

ISSUERS SHARE PRICE INFORMATION

The Market Services department of the Nigerian Stock Exchange is delighted to introduce the "Display of Share Price

Information' in Real Time and Delayed channels using the newly launched NSE Market Data Application Programing Interface (API).

DISPLAY OF SHARE PRICE INFORMATION

The Display of Share Price Information enables contracted subscribers listed on the Stock Exchange, to display stock quotes information and/or share price on the home page of their website whether in Real Time or Delayed interval.

The Nigerian Stock Exchange is offering a chance to constantly update Share price information on the website with a 45 seconds delay for each change in the price information for a full year round.

Key Benefits

- Share price is the single, most consumed piece of investor information worldwide and displaying this prominently on the website for every change in the Share price, keeps Investors rightly informed in making quick investment decisions.
- The API removes the complexity of manually transferring data from Excel spreadsheet or any means of document processing.
- It offers a seamless integration where Real Time Equity prices are easily embedded in your corporate applications like websites, portfolio management tools and mobile application.
- It guarantees consistency since every change in share price is delivered from a single source through a Standard Interface.

Listed companies are able to display Real Time Stock Information on Websites and also feed this into internal applications for the purpose of monitoring and tracking stock performance and liquidity.

What Do I Receive?

- Stock Quotes/Share Price
- Unlimited number of hits per day
- Frequency in Real Time or Delayed.

Get started by completing the Request form attached and send back to marketdata@nse.com.ng and agopaldas@nse.com.ng.

For further details of the NSE Share Price information, please contact Market Services on 01-4485857 or email contactcenter@nse.com.ng

Issuers Share Price Information FAQ's

1. What is the 'Issuers Share Price Information' Product?

The Issuer's Share Price Information allows a company listed on the Nigerian Stock Exchange to display Stock quotes, symbols, previous close, previous close date, change, percent change, open, high, low, close, volume, currency, market date and time, UTC offset, 52 week high/low, Trade Date and Last Trade Time on its corporate website on a near Real Time basis.

2. Why it is important for the Share Price to be displayed on a company's website?

Share Price information is the single, most consumed piece of Investor information worldwide and displaying this prominently on a company's website for every change in the Share Price, keeps Investors rightly informed in making quick investment decisions.

It also, provides an incentive for Investors and visitors to return to the website for Stock monitoring performance. This will also increase the numbers of visitors to the corporate website.

3. How frequently are the share prices updated on the website?

This depends on your subscription to the product in Real Time or Delayed interval. On a Real Time basis, it takes less than 15 seconds for the price to be updated from the time it changes in the NSE trading engine.

On a Delayed basis, it takes up to 15 minutes for the update data to reflect on your corporate website.

4. I am interested, where do I begin?

Contact the NSE Market Services on +234-4485857 or send an email to contactcenter@nse.com.ng requesting for subscription to 'Display of Share Price Information'

You can also check the NSE website on www.nse.com.ng for more information.

It requires five simple steps that can be achieved in three working days:

I. Complete the Registration formII. Make payment to the NSEIII. Sign our Standard License

Agreement form

IV. NSE will provision you access and activate your

ΔΡΙ

V. "Go-Live" on your Display of Share

Price

Information

The product is integrated to your system with a programming effort that will fetch the required data from our system using the Application Programming Interface (API).

6. What is an API (Application Programming Interface)?

In the simplest terms, an API serves as a channel by which a software communicates or interacts with another software. A company releases its API to the public so that other software developers can design products that are powered by its service.

7. Do I require the assistance of a Software developer?

Yes. However, the NSE Market Data API has been developed to make the integration process easy and seamless for a software developer to implement the service on your corporate website.

8. Why do I have to sign an Agreement?

A Market Data agreement is required as a legal authorization for the distribution of the Exchange's data. The Agreement governs the use of the data and ensures that distributors do not contravene any rights accrued to the Exchange. The Agreement also details the Exchanges' obligations to the client.

9. What does the cost involve?

The cost depends on the frequency of the data requested. This could be in Real Time, Delayed or End of Day. For further details on pricing, contact the Market Services Department on marketdata@nse.com.ng or the NSE Contact Center on contactcenter@nse.com.ng

10. Can the Exchange recommend a Software Developer if I don't have one already?

The Exchange will provide all necessary support that will make your integration seamless. However, should you have any concerns, contact the Market Services Department on marketdata@nse.com.ng or the NSE Contact Center on contactcenter@nse.com.ng for assistance.

11. If I have a dual listing, can I also secure the Foreign Price information through the NSE?

The Share Price information of a dual listed company is provided by both Exchanges. While the NSE provides their Share Price information, the Foreign Exchange will have to be contacted to supply theirs.

12. I am listed on the ASEM board of the Exchange, is this product available to me?

Yes. This product is available to all companies that have equity listings on the Nigerian Stock Exchange.
