531	-	-	-	-
2012	209,065,512	153,519,616	-	-	-	-	-
2013	253,324,617	-	-	-	-	-	-

This table illustrates that **N161.22 million** of the claims arising were paid in the 2007. At the end of 2008, the total claim payments arising from accidents in 2007 was **N227.94 million**, this increased to **N282.42 million** in 2009 etc.

Cumulative Data

Accident Year	Cumulative Chain Ladder (N)						
	1	2	3	4	5	6	7
2007	161,219,903	277,936,462	282,421,914	282,732,981	282,781,529	282,781,529	282,781,529
2008	169,900,044	277,735,901	290,922,898	294,307,350	297,712,154	297,712,154	-
2009	181,552,201	328,288,621	344,146,998	344,947,961	345,651,857	-	-
2010	225,016,084	347,888,333	358,031,041	358,724,021	-	-	-
2011	292,165,155	418,298,114	426,632,645	-	-	-	-
2012	209,065,512	362,585,128	-	-	-	-	-
2013	253,324,617	-	-	-	-	-	-
Loss dev factors	-	1.625	1.032	1.004	1.004	1.001	1.000

We then cumulate the data summing up the claims arising from each accident year and arrived at **1.625** in year 1. Similarly, the cumulative ratio of total claims paid at the end of year 3 to 2 is **1.032**.

SOVEREIGN TRUST INSURANCE PLC
ANNUAL REPORT AND FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2013

Claim Development Table

Projected Table

Accident Year	Cumulative Development Pattern- Annual Projections (N)						
	1	2	3	4	5	6	
2007	161,219,903	277,936,462	282,421,914	282,732,981	282,781,529	282,781,529	
2008	169,900,044	277,735,901	290,922,898	294,307,350	297,712,154	297,712,154	
2009	181,552,201	328,288,621	344,146,998	344,947,961	345,651,857	346,128,213	
2010	225,016,084	347,888,333	358,031,041	358,724,021	360,158,917	360,655,265	
2011	292,165,155	418,298,114	426,632,645	428,368,397	430,081,870	430,674,582	
2012	209,065,512	362,585,128	374,012,806	375,534,475	377,036,612	377,556,221	
2013	253,324,617	411,548,088	424,518,943	426,246,095	427,951,079	428,540,855	

Unwinding the cumulative projections from table above, we expect claims projections to be made till 2018 as follows;

Accident Year	Non-Cumulative Development Pattern- Annual Projections (N)						
	1	2	3	4	5	6	7
2007	-	-	-	-	-	-	-
2008	-	-	-	-	-	-	-
2009	-	-	-	-	-	476,356	-
2010	-	-	-	-	1,434,896	496,348	-
2011	-	-	-	1,735,752	1,713,474	592,712	-
2012	-	-	11,427,678	1,521,668	1,502,138	519,608	-
2013	-	158,223,471	12,970,855	1,727,152	1,704,984	589,775	-

From the above table, we illustrate the total expected payment for each future year as follows:

Year	Incremental Amounts
2014	173,298,153
2015	16,702,345
2016	3,822,002
2017	2,224,593
2018	589,775
Total	196,636,868

Claim Development Table

Bornhuetter Ferguson Method- Gross Motor Claims

The ultimate loss ratio for each accident year are estimated as illustrated below:

Accident Years	Gross Earned Premium	Assumed Ultimate Loss Ratio	Initial Ultimate Claims Estimate
2009	1,760,719,286	25	440,179,822
2010	1,515,905,000	30	454,771,500
2011	1,509,371,000	35	528,279,850
2012	1,517,739,600	35	531,208,860
2013	1,283,713,873	35	449,299,856

Stochastic Reserving Method- Gross Motor Claims

Development Age	1	2	3	4	5	6
Link ratio	1.72	1.02	1.00	1.01	1.00	1.00

47. Management of Insurance Risk and Financial Risk

RISK MANAGEMENT PHILOSOPHY AND CULTURE

Our risk management philosophy and culture consist of our shared beliefs, values, attitudes and practices with respect to how we consider risk in everything we do, from strategy development and implementation to every aspect of our day-to-day activities. “We shall underwrite all profitable transactions that we consider prudent and meets our risk appetite and profile. We shall take calculated and informed risk while seeking to maximize returns and shareholders’ value. We shall continuously evaluate the risk and rewards inherent in our business transactions, from strategy development and implementation to our day-to-day activities. We believe that to achieve this objective would require a good understanding of the risks we are taking and the effective management of these risks both at the individual and enterprise levels”.

We therefore manage and control risk by introducing new risk management techniques, enhancing existing risk management practices and placing a greater emphasis on cooperation among departments to comprehensively manage the Company’s full range of risks as a whole. The Company proactively formulates strategies and plans that enable the identification and management of events/factors/occurrences that impact our ability to attain our business and strategic objectives.

Risk Management Strategy

The Company adopts the following strategy for managing risks:

- i. Establish a clearly defined risk management process for identifying, measuring, controlling, monitoring and reporting risks.
- ii. Entrench and incorporate risk management principles in all functions across the Company
- iii. Comprehensive implementation and maintenance of our risk management framework
- iv. Ensure good corporate governance practices
- v. Board and senior management support to promote sound risk management
- vi. Zero tolerance for non-compliance with risk and control procedures
- vii. Avoid concentration of risk to any industry, market, sector or individual entity.
- viii. Deploy a risk management system to facilitate the effective management of risks

Management of financial and insurance risk

Sovereign Trust Insurance Plc ("STI") issues contracts that transfer insurance risk or financial risk or both. This section summarizes these risks and the way the company manages them.

Insurance risk

The risk, under any insurance contract, is the possibility that the insured event occurs and the uncertainty of the amount of the resulting claim. By the very nature of an insurance contract, this risk is random and therefore unpredictable. The Company manages its insurance risk by means of established internal procedures that include underwriting authority levels, pricing policy, approved reinsurers list and monitoring.

STI is exposed to underwriting risk through the insurance contracts that are underwritten. The risks within the underwriting risk category are associated with both the perils covered by the specific lines of insurance including General Accident, Motor, Fire, Marine and Aviation, Oil and Gas and Miscellaneous insurance, as well as the specific processes associated with the conduct of the insurance business. The various subsets of underwriting risks are listed below;

Underwriting Process Risk: risk from exposure to financial losses related to the selection and acceptance of risks to be insured.

Mispricing Risk: risk that insurance premiums will be too low to cover the Company's expenses related to underwriting, claims, claims handling and administration.

Individual risk: This include the identification of which is the risk inherent in an insured property (movable or unmovable), we shall ensure surveys are performed and reviewed as at when due and that risks are adequately priced.

Claims Risk (for each peril): Risk that many more claims occur than expected or that some claims that occur are much larger than expected claims resulting in unexpected losses to the Company. The underwriting risk assessment shall also determine the likelihood of a claim arising from an insured risk by considering various factors and probabilities, determined by information obtained from the insured party, historical information on similar risks and available external data.

Concentration risk (including geographical risk): This includes identification of the concentration of risks insured by STI. STI utilize data analysis, software and market knowledge to determine the concentration of its risks by insurance class, geographic location, exposure to a client or business. The assessment of the concentration risk is consistent with the overall risk appetite as established by the Company.

Underwriting Risk Appetite

The following statements amongst others shall underpin STI's underwriting risk appetite:

- We do not underwrite risks we do not understand;
- We are cautious in underwriting unquantifiable risks;
- We are extremely cautious in underwriting risk observed to be poorly managed at proposal state e.g. those with low safety standards, shoddy construction or businesses with excessively high risk profile;

Management of Insurance Risk and Financial Risk (Cont'd)

- We carefully evaluate businesses or opportunities that could create systemic risk exposures (i.e. incidents of multiple claims occurring from one event e.g. natural catastrophe risks, and risks dependent on the macroeconomic environment);
- We consider all applicable regulatory guidelines while carrying out our underwriting activities;
- We established and adhere to internal standards for co-insurance, reinsurance transactions;
- We exercise extreme caution when underwriting discrete (one-off) risks, particularly where we do not have the requisite experience or know-how;
- Where the broker has inadequate knowledge of the trade of the client or the class of business, we exercise caution in taking on such risks into our books;
- We exercise extreme prudence and caution when dealing with clients with financial difficulties or poor payment records; and with transient clients who change insurers regularly; and
- We ensure compliance with NAICOM's guideline on KYC.

UNDERWRITING STRATEGY

The Company has developed its insurance underwriting strategy to diversify the type of insurance risks accepted and within each of these categories to achieve a sufficiently large population of risks to reduce the variability of the expected outcome. Any risks exceeding the underwriting limits require head office approval. Factors that aggravate insurance risk include lack of risk diversification in terms of type and amount of risk, geographical location and type of industry covered. The Company manages these risks through its underwriting strategy, adequate reinsurance arrangements and proactive claims handling. Underwriting limits are in place to enforce appropriate risk selection criteria. For example, the Company has the right not to renew individual policies, it can impose deductibles and it has the right to reject the payment of a fraudulent claim. Insurance contracts also entitle the Company to pursue third parties for payment of some or all costs (for example, subrogation).

PRODUCTS AND SERVICES

Sovereign Trust Insurance Plc is presently operating as a non-life insurance company and we have a wide range of insurance products and services that are tailored to meet the specific needs of the company's clients. Insurance contracts are issued on an annual contract either directly to the customer or through accredited insurance brokers and agents. Premiums from brokers and agents are payable within six months, whereas from direct customers upfront. The following is a broad spectrum of the products and services the company is offering:

FIRE/EXTRANEIOUS PERILS POLICY

This type of policy will provide indemnity to the insured in the event of loss or damage to property covered under it as a direct result of fire outbreak, lightning or explosion. Other extraneous perils such as social disturbances like strike and riot, and natural disasters like storm damage, flood and earthquake can also be covered by an extension of the standard scope of the cover. The items to be insured are usually made up of the following:

a)Buildings

Management of Insurance Risk and Financial Risk (Cont'd)

- b) Office Furniture, Electrical & Electronic Equipment
- c) Plant and Machinery
- d) Stock of Raw Materials and finished goods
- e) Loss of Annual Rent for alternative accommodation.

The policy also contains various other extensions that are granted at no extra cost to the policyholder. The replacement cost of the items to be insured will have to be supplied to us for assessment to facilitate quotation of the premium payable.

CONSEQUENTIAL LOSS POLICY

This type of policy, often referred to as "business interruption insurance" is designed to indemnify the insured against loss of productive capacity or future earning power which may occur as a result of loss or damage to the premises and property insured under the Fire/Extraneous Perils in 1 above. This policy is normally taken out in conjunction with the Fire Policy so that when the latter pays for the material damage to property insured under it, this will pick up the intangible loss that will flow from the primary loss of the Fire perils. The items usually covered under this policy are as follows:

- a) Gross Profit
- b) Salary and Wages
- c) Auditor's fees

The sum insured to be indicated against the items of Gross Profit should represent the difference in turnover and the total of standing and variable charges. The sum insured on Salary and Wages will be that which is required to maintain some key staff pending resumption of business while the sum insured on Auditor's Fees will represent charges that any firm of accountants will make in preparing papers for insurance claim.

BURGLARY/HOUSEBREAKING POLICY

This type of policy is designed to indemnify the insured against loss or damage resulting from theft or attempted theft which is accompanied by actual forcible or violent entry into or out of the premises or any attempt thereat. The items usually covered under this policy are similar to those under the Fire/Extraneous Perils policy above with the exception of Buildings and Loss of Rent. The replacement cost of the relative items would have to be supplied to enable us submit our quotation.

FIDELITY GUARANTEE POLICY

This is a form of policy that protects an organization against loss of money or valuable stock as a result of dishonesty or fraudulent activity of employees. It is possible to grant cover on named basis, positions basis or on a blanket basis. In any of these cases, the number of persons and the limit of guarantee any one loss would be advised as well as aggregate amount of guarantee in a given year. Once we have this information, we would be in a position to quote for premium payable.

PUBLIC LIABILITY POLICY

This policy also covers the insured against legal liability to third party for cost and expenses incurred in respect of accidental death, bodily injury and accidental damage to property occurring within the insured's premises or at work-away premises. The vicarious liability of the insured's employee can also be covered provided it arose in the course of carrying out his official duties. Please indicate the limit of cover required to enable us advise the premium payable.

Management of Insurance Risk and Financial Risk (Cont'd)

MONEY POLICY

This is another type of All Risks policy which is designed to cover any fortuitous event that could result in the loss of cash while in the course of transit either to or from the bank.

The cover will also operate while the money is on the premises of the insured and while in a securely locked safe. The policy can also be extended to cover cash in the personal custody of selected management staff.

GOODS IN TRANSIT POLICY

This is also an "All Risks" policy covering goods being carried from one location to another. Any loss not specifically excluded under the policy is covered and the insurance is suitable for any organization that is engaged in movement of goods either by road or rail and the cover will operate when the goods are being conveyed by the insured's owned or hired vehicles. Losses arising from Fire and Theft are covered under this policy.

GROUP PERSONAL ACCIDENT POLICY

This type of policy is designed to foster the welfare of employees as well as reduce the financial strain that an organization could undergo in the event of death or bodily injury to a member of staff arising as a result of any injury sustained through accidental, violent, external and visible means. The policy provides a world-wide cover on 24 hours basis and benefits payable in respect of Death and Permanent Disability are usually expressed as multiple of salaries. Cover also extends to pay weekly benefit in the event of temporary total disability resulting from bodily injury to the insured person as well as certain allowance for expenses incurred on medical treatment as a result of accidental injury. Death or injuries from natural causes are however not covered.

MOTOR INSURANCE POLICY

This class of insurance is made compulsory by Government through the legislation known as the Motor Vehicle (Third Party) Insurance Act of 1945. Third Party Only cover which is the minimum type of insurance legislated upon provides indemnity to policyholder against legal liability to Third Parties for death, bodily injury and property damage. The most popular type of cover under this policy is comprehensive insurance which, in addition to the cover provided under the Third Party Only, will also indemnify the policyholder for loss or damage to the vehicle resulting from road accident, fire and theft. The premium payable for the various forms of cover under this policy is regulated by a statistical table of rate known as "tariff" which is approved by Government.

MARINE POLICIES

CARGO: The policy issued here is to provide indemnity for loss or damage to imported goods being conveyed by sea or air. The All Risks type of cover known as Clauses "A" provides indemnity to the insured in the event of total or partial loss of the goods while the restricted cover known as Clauses "C" would provide indemnity in the event of total loss only. To enable us determine the premium payable in this regard, we would require information on the nature and value of goods being imported as well as the type of cover required.

HULL: This type of policy is issued on vessels and yachts to provide indemnity for any loss, damage or liability that may arise from their use. The scope of cover provided is either an "all risks" or "total loss only" while the policy usually carries a deductible of about 10% of the value of the vessel or yacht.

Management of Insurance Risk and Financial Risk (Cont'd)

AVIATION POLICY

This policy provides comprehensive cover against loss or damage to insured aircraft while operating anywhere in the world. Cover also extends to include the operator's legal liability to Third Parties for death, bodily injury and property damage. Liability to passengers is also covered up to a certain limit selected. In order to ensure full protection for our clients, we reinsure as much as 70% of this type of risk in the London Aviation Market through one of our overseas associates. The essence of this arrangement is to obviate the problem of absorption in the Nigerian Market which has limited capacity for Aviation Insurance and also to afford our clients the opportunity of having a dollar/sterling based insurance policy.

MACHINERY BREAKDOWN POLICY

This policy is designed to cover any damage to a plant or equipment while working or at rest, or being dismantled for the purpose of cleaning, repairing or overhauling. In the same vein, boiler and pressure vessels can be covered under a separate but similar policy.

ELECTRONIC EQUIPMENT POLICY

This policy is designed to cover any loss or damage that could result while any computer and or equipment insured is working or at rest. The cover under this policy also extends to include loss or damage to external data media such as diskettes and tapes containing processed information while such are kept within the premises. The increase in cost of working, as a result of damage to the main computer equipment, is also covered and indemnity is provided for alternative means of carrying on operation. With payment of an additional premium, this policy can be extended to cover the risk of theft.

ENERGY RISKS

The policies on offer in this area have been specifically developed to take advantage of the insurance opportunities created by the Nigerian Content Policy. The Nigerian content policy is aimed at utilizing Nigerian human and material resources in creating values in the country through all contracts awarded in the Oil and Gas industry and the Power sector of the economy. Sovereign Trust Insurance Plc has carved a niche as the Leader in provision of Oil & Gas and Energy Insurance in Nigeria.

Our focus is on the following areas:

- Upstream Risks which includes Construction/Erection All Risks, Operators Extra Expense Insurance, Property Insurance and General Third Party Liability Insurance.
- Downstream Risks which includes the downstream properties (Refineries and Petrochemical plants, Onshore pipelines, Oil tank farm, Gas processing plants, Pumping and Metering stations, Gas turbines and Boilers, Damage to Asset and other related downstream sector risks.
- Power, Solid Mineral and Other special products.

The above products have been packaged for marketing to the public sector as well as various manufacturing, industrial and commercial concerns. Financial institutions such as banks, mortgage and stock broking firms are also being offered these products. Our company is innovative in approach and we specialize in packaging policies in line with the needs of the various segments of the economy. Sovereign Trust Insurance Plc also provides comprehensive risk management services. The company carries out various risk surveys and make appropriate recommendations towards risk improvement and minimization of loss impacts.

Management of Insurance Risk and Financial Risk (Cont'd)

APPROACH TO MANAGEMENT OF UNDERWRITING RISKS

The Company's underwriting risk shall be managed by adhering to policies, principles and guidelines spelt out in the Annual Underwriting Plan.

Where the broker has inadequate knowledge of the trade of the client or the class of business and the client not willing to disclose such information, the Company shall exercise caution in taking on such risks.

The Company shall exercise extreme prudence and caution when dealing with clients with financial difficulties or poor payment records; and with transient clients who change insurers regularly; and The Company shall ensure compliance with the National Insurance Commission's guidelines on "Know Your Customer" (KYC) requirement to get enough information about the transaction.

The company carries out timely pre-loss inspection/survey exercise of risks, preferably before commencement of cover but not later than 48 hours after commencement of risks.

We limit acceptance of risks to a more convenient value/share while spreading excess through co-insurance or facultative basis.

We ensure application/introduction/review of policy terms and conditions including clauses/warranties that will deal with areas of concern which will at the end of the day make the risk worthy of being in the company's portfolio.

RISK ACCEPTANCE RULES

The company shall follow the provisions (terms and conditions) of the reinsurance treaties that were arranged for the classes of insurance that any risk offered for insurance falls under in deciding whether to accept the risk or not. This shall be the situation on all cases where the sum insured of the risk is more than the company's retention as contained and evidenced by the treaty cover notes.

For any risk that Reinsurance Treaty could not be arranged for, acceptance of such risks shall be limited to any limit set by the company for such risks at the beginning of each year and shown in the underwriting plan.

ENERGY INSURANCE RISKS

No risks relating to the special covers in (as different from the standard covers) Energy, Oil and Gas shall be accepted without clarification from the Head of Energy Department or Head of Branch Operations Department (for risks coming from the Branch/Area/Agency offices).

MARINE INSURANCE RISKS

No Marine insurance risk (Hull or Cargo), Marine Cargo or any other special risks of different nature but relating to Marine Insurance E.G. Marine Cargo Insurance export, shall be accepted without clarification from the Heads of Technical, Energy and Branch Operations Departments. The company shall not accept Marine Cargo business in respect of fish head risks whether as import or export. Where it must be covered for any reason, cover shall be limited to ICC "C" and on rate of premium of a minimum of 0.20%.

AVIATION RISKS

No Aviation risk, Marine Hull risk, Marine Cargo export and any other special risks of different nature shall be accepted without clarification from the Heads of Technical, Energy and Branch Operations Departments.

Approaches to Risk Mitigation

Generally, we shall apply any of the following four (4) approaches to risk mitigations:

Management of Insurance Risk and Financial Risk (Cont'd)

a) Risk Termination (Avoidance)

Under the risk termination approach, we will take measures to avoid risks that are outside our risk appetite, not aligned to our strategy or offer rewards that are unattractive when compared to the risk undertaken. Specifically, we will discontinue activities that generate these risks, such as divesting from certain geographical markets, product lines or businesses. Generally, we will utilize this approach for high-risk events that remain unacceptably high even after we have applied controls.

b) Risk Treatment (Reduction)

Under the risk treatment approach, we would accept the risks inherent in our transactions, but shall take measures, through our system of internal controls, to reduce the likelihood and/or impact of these risks. Generally, we would utilise this approach for risks that occur frequently and have low impact. Some of the measures we shall take under this approach may include formulating or enhancing policies, defining boundaries and authority limits, assigning accountabilities and measuring performance, improving processes, strengthening existing controls or implementing new controls and continuing education and training.

c) Risk Transfer (Sharing)

Under the risk transfer approach, we would accept the risks inherent in our transactions, but shall take measures to transfer whole or portions of the risk to an independent counterparty. Specifically, we shall transfer our risks to an independent counterparty such as co-insurance and reinsurance companies by utilising contracts and arrangements. We will retain accountability for the outsourced risk and that outsourcing does not eliminate risk but only changes our risk profile. The relevant business units shall be responsible for identifying and incorporating the risks arising from such risk transfer arrangements in their risk registers. The business units shall also be responsible for managing the resultant risks and reviewing the risk transfer arrangement to ensure that it is still capable of mitigating the initial risk.

d) Risk Tolerance (Acceptance)

Under the risk tolerance approach, we would accept the risks inherent in our transactions and would not take any action to change the likelihood and/or impact of the risks. We shall adopt this approach where the risk is low and the cost of further managing the risk exceeds the potential benefit should the risk crystallize.

d) Reinsurance Treaty Cover

We have arranged very adequate reinsurance treaties to enable us accommodate large risk. Our treaties are arranged by UAIB and JLTRE with consortium of reputable reinsurance companies.

The types of re-insurance arrangement on Sovereign Trust Treaty are:

- 1) Quota share
- 2) Surplus
- 3) Excess of loss

1) Quota share

This is the simplest type of Re-insurance whereby a Reinsurer agrees to reinsure a fixed proportion of every risk accepted by the ceding company, sharing proportionately in all losses and receiving in the same proportion of all direct net premium, less the agreed reinsurance commission.

Management of Insurance Risk and Financial Risk (Cont'd)

2) Surplus

Under this arrangement the ceding company can retain a risk up to the level of its agreed Retention amount. The proportion of the risk which is beyond the Retention amount is the ceded into the Surplus treaty and reinsurer receives a proportionate share of the premium, less reinsurance commission.

3) Excess of Loss

This arrangement protects the ceding company against a loss where the ceding company's claims liability exceeds its retention.

Concentration of insurance risk

The Company monitors concentrations of insurance risk by product and sector. An analysis of concentrations of insurance risk at 31 December 2013 and 2012 for Gross Premiums written is set out below:

<i>(a) By product</i>	31 Dec.2013	<i>31 Dec.2012</i>
	N'000	<i>N'000</i>
Motor business	1,358,907	<i>1,562,672</i>
Fire & Property	823,932	<i>878,056</i>
Marine & Aviation	712,172	<i>808,321</i>

C.A.R & Engineering	262,604	<i>477,603</i>
Energy business	4,420,222	<i>2,863,274</i>
	8,673,676	<i>7,742,785</i>
 <i>(b) By sector</i>	 31 Dec.2013	 <i>31 Dec.2012</i>
	 N'000	 <i>N'000</i>
Energy	5,437,734	<i>4,047,242</i>
Financial Services	554,863	<i>721,336</i>
IT/Telecoms & Other Corp.	1,059,460	<i>1,022,662</i>
Manufacturing	601,304	<i>570,603</i>
Public Sector	505,093	<i>904,549</i>
Retail	515,222	<i>476,393</i>
	8,673,676	<i>7,742,785</i>

Financial risk management

Sovereign Trust Insurance Plc operates in a highly complex and competitive environment driven by the need to meet all claim obligations, maximize returns to shareholders and comply with all statutory and regulatory requirements. The Company is in the business of managing risks for public and private entities as well as individuals. In the ordinary course of its business activities, the Company is exposed to a variety of financial risks, including currency risk, liquidity risk, credit risk, country risk and market risk as well as operational and compliance risks.

Management of Insurance Risk and Financial Risk (Cont'd)

Risk is the level of exposure to opportunity, threat and uncertainty – that should be identified, understood, measured and effectively managed, in the course of executing the Company's business strategies. In terms of opportunity, we see risk in relation to returns in that the greater the risk, the greater the potential return. We therefore manage risk by using several methods to maximize the positive aspects within the constraints of our risk appetite and business environment.

In terms of threat, we see risk as the potential for the occurrence of negative events such as financial loss, fraud, damage to reputation or public image and loss of competitive advantage. We therefore manage risk in this context by introducing risk management techniques to reduce the probability of these negative events occurring without incurring excessive costs or stifling the initiative, innovation, and entrepreneurial flair of our staff.

In terms of uncertainty, we see risk as the distribution of all possible outcomes both positive and negative. In this context, we manage uncertainty by seeking to reduce the variance between anticipated outcomes and actual results.

Management of Insurance Risk and Financial Risk (Cont'd)

The impact on the Company's profit before tax if interest rates on financial instruments held at amortised cost or at fair value had increased or decreased by 100 basis points, with all other variables held constant are considered insignificant. This is due to the short term nature of the majority of the financial assets measured at amortised cost.

(b) Sensitivity analysis - equity risk

The sensitivity analysis for equity price risk illustrates how changes in the fair value of equity securities will fluctuate because of changes in market prices, whether those changes are caused by factors specific to the individual equity issuer, or factors affecting all similar equity securities traded in the market.

Management monitors movements of financial assets and equity price risk movements by assessing the expected changes in the different portfolios due to parallel movements of a 1% increase or decrease in the Nigeria All share index with all other variables held constant and all the Company's equity instruments in that particular index moving proportionally.

As at 31 December 2013, the market value of quoted securities held by the Company is N 420 million (2012: N 334 million). If the all share index of the NSE moves by 100 basis points at 31 December 2013, the effect on profit or loss would have been N 4.2 million (2012: N 3.3 million).

The Company holds a number of investments in unquoted securities with a market value of N 103 million as at 31 December 2013 (2012: N 88 million) of which investment in MTN Nigeria Ltd is the significant holding. This investment was valued at N 76 million (cost N 49 million) (2012: N 73 million, cost N 49 million) as at 31 December 2013. MTN Nigeria is a private limited liability company whose principal activity is the provision of mobile telecommunications service using the Global System for Mobile Communications (GSM) platform.

Management of Insurance Risk and Financial Risk (Cont'd)

The Company exposure to foreign currency risk is largely concentrated in the Japanese Yen. Movement in the exchange rate between the Japanese Yen and the Nigerian Naira affects reported earnings through revaluation gain or loss and balance sheet size through increase or decrease in the revalued amounts of assets and liabilities denominated in Japanese Yen.

The table below shows the impact on the Company's profit and balance sheet size if the exchange rate between the Japanese Yen and the Nigerian Naira had increased or decreased by 10% with all other variables held constant.

	2013	2012
Effect of 10% mov. on profit b/4 tax and fin. position size (N'000)	106,690	100,778

Credit Risk

The Company's assets are exposed to credit risk, which is the risk that a counterparty will be unable to pay amounts in full when due. The Company's maximum exposure to credit risk is reflected in the carrying amounts of financial assets on the balance sheet. The main sources of the Company's incoming cash flow are the amounts of receivables from insured and reinsurers. The Company manages the credit risk arising from such sources by aging and monitoring the receivables. The Company conducts the review of current and non-current receivables on a monthly basis and monitors the progress in the process of collection of the premiums in accordance with the procedure stated in the Company's internal control policy. The non-current receivables are checked and assessed for impairment.

The overdue premiums are considered by the Company on case by case basis. If an overdue premium is recognised by the Company as uncollectible, a notification is sent to the policyholder and the insurance agreement is cancelled from the date of notification. The premium related to the period from the beginning of insurance cover until the date of cancellation of the insurance agreement is considered a bad debt, and further steps right up to legal actions are planned with regard to that bad debt.

Other areas where the Company is exposed to credit risk are:

- amounts due from reinsurers for the insurance risks ceded;
- amounts due from insurance intermediaries.
- amounts due from insured
- amounts of deposits held in banks and correspondent accounts

STI is exposed to the following categories of credit risk.
 Direct Default Risk - risk that STI will not receive the cash flows or assets to which it is entitled because brokers, clients and other debtors which STI has a bilateral contract defaults on their obligations.

Concentration Risk – is the exposure to losses due to excessive concentration of business activities to individual counterparties, groups of individual counterparties or related entities, counterparties in specific geographical locations, industry sectors, specific products, etc

Counterparty Risk - the risk that a counterparty is not able or willing to meet its financial obligations to the Company as they fall due.

Management of Insurance Risk and Financial Risk (Cont'd)

Credit Risk Principles

The following principles underpin the Company's credit risk management policies:

- Individuals who create the credit risk and those who manage the risk clearly understand the nature of the risk;
- The Company's credit risk exposure is within the limits as approved by the Board;
- Credit decisions are clear and explicit and in line with the business strategy and objectives as approved by the Board;
- Credit risk exposures shall be within the defined limits to ensure there is no excessive concentration and that credit control procedures for managing large exposures and related counterparties are adhered to;
- Appropriate classification of credit risk through periodic evaluation of the collectability of risk assets; and
- Adequate loan loss provisioning to ensure that provisions or allowances are made to absorb anticipated losses.
- The expected payoffs more than compensate for the credit risks taken by the company;
- Credit risk taking decisions are explicit and clear;
- There shall be clear delegated authorization limits for transactions;
- Sufficient capital as a buffer is available to take credit risk;

The Company's credit risk appetite shall be in line with its strategic objectives and available resources. In setting this appetite/tolerance limits, STI takes into consideration its corporate solvency level, risk capital and liquidity level, credit ratings, level of investments, reinsurance and coinsurance arrangements, and nature and categories of its clients.

In setting the credit limit, a few conditions were put into consideration and these actually assisted in the selection of the brokers that made this list. From the records available for this purpose, the conditions used as yardstick are as follows: 1. Speed of payment; 2. Relationship management; 3. Volume of business and 4. Size of the accounts

From the above conditions, the few Insurance Brokers identified have been categorized into three (3) groups namely A, B and C.

Maximum exposure to credit risk before collateral held or other credit enhancements:

	Maximum exposure

Management of Insurance Risk and Financial Risk (Cont'd)

Liquidity Risk

Liquidity risk is the inability of a company to meet obligations on a timely basis. It is also the inability of a company to take advantage of business opportunities and sustain the growth target in its business strategy due to liquidity constraints or difficulty in obtaining funding at a reasonable cost. Our liquidity risk exposure is strongly related to our credit and investment risk profile. The Company is exposed to daily calls on its available cash resources from claims to be paid. At 31 December 2011, management does not believe the current maturity profile of the Company lends itself to any material liquidity risk, taking into account the level of cash and deposits and the nature of its securities portfolio at year end, as well as the reinsurance structure of the Company's insurance portfolio. The Company's bank deposits and trading securities are able to be released at short notice when and if required. The possible payments of significant insurance claims are secured by the reinsurance contracts' clause that allows a cash call from the reinsurers for the losses exceeding a certain amount based on line of business.

Sources of Liquidity Risk

Our liquidity risk exposure depends on the occurrence of other risks. Some of the factors that could lead to liquidity risks are:

- Reputational loss or rating downgrade, leading to inability to generate funds;
- Failure of insurance brokers and clients to meet their premium payment obligation as and when due;
- Lack of timely communication between Finance & Investment Division and Claims Department resulting in mismatch of funds;
- Investment in volatile securities; and
- Frequency and severity of major and catastrophic claims.

Liquidity Risk Management Strategy

The Company's strategy for managing liquidity risks are as follows:

Maintain a good and optimum balance between having sufficient stock of liquid assets, profitability and investment needs;

- Ensure strict credit control and an effective management of account receivables;
- Ensure unrestricted access to financial markets to raise funds;
- Develop and continuously update the contingency funding plan;
- Adhere to the liquidity risk control limits; and
- Communicate to all relevant staff on the liquidity risk management objectives and control limits.

Liquidity Risk Appetite/Tolerance

Our liquidity risk appetite is defined using the following parameters:

- Liquidity gap limits;
- Scenario and Sensitivity Analysis
- Liquidity Ratios such as:
 - Claims ratio
 - Cash ratio
 - Quick ratio
 - Receivable to capital ratio
 - Technical provision to capital ratio
 - Maximum exposure for single risk to capital ratio
 - Maximum exposure for a single event to capital ratio
 - Retention rate
 - Re-insurance receipts to ceded premium ratio
 - Solvency margin

The table below presents the cash flows payable by the company. The amounts disclosed in the table are the contractual undiscounted cash flows. All liabilities are presented on a contractual cash flow basis except for the insurance liabilities, which are presented with their expected cash flows.

Management of Insurance Risk and Financial Risk (Cont'd)

(b) Financial instruments measured at fair value

IFRS 7 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable input reflects market data obtained from independent sources; unobservable inputs reflect the Group's market assumptions. These two types of inputs have created the following fair value hierarchy:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)

Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs)

This hierarchy requires the use of observable market data when available. The Group considers relevant and observable market prices in its valuations where possible.

At 31 December 2013 (N'000)	<i>Level 1</i>	<i>Level 2</i>	<i>Level 3</i>	<i>Total</i>
Financial assets

At end of period	-	14,903

Management of Insurance Risk and Financial Risk (Cont'd)

There were no gains or losses for the period included in profit or loss arising from Level 3 items.

Sensitivity analysis of Level 3 items

The following table shows the sensitivity of level 3 measurements to reasonably possible alternative assumptions.

	At 31 December 2013		At 31 December 2012	
	Favorable	Unfavorable	Favorable	Unfavorable
	changes	changes	changes	changes
	N'000	N'000	N'000	N'000
Unquoted equity investments	-	-	280	(280)

The sensitivity analysis was determined based on 5% increase or decrease in profit of the investee company under normal operating conditions with all other variables held constant.

(c) Fair valuation methods and assumptions

(i) Cash and bank balances

Cash and bank balances represent cash held with other banks. The fair value of these balances is their carrying amounts.

(ii) Equity securities

The fair values of quoted equity securities are determined by reference to quoted prices (unadjusted) in active markets for identical assets. The fair value of the unquoted equity securities was determined on a net asset value basis, except for the investment in MTN Nigeria which was fair valued with reference to prices from the over-the-counter market.

(iii) Debt securities

Treasury bills represent short term instruments issued by the Central banks of the jurisdiction where the Company operates. The fair value of treasury bills and bonds at fair value are determined with reference to quoted prices (unadjusted) in active markets for identical assets. The estimated fair value of bonds (asset or liability) at amortised cost represents the discounted amount of estimated future cash flows expected to be received. Expected cash flows are discounted at current market rates to determine fair value.

(iv) Other assets

Other assets represent monetary assets which usually have a short recycle period and as such the fair values of these balances approximate their carrying amount.

48. Capital Management Policies

Capital management

STI has over the years been deploying capital from earnings and additional equity funds to support growth in business volumes while striving to meet dividend commitments to shareholders. To be able to continue to generate and deploy capital both to grow core businesses and reward shareholders, there is need for the Company to execute the right strategy, the right growth dynamics, the right cost structure and risk discipline as well as the right capital management.

STI's capital management strategy focus on the creation of shareholders' value whilst meeting the crucial and equally important objective of providing an appropriate level of capital to protect stakeholders' interests and satisfies regulators.

The Company's objectives when managing capital are as follows:

- 1.To ensure that capital is, and will continue to be, adequate for the safety, soundness and stability of the Company;
- 2.To generate sufficient capital to support the Company's overall business strategy;
- 3.To ensure that the Company meets all regulatory capital ratios and the prudent buffer required by the Board;
- 4.To ensure that the average return on capital over a 3 -5 years performance cycle is sufficient to satisfy the expectations of investors;
- 5.To maintain a strong risk rating;
- 6.To ensure that capital allocation decisions are optimal, considering the return on economic and regulatory capital;
- 7.To determine the capital required to support each business activity based on returns generated on capital to facilitate growth/expansion of existing businesses (i.e. capital allocation);
- 8.To establish the efficiency of capital utilization.

Solvency margin

The Company complied with the minimum capital requirement of N3 billion for non-life operations. This is shown under Shareholders' Fund in the Statement of Financial Position. Insurance industry regulator measures the financial strength of Non-life insurers using a solvency margin model. NAICOM generally expect non-life insurers to comply with this capital adequacy requirement.

Section 24 of the Insurance Act 2003 defines Solvency margin of a Non-life insurer as the difference between the admissible assets and liabilities and this shall not be less than 15% of Net Premium Income (Gross Premium Income less re-insurance premium paid) or the minimum capital base (N3 billion) whichever is higher.

The Company did not meet the required solvency margin. There is short fall of N299,720,000 as shown in the solvency margin computation.

Capital Management Policies (Cont'd)

This test compares insurers' capital against the risk profile. The regulator indicated that insurers should produce a minimum solvency margin of 100%. The company experienced a shortfall in its solvency margin for the year ended 31st December, 2013.

In order to continually meet the company's obligation to policy holders, the company is offering 1 to 3 rights issue to existing shareholders to boost her capital base, this will increase the capital by N1,145,292,899. It is expected that the capital injection initiatives will soon crystallize and would address the solvency margin concerns.
