NSE X-Cloud

NSE X-Cloud

NSE X-Cloud provides the opportunity for trading participants to physically locate their servers as close as possible to NSE's mission-critical Trading and Market Data engines.

As Africa's leading Exchange, we have recently launched a Tier III Datacenter, for the provision of primary facilities and partnered with a leading Tier III Datacenter for the provision of DR facilities. Hosting units at the NSE will be allocated on a first come first served basis.

Traders are encouraged to leverage on our cutting edge Technology to position their business among world class latency traders by having the fastest access to the Nigerian Stock Market and Market Data.

Primary Service Specification

Connectivity	Round-Trip Network Latency
Leased Line/MPLS Connectivity	6,000 to 13,000 microseconds

NSE Co-location Service	Less than 1 millisecond
Hosting Unit	Specification
Racks	16 Racks
Height	47 U
Width x Depth	600m x 1070m
Power	Specification
Power	3KW/Rack
Equipment Cooling	Patented Automatic Louver Technology
Power Usage Effectiveness	1.5PUE

Primary Service Specification

MOS Compliance	Increased Performance	Cost Effective Solution
Achieve the NSE Minimum Operating Standard requirement by putting a strong BCP in place.	Achieve success in trading strategies with a low latency access to the NSE trading servers.	Avoid fixed infrastructure investment costs and focus on managing your core business.
Dedicated Support Staff	Flexibility & Service Availability	Security
Get access to a dedicated support team and a 24/7/365 monitoring system in place.	Offers you the opportunity to grow at your own pace with guaranteed Power and 100% Uptime level.	Multiple levels of physical security giving you the highest levels of physical protection.

Co-location Service

We offer two different subscription packages – **Standard and Platinum**.

- **Standard** subscribers will enjoy the lowest and fastest access to our trading and market data engines.
- **Platinum** subscribers will experience significantly lower latency compared to other subscribers or market participants.

	Platinum	Standard
Subscription Classification	Lowest possible latency to NSE trading and market data engines.	Value competitive offering that is significantly faster than any proximity hosting solution.
