Dear Sirs,

CONFIRMATION OF GOING CONCERN STATUS OF DANGOTE CEMENT PLC ("DCP")

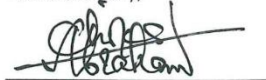

Dangote Cement Plc is in the process of raising **Senior Unsecured Series 1 Bonds** under its ₦300,000,000,000 (Three Hundred Billion Naira) Debt Issuance Programme registered by the Securities and Exchange Commission ("SEC").

We have carried out the audit of the consolidated and separate financial statements of DCP for the year ended 31 December 2019, which were prepared in accordance with the International Financial Reporting Standards, the Companies and Allied Matters Act Cap C20 LFN 2004 and the Financial Reporting Council of Nigerian Act 2011.

Based on our audit of the consolidated and separate financial statements of DCP for the year ended 31 December 2019, we confirm that nothing came to our attention that causes us to believe that DCP would not continue as a going concern in the next 12 (twelve) months from the date of our report (26 February 2020), and therefore consider it appropriate that the Directors of DCP have prepared the consolidated and separate financial statements for the year ended 31 December 2019 on a going concern basis.

This letter has been prepared only for the purposes of compliance with the rules and regulations of the SEC.

Yours faithfully,

For: Deloitte & Touche

Of the Material Litigation, we note that (a) there are seven (7) matters challenging or seeking declarations in relation to the Issuer's mining leases; (b) one (1) case involves a claim for declaration of title to land; while (c) nineteen (19) cases relate to claims against the Issuer for death, bodily harm and damage caused to property, as a result of the reckless driving of drivers employed by the Issuer. These cases are at various stages of hearing in various courts, and the Issuer is exploring settlement options in one (1) of the cases relating to accidents allegedly caused by the reckless driving of drivers employed by the Issuer. Whilst we note that the litigation matters are liabilities which will remain with the Issuer after conclusion of the Transaction, we have nevertheless reported the Material Litigation with a combined monetary value of N79,178,907,885.00 (**Material Contingent Liability Amount**), in order to provide an insight into potential litigation liabilities of the Issuer. We also note that the directors of the Issuer are of the view that the claims against the Issuer will not have a significant effect on its financial health nor adversely affect the Transaction. In our opinion, any adverse decision in the Material Litigation is not likely to have an adverse effect on the Transaction. However, we are unable to predict the outcome of the cases against the Issuer.”

The total costs of these projects are estimated to be ₦312,000,000,000 (circa U\$860,000,000). These projects are currently being funded by a combination of internally generated cash and short-term borrowings. A portion of the proceeds from the Bond issuance will therefore be used to support further capital expenditure in relation to these projects, whilst refinancing previously incurred associated short-term debt.

Refinancing of Shareholder Loan

DCP has been largely supported by loans from its parent company Dangote Industries Limited, where expedient. As at December 2019, the Issuer had an outstanding balance of about ₦37,000,000,000 in Shareholder loans. As this is short-term bridging finance, DCP plans to replace a portion of the shareholder loans with longer term funding from the Bond issue.

Working Capital

The Issuer will also apply a portion of the proceeds raised from the Offer towards its operational working capital requirements.

Accordingly, the estimated net issue proceeds of the Series 1 Bond - being ₦98,834,423,000.00 following the deduction of the offer costs of ₦1,165,577,000.00 representing 1.17% of the gross issue proceeds - will be utilized for the purposes stated below:

Transaction summary

Dangote Cement Plc registered a N300bn Debt Issuance Programme (“the Programme” or “DIP”) with Securities and Exchange Commission (“SEC”) in October 2017. The DIP is backed by a resolution of the Board of Directors (“the Board”) of the Issuer. An initial N100bn is expected to be raised in Series 1 Bond Issuance under the Programme. The net proceeds shall be utilised for capacity expansion project, export terminal project and refinancing of shareholder loan. The Series 1 Bonds shall have a legal maturity tenor of five years with expected maturity in 2025. The Bonds shall constitute direct, unconditional, senior, unsubordinated and unsecured obligations of the Issuer and shall at all times rank *pari passu* and without any preference among themselves.

GCR has accorded an indicative rating of AA⁺_(NCR) to the Series 1 Bonds, and not the Programme. The rating relates to the ultimate payment of principal and coupon (as opposed to timely, akin to an expected loss rating, which is a function of probability of default and loss severity).

Summary rating rationale

- The Issuer is Africa’s leading integrated cement manufacturer, with a combined installed capacity of 45.6 million tonnes per annum across ten countries. Nevertheless, its geographical spread is counterbalanced by single market concentration, with Nigeria accounting for 88% of group EBITDA and 64% of capacity at FY19. GCR affirmed the Issuer’s long term rating at ‘AA⁺_(NCR)’ with a Stable outlook in January 2020. The rating reflects Dangote’s substantial production capacity, its extensive distribution network, significant scale economies and position as the largest corporate on The Nigerian Stock Exchange.
- The Programme Trust Deed does not offer Bondholders any security over assets but does feature a negative pledge and other covenants to protect the interest of Bondholders.
- As the Series 1 Bonds are direct, unconditional, senior, unsecured and unsubordinated obligations of the Issuer, the Bonds will bear the same rating as the Issuer, and any change in the rating assigned to the Issuer will directly affect the Bond rating.
- Dangote has demonstrated robust earnings generating capacity over the years, supported by its low fixed cost model, scale economies and clinker sufficiency in Nigeria. GCR expects some margin pressure to persist in Nigeria in particular. The attainment of medium-term targets will also depend on improved economic conditions and improved earnings contribution from other markets.
- The Issuer reports robust cash generation which peaked at N392.3bn in FY19 and supported operating cash flow coverage of total debt of 108%, despite ongoing expansion related working capital absorptions
- Gearing metrics remain moderate at FY19, with net gearing reported at 27%, and net debt to EBITDA at 62%. However, this could escalate following successful issuance of the proposed Series 1 Bonds.

Summary of Transaction:

Asset class	Senior unsecured
Programme limit	N300bn
Series 1 Bond size	N100bn
Tenor	5 years
Maturity Date	2025
Interest rate	12.5%
Interest basis	Fixed, payable semi-annually
Principal redemption basis	Bullet repayment upon maturity
Negative pledge	Yes

Rating report issued by Moody's Investors Service, Inc.:

MOODY'S INVESTORS SERVICE

Rating Action: Moody's assigns (P)B2/Aa3.ng ratings to Dangote Cement Plc's DMTN program and B2/Aa3.ng to proposed series 1 notes

24 Mar 2020

DIFC - Dubai, March 24, 2020 -- Moody's Investors Service, ("Moody's") has today assigned a (P)B2 local currency rating and Aa3.ng national scale rating (NSR) to the NGN300 billion domestic medium term note program (DMTN) issued by Dangote Cement Plc (DCP) and assigned a B2 local currency rating and Aa3.ng NSR to the proposed series 1 notes to be issued under the DMTN program.

At the same time, Moody's has affirmed DCP's B1 corporate family rating (CFR), B1-PD probability of default rating and Aa2.ng NSR CFR. The rating outlook is negative.

A complete list of rating actions can be found at the end of this press release.

RATINGS RATIONALE

The (P)B2 and Aa3.ng ratings assigned to the DMTN program and B2 / Aa3.ng ratings to the company's series 1 unsecured notes are one notch lower than the company's B1 CFR. This reflects their subordination to the company's secured debt in the capital structure. In addition, the series 1 notes do not benefit from upstream guarantees from operating subsidiaries where the bulk of the secured debt is issued. As a result, the notes effectively rank junior to other operating subsidiary secured liabilities in a default scenario.

DCP's B1 CFR, which is one notch above the Government of Nigeria's B2 rating, considers the company's strong intrinsic credit quality balanced against meaningful linkage and limited ability to withstand stress at the Nigerian sovereign or macroeconomic level.

The B1 rating is supported by the company's (1) strong market presence in Nigeria and other African markets in which it operates; (2) high gross margins above 60% on a Moody's adjusted basis; (3) low leverage of 0.9x, as measured by gross debt/EBITDA and high interest coverage of 6.6x, as measured by EBIT/interest expense, in 2019; (4) funding policies that match debt funding to the local currency cash flow generation; and (5) prudent financial policies that ensure credit metrics remain strong through operating and project build cycles.

The ratings also factor (1) the relatively small scale level of cement production when compared to global peers, with production of 22.8 million tons (mt) for 2019; (2) single product exposure being cement; (3) a concentration of production in Nigeria, representing 68% of revenues in 2019; (4) high reliance on short term debt funding exposing the company to liquidity risk; and (5) an aggressive dividend policy.

LIQUIDITY

DCP's liquidity profile is weak because it relies on the rollover of short term debt and commercial paper funding, equal to NGN106 billion and NGN137 billion respectively as of 31 December 2019. Combined with the board recommended dividend of NGN273 billion (approx.\$750 million), which if approved and paid in June 2020, will weaken DCP's liquidity and expose the business to refinance risk.

Moody's recognizes that DCP has a good track record of accessing the local funding market given its low leverage, blue chip corporate status in Nigeria and strong local banking relations. Furthermore, Moody's expects a portion of the proceeds from the issuance of the proposed notes to be used to refinance short term debt which will somewhat improve the company's liquidity profile.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE (ESG) CONSIDERATIONS

The cement industry is energy intensive and the mining and manufacturing process for cement production consume large amounts of coal, electricity and water. Dangote's production meets domestic emission standards and the company has implemented measures to increase energy efficiency.

In terms of corporate governance, the company is 85.1% owned by Dangote Industries Limited, which is in turn owned by its founder and chairman, Aliko Dangote. This does present key man risk in Moody's view given that

Mr. Dangote continues to play a pivotal role in the fortunes of the company.

RATIONALE FOR THE NEGATIVE OUTLOOK

The negative outlook mirrors the Nigerian sovereign negative outlook, reflecting Moody's view that the credit quality of DCP is tied to the economic and political developments in Nigeria. The negative outlook further reflects DCP's reliance on short term funding combined with high annual dividends payments, which expose the company to a potential liquidity shortfall over the next 12 to 18 months. Moody's expect the issuance of long term debt to reduce the reliance on short term debt, alleviating near term liquidity risk.

WHAT COULD CHANGE THE RATING UP/DOWN

A rating upgrade is unlikely, given DCP's B1 rating is constrained by the Government of Nigeria's local currency issuer rating of B2. Due to the high revenue contribution from its domestic operations, there is a strong interlinkage between DCP's rating and the sovereign rating, which prevents DCP to be rated more than one rating level above the sovereign. Even if the sovereign rating were to be upgraded, DCP would need to demonstrate a track record of good liquidity management for an upgrade to be considered.

The ratings are likely to be downgraded in the case of a downgrade of the Government of Nigeria's rating. A downgrade could also occur if (1) liquidity does not improve; (2) the Nigerian government introduces special taxes, levies or other punitive measures that negatively impact DCP's profits or cashflow, such that operating margins falls below 20% on a sustained basis and adjusted debt to EBITDA trends above 4x or adjusted EBIT to interest expense trends below 2.5x; and (3) DCP moves away from its policy of matching the currency of its underlying cash flows with that of its debt.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated and Separate Financial Statements section of our report. We are independent of the Group in accordance with the requirements of the Institute of Chartered Accountants of Nigeria Professional Code of Conduct and Guide for Accountants (ICAN Code) and other independence requirements applicable to performing audits of financial statements in Nigeria. We have fulfilled our other ethical responsibilities in accordance with the ICAN Code and in accordance with other ethical requirements applicable to performing audits in Nigeria. The ICAN Code is consistent with the International Ethics Standards Board for Accountants Code of Ethics for Professional Accountants (Parts A and B). We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated and separate financial statements of the current year. These matters were addressed in the context of our audit of the consolidated and separate financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matter described below to be the key audit matter to be communicated in our report. The key audit matter below relate to the audit of the consolidated financial statements.

Key Audit Matter	How the matter was addressed in the audit
Complexity of Multi-jurisdictional operations	
<p>The Group operates in multiple jurisdictions, exposing it to a variety of different laws and regulations, and interpretations thereof.</p>	<p>We performed an assessment of the material components impacting the Group's tax expense, balances and exposures, including those with material regulatory compliance requirements. We reviewed and challenged the information reported by subsidiaries with the support of local auditors and tax specialists, where appropriate. With the support of our tax specialists at Group level, we verified the consolidation and analysis of tax balances, expense and disclosures.</p>
<p>The nature of its business subjects it to regulations by various authorities across the jurisdictions in which it operates. These regulations include taxation, environmental and company laws and give rise to complexity and uncertainty in respect of general compliance.</p>	
<p>Due to their significance in quantitative and qualitative terms for tax provisions and other regulatory compliance requirements respectively to the Group financial statements as a whole, combined with the judgement and estimation required to determine the current and deferred tax balances.</p>	<p>We assessed at each component, the material compliance requirements with respect to local laws and regulations. Other Information

The directors are responsible for the other information. The other information comprises the directors' Report, Audit Committee's Report and Company Secretary's Report, which we obtained prior to the date of this auditors' report. The other information does not include the consolidated and separate financial statements and our report thereon.

Our opinion on the consolidated and separate financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated and separate financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

Based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, if we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Consolidated and Separate Financial Statements

The directors are responsible for the preparation of the consolidated and separate financial statements that give a true and fair view in accordance with International Financial Reporting Standards and the requirements of the Companies and Allied Matters Act CAP C20 LFN 2004, Financial Reporting Council Act, 2011 and for such internal control as the directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, the directors are responsible for assessing the Group's and Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group and/or the Company or to cease operations, or have no realistic alternative but to do so.

Auditors' Responsibilities for the Audit of the Consolidated and Separate Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group and the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists relating to events or conditions that may cast significant doubt on the Group and Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the Group and Company's financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated and separate financial statements. We are responsible for the direction, supervision and performance of the Group's audit. We remain solely responsible for our audit opinion.

We communicate with the audit committee and the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

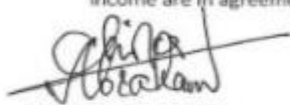

We also provide the audit committee and directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the audit committee and/or the directors, we determine those matters that were of most significance in the audit of the financial statements of the current year and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the benefits derivable by the public from such communication.

Report on Other Legal and Regulatory Requirements

In accordance with the Sixth Schedule of the Companies and Allied Matters Act CAP C20 LFN 2004, we expressly state that:

- i) We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit.
- ii) The Group and Company have kept proper books of account, so far as appears from our examination of those books.
- iii) The Group and Company's financial position, statements of profit or loss and comprehensive income are in agreement with the books of account and returns.

APPENDIX I: MANAGEMENT DISCUSSION AND ANALYSIS

Audited results for the year ended 31st December 2019

Growth in Pan-African volumes, with Tanzania volumes up 94%

Nigerian volumes flat despite low domestic market growth and border closure impact on cement export

Proposed dividend of ₦16.00 per share

Lagos, 26th February 2020: Dangote Cement PLC (DANGCEM-NL), Africa's largest cement producer, announces audited results for the financial year ended 31st December 2019.

Financial highlights

- Group revenue down 1.1% to ₦891.7B
- Group EBITDA down 9.2% to ₦395.4B; 44.3% margin
- Earnings per share (net of 2018 tax credit) down 21.3% to ₦11.79
- Dividend remained flat at ₦16.00 per share
- Net debt of ₦227.5B; net debt/EBITDA of 0.58x

Operating highlights

- Group sales volumes up by 0.1%
- Nigerian volumes flat at 14.1Mt despite export volume reduction due to border closure
- Nigerian market share maintained in the mid-60s
- Pan-African volumes up and reaching 9.4Mt
- Commenced usage of temporary gas power plant in Tanzania

Capital Structure

- Shareholders have approved share buyback programme
- The registration process to deploy this programme in 2020 is ongoing and is dependent on various regulatory approvals

Joe Makoju, Group Chief Executive Officer, said:

"Dangote Cement maintained strong financial performance despite a low growth environment, pricing pressure and increasing competition in key markets.

The Nigerian operations maintained volume and revenue performance in a challenging environment. Export sales were affected by the border closure in the second half of 2019. Looking ahead, I expect an increase in volumes in 2020 as we commence clinker exports via shipping from Nigeria.

Pan-Africa volumes were slightly up notably supported by Tanzania and Senegal. I am glad to report that Tanzania contributed positively at EBITDA level. In 2020, I believe Dangote Cement will see an increase in profitability in Pan-Africa driven by higher volumes and further efficiency improvements.

As I retire from Dangote Cement, I am proud to have watched it grow from a local producer back in 2007 to a major force in global cement production. Dangote Cement has eliminated Nigeria's dependence on imported cement and has transformed the nation into an exporter of cement serving neighbouring countries. I wish Mr Michel Puchercos all the best as the new Group Chief Executive Officer of Dangote Cement."

Nigerian operations

Nigeria's economy has remained subdued throughout 2019, with an average growth of 2.3% in the full year when compared to the previous year. The International Monetary Fund (IMF) estimates that the Nigerian economy will grow by 2.5% in 2020.

Nigeria's cement market grew slightly in 2019. We estimate that total market consumption was up between 2%-3% on the 20.7Mt estimated in 2018. The market was impacted negatively by the disruptions related to the 2019 election cycles, heavy rains and the loss in export volumes due to the border closure.

Dangote Cement's Nigerian operations remained flat at 14.1Mt in 2019, including export sales of 0.45Mt. Domestic sales in Nigeria were nearly 13.7Mt, compared to 13.4Mt in 2019. This implies a 2% growth mirroring the estimated GDP growth for the year. However, exports dropped by 41% for the full year owing to the border closure in the last few months of 2019.

Revenues for the Nigerian operations decreased by 1.3% to ₦610.2B, due to the higher level of discounting in key markets. The "Bag of Goodies" promotion, launched in July, drove strong increases in our Nigerian volumes in the third quarter. This innovative marketing effort enabled us to maintain our market share despite the 4.5Mt new capacity which came into the market during the year. We recorded an EBITDA of ₦361.2 at a margin of 59.2% excluding central costs and eliminations (2018: ₦397.4, 64.3%). The decrease in EBITDA was mainly due to higher level of discounts, additional marketing expenses and increase in haulage costs. We took control of the delivery of more volumes directly to our customers in order to improve our last mile efficiency and reach untapped markets.

In dollar terms, ex-factory cement prices averaged \$112/t for the FY 2019.

Outlook

Despite the subdued economic growth estimated for 2020, the cement market is expected to show growth. This is due to the government's drive to increase revenues and focus on increasing infrastructure spending.

Exports are expected to increase in 2020 as Dangote Cement will commence exporting clinker from the Apapa and Onne ports to West and Central Africa.

Pan-African operations

Pan-African operations sold 9.44Mt of cement in 2019, up 0.8% on the 9.37Mt sold in 2018. The total Pan-African volume represents 40.1% of Group volumes.

Pan-African revenues of ₦282.7B were 0.2% lower than FY 2018 and represented 31.7% of total Group revenues. The region's EBITDA contribution of ₦47.9B (before central costs and eliminations), represented 12.1% of Group EBITDA, at a regional margin of 16.9%, compared to a margin of 17.3% in 2018. The lower profitability was mainly attributable to depressed economic conditions in South Africa and Zambia. Technical issues challenged the performance of our Ethiopian operations. That said, stronger performance was recorded in Tanzania, Senegal and Sierra Leone.

Looking ahead, we expect to further deploy our clinker and cement export strategy across West and Central Africa. The completion of our 1.5Mt grinding plant in Cote d'Ivoire is expected by the end of 2020.

Cameroon

Cameroon's economy is expected to have achieved 3.8% growth in 2019. The resumption of stadiums, roads, hotels, and other construction projects for the preparation of 2021 African Cup of Nations is expected to support demand.

We faced a decrease in volumes against security challenges in the North West and South West region of the country as well as new competitor capacity. Overall, volumes dropped by 6.5% in 2019 versus 2018 owing to strengthened competition in key markets.

Sales volumes came in at 1.1Mt and we estimate our market share to have been 39% in FY19. In dollar terms, ex-factory cement prices averaged \$108/t for the FY 2019.

Congo

The cement sector has suffered from economic crisis faced by the country since 2016. Public construction work has slowed down significantly, and market demand remains muted.

Our 1.5Mta integrated plant in Mfila, Republic of Congo sold 243Kt of cement for the full year 2019, up 11.5% compared to the full year 2018. Our market share for the fourth quarter came in at 33%.

In dollar terms, ex-factory cement prices averaged \$79/t for the FY 2019.

In the absence of major infrastructure projects, the cement market was mostly driven by commercial building and private infrastructure projects in 2019. Clinker exports started in 2019.

Ethiopia

The overall market size increased marginally by 1% in the year due to a slowdown in the economic activities arising from the ongoing acute foreign exchange shortages, low government expenditure, liquidity crunch by the banks and security concerns. The market remains predominantly retail as spending on most major projects has reduced.

Sales at our 2.5Mta factory in Mughher, Ethiopia, were 2.0Mt in the full year 2019, with a market share of about 25.8%. Our performance in Ethiopia was affected by the shortages of limestone due to technical challenges and power rationing. Our market share declined from 27.0% to 25.8% mainly due to these production challenges.

In dollar terms, ex-factory cement prices averaged \$72/t for the FY 2019.

Ghana

Dangote Cement Ghana sold over 500Kt of cement for the full year 2019, down 34% compared to the full year 2018 owing to strategic intent to focus on profitable markets. Our market share for the fourth quarter came in at 6%.

In dollar terms, ex-factory cement prices averaged \$98/t for the FY 2019.

Senegal

Senegal continues to be one of our best performing markets, where we sell everything we produce. The market continues to grow supported by a growing middle class and the decentralisation initiative taken by the government enabling several new cities and zones to be built.

Sales from our 1.5Mta plant in Pout increased by 8.4% to more than 1.4Mt in the full year 2019, with the plant's output continuing to exceed its rated capacity. Our market share improved to 23% in 2019 from 19% in 2018.

In dollar terms, ex-factory cement prices averaged \$70/t for the FY 2019.

Sierra Leone

Sierra Leone's cement market continues to improve with increased infrastructure spending, more foreign aid being made available and the resumption of building projects in the corporate sector. Major infrastructure projects include road, high-way and bridge construction work. The government has removed import duties on bagged cement in order to support increased building activity.

Sierra Leone is a small market for cement, consuming about 0.7Mt. Our market share increased to 35% in 2019 while our volumes increased significantly by 116% to 236kMt owing to a significant ramp up in our plant.

In dollar terms, ex-factory cement prices averaged \$92/t for the FY 2019.

South Africa

The subdued state of South Africa's cement market reflects the country's economy, which is estimated to have grown by less than 1% in 2019. Lower spending in large scale infrastructure projects and depressed demand for new residential construction led to a low growth cement market.

The annual sales volume decreased by 9.4% y-o-y mainly due to low demand and increased competition from importers & blenders.

The newly introduced Falcon brand supported volumes in highly contested markets during the second half of the year.

The South African government introduced a carbon tax on 1st June 2019 for all manufacturing industries. Based upon our carbon emissions from cement production, we expect to pay approximately ZAR40 million per annum.

Prices decreased 3% in the full year 2019 as compared to 2018.

Tanzania

Tanzania's robust economy has driven growth in infrastructure and housing, with major government projects including roads, railways and airports.

Tanzania contributed positively at EBITDA level. Our plant was stable for the full year after a shut down for five months in 2018. As a result, our volumes (including clinker) was up 94% to 1.2Mt. Our clinker sales also ramped-up in 2019. Cash cost reduced significantly owing to the use of the temporary gas turbines in 2019. We expect our cash cost to further improve once our gas power plant is completed.

In dollar terms, ex-factory cement prices averaged \$72/t for the FY 2019.

Zambia

Zambia's real GDP growth slowed to an estimated 2% in 2019, down from 4.0% in 2018. The main driver in Zambia is the public investment expenditure programme that have pushed the cement demand. The government have started significant projects such as the international airports of Lusaka and Ndola, dams and road infrastructures.

The Ndola factory sold just over 975kt of cement in 2019, down 5.6% on the 1,033kt sold in the same period last year. We are deploying alternative fuel usage in Zambia which will support the overall profitability of our operations going forward.

In dollar terms, ex-factory cement prices averaged \$70/t for the FY 2019.

Capital structure

Dangote Cement's shareholders have expressed full support to the Board and management in executing a share buyback. The process is ongoing and is dependent on various regulatory approvals. The proposed programme is being undertaken in line with the company's corporate strategy to make the company more attractive in the near-term and positioning the company for future long-term growth.

Revenue decreased slightly by 1.1% from ₦901.2B to ₦891.7B, driven by reduced average net prices for both Nigeria and Pan-Africa. Net revenue per tonne in Nigeria amounted to ₦43,221 in 2019 as compared to ₦43,610 in 2018 representing a decrease of 0.9%.

Cement volumes sold by our core Nigerian operations remained broadly constant at 14.12Mt (2018: 14.18Mt) with increased local sales due to promotion activities being offset by the decline in exports due to the border closure. Sales to domestic customers in Nigeria increased by 1.9% from 13.41Mt to 13.67Mt with the remaining 0.45Mt being exported representing a decrease of 41% in export volumes.

Full year Pan-African volumes increased by 0.8% from 9.37Mt to 9.45Mt.

Manufacturing and operating costs

(Increase)/decrease in finished goods and work in progress	3,357	(8,794)
Total manufacturing costs	379,989	383,311

In general, manufacturing costs decreased as a result of reduced volumes in Ghana, South Africa and Cameroon. This was partially offset by the increase in Nigeria manufacturing costs from ₦170.3B to ₦181.0B (mainly due to general inflation and foreign exchange impacts on USD denominated expenses) and increased production costs in Tanzania, Congo and Sierra Leone driven by volumes increase. Pan Africa manufacturing costs decreased by 6.6% from ₦213.3B to ₦199.0B.

Consequently, the total Group manufacturing costs decreased by 0.9%.

Administration and selling expenses

Year ended 31 st December	2019 ₦m	2018 ₦m
Administration and selling costs	214,769	189,426

Total selling and administration expenses rose by 13.4% to ₦214.8B, mostly as a result of higher sales distribution costs in Nigeria and Pan Africa. Although the total volumes sold in Nigeria remained flat, the proportion delivered by our trucks increased resulting in increased haulage costs. Haulage costs in Nigeria increased from ₦56.7B to ₦70.7B.

The trend was the same in Pan-Africa as we delivered a higher proportion of the sales volume as compared to 2018 resulting in the Pan Africa haulage costs increasing from ₦31.3B to ₦36.5B.

In addition, various promotion schemes were deployed in Nigeria which drove the increase in advertising and promotion costs.

Profitability

Year ended 31 st December	2019 ₦m	2018 ₦m
EBITDA	395,427	435,261

Total EBITDA	395,427	435,261

Group earnings before interest, tax, depreciation and amortisation (EBITDA) for the year decreased by 9.2% to ₦395.4B at a margin of 44.3% (2018: ₦435.3B, 48.3%) as a result of the reduced net prices in Nigeria and the increase in selling and distribution costs both in Nigeria and Pan Africa.

Excluding eliminations and central costs, EBITDA decreased by 9.1% in Nigeria, to ₦361.2B at a margin of 59.2% (2018: ₦397.4B, 64.3%).

Pan-African EBITDA decreased by 2.5% to ₦47.9B, at 16.9% margin (2018: 17.3%), driven by lower volumes in South Africa, Ethiopia & Zambia.

Operating profit of ₦299.9B was 11.5% lower than the ₦338.7B for 2018 at a margin of 33.6% (2018: 37.6%) driven by higher discounts in key markets and distribution costs.

Interest and similar income/expense

Year ended 31 st December	2019 Nm	2018 Nm
Interest income	7,610	11,323
Exchange loss	(13,481)	(8,112)
Interest expense	(44,192)	(41,666)
Net finance income / (cost)	(50,063)	(38,455)

Interest income decreased by 32.8%, mainly as a result of reduced interest earning cash balances in Nigeria.

During the year to December 2019, the Nigerian Naira was devalued from about ₦359/1US\$ to ₦365/1US\$. The devaluation resulted in net exchange gains from inter-Group assets and liabilities that do not eliminate in full on consolidation in the Nigerian operations. This exchange gain was outweighed by the unrealised exchange losses from Pan-Africa operations that use the FCFA, Sierra Leonean Leone and the Ghana Cedi resulting in a net exchange loss.

The effective interest rate on borrowings was 10.87% compared to 10.68% in 2018.

Taxation

Year ended 31 st December	2019 Nm	2018 Nm
Tax (charge)/credit	(49,958)	89,519

Prior to 2018, we made a tax provision on profits earned from Ibese production lines 3 & 4 and Obajana production line 4 on the basis that they were yet to obtain approval for tax holiday under the Pioneer Status Incentive. The approval was obtained in 2018 and the provision of ₦134B was reversed resulting in the tax credit of ₦89.5B for the 2018 financial year.

In 2019 the effective tax rate for Nigerian operations was 17.1% representing a mix of non-taxable income for productions lines still under the Pioneer tax holiday and taxable income for production lines out of Pioneer tax exemption.

The Group's effective tax rate was higher at 19.9%, mainly because of Pan-African subsidiaries making losses that reduced the Group's profit without direct tax benefits for those losses.

The Group's profit for the year was down 48.6% to ₦200.5B (2018: ₦390.3B). As a result, earnings per share decreased by 48.4% to ₦11.79 (2018: ₦22.83).

Non-current assets increased from to ₦1,265.6B at the end of 2018 to ₦1,334.6B at 31st December 2019. This was mainly as a result of additions to Property, Plant & Equipment which were partially offset by depreciation.

Additions to property, plant and equipment were ₦175.0B, of which ₦131.6B was spent in Nigeria and ₦43.3B in Pan Africa operations.

In addition to the acquisition of fixed assets, right of use assets amounting to ₦12.0B were recognised for the first time following the adoption of IFRS 16. This also contributed to the increase in non-current assets.

There was an increase in advances from customers in Nigeria which resulted in the significant increase in the current liabilities. In addition, payables to contractors also increased.

Recommended dividend

On 25th February 2020, the Directors recommended to maintain a dividend of N16.00 per share for approval at the Annual General Meeting

Going Concern

The Directors continue to apply the Going Concern principle in the preparation of the Financial Statements. After considering the liquidity position and the availability of resources, the Directors concluded that there are no significant threats to the Group's Going Concern capabilities.

The Directors believe that the current working capital is sufficient for the operations and the Group generates sufficient cash flows to fund its operations. Borrowings are mainly to fund the expansion projects in various African countries.
